

1Z0-931-25 New Test Materials | Updated 1Z0-931-25 CBT

P.S. Free 2026 Oracle 1Z0-931-25 dumps are available on Google Drive shared by Dumpleader: https://drive.google.com/open?id=1bWudb8AqDCB7c_pLC3Sfd7mmo5v7X9Xg

If you want to be a leader in some industry, you have to continuously expand your knowledge resource. Our Dumpleader always updates the exam dumps and the content of our exam software in order to ensure the 1Z0-931-25 exam software that you have are the latest and comprehensive version. No matter which process you are preparing for 1Z0-931-25 Exam, our exam software will be your best helper. As the collection and analysis of our 1Z0-931-25 exam materials are finished by our experienced and capable IT elite.

Our online staff is professionally trained and they have great knowledge on the 1Z0-931-25 study guide. So they can clearly understand your requirements and ideas and then help you make the right choices. When you have purchased our 1Z0-931-25 exam practice, but you do not know how to install it, we can also provide remote guidance to help you complete the installation. All in all, we will always be there to help you until you pass the 1Z0-931-25 Exam and get a certificate.

1Z0-931-25 New Test Materials & Oracle Updated 1Z0-931-25 CBT: Oracle Autonomous Database Cloud 2025 Professional Pass Success

All the 1Z0-931-25 training files of our company are designed by the experts and professors in the field. The quality of our study materials is guaranteed. According to the actual situation of all customers, we will make the suitable study plan for all customers. If you buy the 1Z0-931-25 learning dumps from our company, we can promise that you will get the professional training to help you pass your exam easily. By our professional training, you will pass your exam and get the related certification in the shortest time.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions

(Q97-Q102):

NEW QUESTION # 97

Which two statements are true about Data Insights?

- A. You can search for Data Insights against a base table or business model.
- B. Data Insights is available with on-premises deployments of Oracle Database.
- C. You can retrieve previously executed Data Insights searches.
- D. Data Insights is an additional priced option.

Answer: A,C

Explanation:

Full Detailed In-Depth Explanation:

A: True. Data Insights works with tables and business models in ADW.

B: False. Exclusive to Autonomous Database, not on-premises.

C: True. Search history is retrievable.

D: False. Included in ADW, not separately priced.

NEW QUESTION # 98

Which Autonomous Database Cloud Service ignores hints in SQL statements by default?

- A. Neither service ignores hints by default
- B. Autonomous Data Warehouse
- C. Both services ignore hints by default
- D. Autonomous Transaction Processing

Answer: B

Explanation:

Full Detailed In-Depth Explanation:

Oracle Autonomous Database offers two primary services: Autonomous Data Warehouse (ADW) and Autonomous Transaction Processing (ATP), each optimized for different workloads. SQL hints are directives embedded in SQL statements to influence the optimizer's execution plan. However, their handling differs between the services:

Autonomous Data Warehouse (ADW): ADW is designed for analytical workloads and data warehousing, where query performance is critical. To ensure optimal execution, ADW's optimizer relies heavily on its own statistics and algorithms, ignoring SQL hints by default. This behavior prevents user-provided hints from overriding the automated optimization strategies tailored for complex analytical queries.

Autonomous Transaction Processing (ATP): ATP targets transactional workloads (OLTP) and provides more flexibility. It does not ignore hints by default, allowing developers and DBAs to use hints to fine-tune query execution plans for specific transactional needs. Thus, only ADW ignores hints by default, making option C the correct answer. Options A and B are incorrect because ATP does not share ADW's default behavior, and option D incorrectly identifies ATP as the service that ignores hints.

NEW QUESTION # 99

You created an Autonomous Database without auto scaling. Which two ways can you enable auto scaling? (Choose two.)

- A. Shut down the instance, click Scale Up/Down and select the Auto Scaling checkbox, then restart the instance.
- B. Use a REST call to enable Auto Scaling.
- C. Click Scale Up/Down and select the Auto Scaling checkbox.
- D. Use a REST call to shut down the instance, then a second REST call to enable Auto Scaling, and a REST call to restart the instance.

Answer: B,C

Explanation:

Enabling auto scaling on an existing Autonomous Database can be done without unnecessary complexity:

Correct Answer (A): "Click Scale Up/Down and select the Auto Scaling checkbox" is the simplest GUI method. In the OCI Console, navigate to the database, select "Scale Up/Down," and enable the auto scaling option, allowing up to 3x the base OCPUs dynamically.

Correct Answer (C): "Use a REST call to enable Auto Scaling" leverages the OCI REST API to update the database configuration with the `isAutoScalingEnabled` parameter set to true. This is ideal for programmatic control.

Incorrect Options:

B: Shutting down the instance is unnecessary; auto scaling can be enabled while the database is running.

D: Multiple REST calls, including shutdown and restart, overcomplicate the process when a single API call suffices.

These methods ensure minimal disruption and efficient resource management.

NEW QUESTION # 100

Which set of options can be specified when defining the preferred maintenance schedule of the Exadata Infrastructure for Autonomous Database Dedicated?

- A. Week of the Quarter, Day of the Week, Start Hour
- B. Quarter of the Year, Month of the Quarter, Date of the Month, Start Hour
- **C. Month of the Quarter, Week of the Month, Day of the Week, Start Hour**
- D. Month of the Year, Week of the Month, Day of the Week, Start Hour

Answer: C

Explanation:

Defining a maintenance schedule for Dedicated Exadata Infrastructure allows customization:

Correct Answer (B): "Month of the Quarter, Week of the Month, Day of the Week, Start Hour" is the correct set. For example, you can specify "Month 2 of Q1, Week 3, Wednesday, 02:00 AM," aligning with quarterly planning while offering weekly and daily precision.

Incorrect Options:

A: "Quarter of the Year" and "Date of the Month" are less flexible than week-based options and not the standard format.

C: "Month of the Year" skips the quarterly structure used in dedicated maintenance.

D: Omits "Month of the Quarter," reducing granularity.

This flexibility minimizes disruption for dedicated deployments.

NEW QUESTION # 101

Which three of the following data sources are available when using the Data Load page on Database Actions?

- A. Backup files in block storage
- **B. Files in AWS S3 Storage**
- **C. Local Files**
- **D. Files in Oracle Cloud Storage**
- E. REST endpoints

Answer: B,C,D

Explanation:

Full Detailed In-Depth Explanation:

The Data Load page in Database Actions supports loading data from:

A . Local Files: True. Users can upload files from their local device.

B . Files in Oracle Cloud Storage: True. OCI Object Storage is a supported source.

C . REST endpoints: False. REST is not a direct data source for Data Load; it's used for programmatic access.

D . Files in AWS S3 Storage: True. Integration with AWS S3 is supported for cloud flexibility.

E . Backup files in block storage: False. Block storage backups are not accessible via Data Load.

A, B, and D are the correct options per Oracle's documentation.

NEW QUESTION # 102

.....

Actual Oracle Autonomous Database Cloud 2025 Professional (1Z0-931-25) dumps are designed to help applicants crack the Oracle 1Z0-931-25 test in a short time. There are dozens of websites that offer 1Z0-931-25 exam questions. But all of them are not trustworthy. Some of these platforms may provide you with Oracle Autonomous Database Cloud 2025 Professional (1Z0-931-25) invalid dumps. Upon using outdated Oracle 1Z0-931-25 dumps you fail in the Oracle Autonomous Database Cloud 2025
