AZ-120試験の準備方法 | 有難いAZ-120合格受験記試験 | 最新のPlanning and Administering Microsoft Azure for SAP Workloads基礎問題集

Planning and Administering Microsoft Azure for SAP Workloads AZ-120は、技術的な精度の最高水準を高め、認定された主題と専門家のみを使用します。最新の正確なAZ-120試験トレントをクライアントに提供し、提供する質問と回答は実際の試験に基づいています。合格率が高く、約98%-100%であることをお約束します。また、AZ-120テストブレイクダウンは高いヒット率を高め、試験を刺激してAZ-120試験の準備を整えることができます。あなたの成功は、AZ-120試験問題に縛られています。

MicrosoftのAZ-120試験に合格することは、SAPアーキテクト、管理者、コンサルタントなど、さまざまな役割を持つプロフェッショナルにとってメリットがあります。この認定を取得することで、候補者はSAPワークロードのためのAzureリソースを実装および管理できる能力を示すことができ、キャリアアップや収益性の向上につながる可能性があります。さらに、この認定はAzureクラウドサービスの拡張性、セキュリティ、コスト効率を活用して、組織のSAP展開を改善するのに役立ちます。

Microsoft Planning and Administering Microsoft Azure for SAP Workloads 認定 AZ-120 試験問題 (Q90-Q95):

質問 # 90

Your company has an on-premises SAP environment.

Recently, the company split into two companies named Litware, inc and Contoso.Ltd. Litware retained the SAP environment.

Litware plans to export data that is relevant only to Contoso. The export will be 1.5 TB.

Contoso build a new SAP environment on Azure.

You need to recommend a solution for Litware to make the data available to Contoso in Azure. The solution must meet the following requirements:

Minimize the impact on the network.

Minimize the administrative effort for Litware.

What should you include in the recommendation.

- A. Azure import/Export service
- B. Azure Databox
- C. Azure Migrate
- D. Azure Site Recovery

正解: D

解説:

Topic 1, Litware, inc Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all question include on this exam in the time provided.

To answer the question included in a case study, you will need to reference information that is provided in the case study. Case studies might contain and other resources that provide information about the scenario that is describe in the case study. Each question is independent of the other question in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To Start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such the content requirements, existing environment, and problem statements, if the case study has an All Information tab, note that the information displayed its identical to the information displayed on the subsequence tabs. When you are ready to answer a question click the Question button to return to the question.

Overview

Litware, inc. is an international manufacturing company that has 3,000 employees.

Litware has two main offices. The offices are located in Miami, FL, and Madrid Spain.

Existing Environment

Infrastructure

Litware currently uses a third-party provider to host a datacenter in Miami and a disaster recovery datacenter in Chicago, it.

The network contains an Active Directory domain named litware.com.Litware has two third-party applications hosted in Azure.

Litware already implemented a site-to-site VPN connection between the on-premises network and Azure.

SAP Environment

Litware currently runs the following SAP products:

* Enhancement Pack 6 for SAP ERP Central Component 6.0 (SAP ECC 6.0)

* SAP Extended Warehouse Management (SAP EWM)

* SAP Business Warehouse (SAP BW)

* SAP NetWeaver Process Integration (PI)

* SAP Solution Manager

All users run on the Windows Server platform. All databases use Microsoft SQL Server. Currently, you have 20 production servers.

You have 30 non-production servers including five testing severs, five development servers, five quality assurance (QA) servers, and 15 pre=production servers.

Currently, all SAP applications are in the litware.com domain.

Problem Statements

The current version of SAP ECC has a transaction that, when run in batches overnight, tables eight hours to complete. You confirm that upgrading to SAP Business Suite on HANA will improve performance because of code changes and the SAP HANA database platform.

Litware is dissatisfied with the performance of its current hosted infrastructure vendor. Litware experienced several hardware failures and the vendor struggled to adequately its 24/7 business operation.

Business Goals

Litware identifies the following business goals:

- * Increase the performance of SAP ECC application by moving to SAP HANA. All other database will remain on SQL Server.
- * Move away from the current infrastructure vendor to increase the stability and availability of the SAP services.
- * Use the new Environment, Health and Safety (EH&S) in Recipe Management function.
- * Ensure that any migration activities can be completed within a 48-hour period during a weekend.

Planned Changes

Litware identifies the following planned changes:

- * Migrate SAP to Azure.
- * Upgrade and migrate SAP ECC to SAP business Suite on HANA Enhancement Pack 8.

Technical requirements

Litware identifies the following technical requirements:

- * Implement automated backups.
- * Support load testing during the migrate.
- * Identify opportunities to reduces costs during the migration.
- * Continue to use the Litware.com domain for all SAP landscapes.
- * Ensure that all SAP applications and databases are highly available.
- * Remove all SAP components from the on-premises network once the migrate is complete.
- * Minimize the purchase of additional SAP licenses. SAP HANA license were already purchased.
- * Ensure that SAP can provide technical support for all the SAP landscapes deployed to Azure.

