Cisco Implementing and Operating Cisco Collaboration Core Technologies Sample Questions (Q176-Q181):

NEW QUESTION # 176

Which two conditions must a user meet to provision a new device using the self-provisioning feature? (Choose two.)

- A. At least DNs must be assigned to the user device.
- B. The user must have at least one user device profile assigned.
- C. The user must have a primary extension.
- D. The user must have the appropriate universal device template linked to the linked to the user profile.
- E. The user must be part of "standard CCM Super User".

Answer: C,D

NEW QUESTION # 177

When configuring Cisco UCM, which configuration enables phones to automatically reregister to a Cisco UCM publisher when the connection to the subscriber is lost?

- A. Cisco UCM Group
- B. Device Pool
- C. Route Group
- **D. SRST**

Answer: D

Explanation:

Section: Infrastructure and Design

Explanation:

Cisco Unified SRST provides Cisco Unified CM with fallback support for Cisco Unified IP phones that are attached to a Cisco router on your local network. Cisco Unified SRST enables routers to provide call-handling support for Cisco Unified IP phones when they lose connection to remote primary, secondary, or tertiary Cisco Unified CM installations or when the WAN connection is down.
