You can choose one or more versions according to your situation, and everything depends on your own preferences. And you will definitely love our PEGACPSA24V1 training materials.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q293-Q298):

NEW QUESTION # 293
Which UI component is best for displaying a list of cases in a tabular format?

- A. Work Queue Table
- B. Repeat Grid
- C. Dynamic Layout
- D. SLA Timer

Answer: B

Explanation:
A Repeat Grid is designed for displaying tabular data, such as case lists, transactions, or search results.
It allows users to sort, filter, and paginate data for better navigation. Dynamic layouts are more suitable for form-based designs, while SLA timers and work queue tables do not display lists dynamically.

NEW QUESTION # 294
Which rule type can be tested using a PegaUnit test case?

- A. Case Type
- B. Decision Table
- C. Work Queue
- D. SLA Escalation

Answer: B

Explanation:
A Decision Table can be tested using PegaUnit to verify whether business rules return expected results.
It allows automated validation of rule logic for multiple scenarios. This ensures that decisions are consistent, accurate, and free from errors. Decision Table tests improve business rule reliability.

NEW QUESTION # 295
Which Pega feature is used to automatically populate default values for a case?

- A. Decision Table
- B. Data Transform
- C. Case Dependency
- D. SLA Assignment

Answer: B

Explanation:
A Data Transform sets default values for case properties during creation or transitions. This ensures consistent data initialization without manual input. It is commonly used in defaulting customer preferences, assigning case priorities, or initializing date fields. Data Transforms enhance automation and reduce errors.

NEW QUESTION # 296
Which tool allows debugging issues related to data flow and property values?

- A. Work Queue Analyzer
- B. SLA Deadline Monitor
- C. Clipboard Tool
- D. Case Lifecycle Tracker

Answer: C

Explanation:
The Clipboard Tool provides a real-time view of application data and property values, helping developers debug incorrect data flow and assignments. This ensures that data is processed correctly. SLA monitors, work queues, and case trackers do not provide data debugging capabilities.

NEW QUESTION # 297
Which email feature in Pega allows automatic responses to inbound emails?

- A. Work Queue Processing
- B. Email Router

- C. SLA Trigger
- D. Email Listener

Answer: D

Explanation:
Email Listeners monitor incoming emails and trigger automatic responses or case creation. This enhances customer service operations by handling inquiries and requests efficiently. Email Listeners help businesses process large volumes of inbound messages. They improve response times and reduce manual intervention.

NEW QUESTION # 298

......