質問 # 91

You are planning an SAP NetWeaver deployment on Azure. The database her will consist of Two Azure virtual machines that have Microsoft SQL Server 2017 installed. Each virtual machine will be deployed to a separate availability zone.

You need to perform the following:

- * Minimize network latency between the virtual machines.
- * Measure network latency between the virtual machines.

What should you do? To answer, select the appropriate options in the answer area.

正解:

解説:

see the explanation for below image:

Explanation:

Answer selected as in image below.

質問 # 92

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When you deploy two standalone SAP Web Dispatchers to separate clustered virtual machines, you must deploy a load balancer to make the solution highly available.	<input type="radio"/>	<input type="radio"/>
When you deploy Primary Application Server (PAS) and Additional Application Server (AAS) instances on separate virtual machines for SAP NetWeaver, you must deploy an Azure load balancer for high availability.	<input type="radio"/>	<input type="radio"/>
When using an availability group listener for SAP application connectivity to Microsoft SQL Server servers in different Azure regions, you must deploy a load balancer in front of the disaster recovery SQL Server virtual machine.	<input type="radio"/>	<input type="radio"/>

正解:

解説:
answer Area

Statements	Yes	No
When you deploy two standalone SAP Web Dispatchers to separate clustered virtual machines, you must deploy a load balancer to make the solution highly available.	<input type="radio"/>	<input checked="" type="radio"/>
When you deploy Primary Application Server (PAS) and Additional Application Server (AAS) instances on separate virtual machines for SAP NetWeaver, you must deploy an Azure load balancer for high availability.	<input checked="" type="radio"/>	<input type="radio"/>
When using an availability group listener for SAP application connectivity to Microsoft SQL Server servers in different Azure regions, you must deploy a load balancer in front of the disaster recovery SQL Server virtual machine.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Text, letter Description automatically generated

Statements	Yes	No
When you deploy two standalone SAP Web Dispatchers to separate clustered virtual machines, you must deploy a load balancer to make the solution highly available	<input type="radio"/>	<input checked="" type="radio"/>
When you deploy Primary Application Server (PAS) and Additional Application Server (AAS) instances on separate virtual machines for SAP NetWeaver, you must deploy an Azure load balancer for high availability	<input checked="" type="radio"/>	<input type="radio"/>
When using an availability group listener for SAP application connectivity to Microsoft SQL Server servers in different Azure regions, you must deploy a load balancer in front of the disaster recovery SQL Server virtual machine	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

Load balancers. Load balancers are used to distribute traffic to virtual machines in the application-tier subnet.

For high availability, use the built-in SAP Web Dispatcher, Azure Load Balancer, or network appliances. Your choice depends on the traffic type (like HTTP or SAP GUI) or the required network services, like Secure Sockets Layer (SSL) termination.

Box 2: Yes

Availability group listener SAP application SQL server load balancer disaster recovery

Box 3: Yes Reference:

質問 # 93

You have an on-premises SAP environment.

Backups are performed by using tape backups. There are 50 TB of backups.

A Windows file server has BMP images of checks used by SAP Finance. There are 9 TB of images.

You need to recommend a method to migrate the images and the tape backups to Azure. The solution must maintain continuous replication of the images.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

正解:

解説:

Explanation

Tape Backups - Azure Databox

File Server - Azure Storage Explorer

質問 # 94

You have an on-premises SAP NetWeaver-based ABAP deployment hosted on servers that run Windows Server or Linux.

You plan to migrate the deployment to Azure.

What will invalidate the existing NetWeaver ABAP licenses for each operating system once the servers are migrated to Azure? To answer, drag the appropriate actions to the correct operating systems. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

正解:

解説:

Explanation:

The screenshot shows an exam interface with two main sections: 'Actions' and 'Answer Area'. The 'Actions' section on the left contains five options, each with a double colon icon (⋮) and a text box: 'Changing the hostname assigned to the operating system', 'Deallocating the Azure virtual machine', 'Deleting the Azure virtual machine and recreating a new virtual machine that uses the same disks', 'Using the Redeploy option from the Azure Portal of the Azure virtual machine', and 'Replacing the primary NIC'. The 'Answer Area' on the right shows a question for 'Windows Server' with two possible answers: 'Deleting the Azure virtual machine and recreating a new virtual machine that uses the same disks' and 'Changing the hostname assigned to the operating system'. Below this, there is a question for 'Linux' with the answer 'Replacing the primary NIC'. A Microsoft logo is visible in the bottom right corner of the answer area.
