With our software version of 1Y0-205 Exam Material, you can practice in an environment just like the real examination. And our APP version of 1Y0-205 practice guide can be available with all kinds of eletronic devices.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q26-Q31):

NEW QUESTION # 26
Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site where mandatory profiles are being used for all

users. Users need to maintain the different printer property settings that are available for their HDX sessions. The administrator has enabled the HDX Printer properties retention policy for the Site. Which setting could the administrator use for this environment?

- A. Do NOT retain printer properties
- B. Saved on the client device only
- C. Held in profile only if NOT saved on client
- D. Retained in user profile only

Answer: B

Explanation:
In environments using mandatory profiles, changes are discarded at logoff. To preserve user- specific printer property settings, the HDX Printer properties retention policy must be set to
"Saved on the client device only", ensuring the settings persist across sessions.

NEW QUESTION # 27
A Citrix Administrator is tasked with configuring Autoscale in an on-prem Citrix Virtual Apps and Desktops environment. However, when launching Citrix Studio and locating the Delivery Group, the option to Manage Autoscale is missing. What must the administrator do to enable and configure Autoscale using a GUI interface?

- A. Enable Autoscale using a GPO
- B. Use Citrix Web Studio instead of Citrix Studio
- C. use PowerShell to enable Autoscale
- D. Enable Autoscale using a Citrix Policy

Answer: B

Explanation:
Autoscale management is only available through Citrix Web Studio, not the traditional Citrix Studio console. To enable and configure Autoscale with a GUI, the administrator must use Web Studio.

NEW QUESTION # 28
Scenario: While using Citrix Studio to create a new Delivery Group, a Citrix Administrator does NOT see any machine catalogs listed, but does see an error message. The administrator successfully verified the presence of machine catalogs in the Machine Catalogs node of Citrix Studio. Which issue can cause this to happen?

- A. The administrator has insufficient permissions to create the Delivery Group.
- B. The Virtual Delivery Agent (VDA) version is lower than 7.15 LTSR.
- C. There are no unassigned machine catalog machines.
- D. No machine catalog machines have been started.

Answer: C

Explanation:
When creating a Delivery Group, Citrix Studio only displays machine catalogs that contain unassigned machines. If all machines in the catalog are already assigned, the catalog will not appear in the Delivery Group creation wizard, even though it is visible under the Machine Catalogs node.

NEW QUESTION # 29
After creating a new machine catalog, a Citrix Administrator notices that the Virtual Delivery Agent (VDA) machines fail to register. What could the administrator have done to cause this condition?

- A. Selected an invalid VM naming scheme in Citrix Studio
- B. Failed to take a VM snapshot prior to creating the catalog
- C. Failed to run the Citrix Health Assistant
- D. Selected an incompatible VDA functional level in Citrix Studio

Answer: D

Explanation:
If an incompatible VDA functional level is selected when creating the machine catalog, the VDA machines cannot register with the Delivery Controllers. The functional level must match or be supported by the installed VDA software version.

NEW QUESTION # 30
Which disk type will always be created for each virtual machine, when creating new virtual machines using Machine Creation Services (MCS)?

- A. Full-clone base disk
- B. Personal vDisk
- C. Identity disk
- D. Differencing (Diff) disk

Answer: C

NEW QUESTION # 31
......
