One of the significant advantages of our GH-100 Exam Material is that you can spend less time to pass the exam. People are engaged in modern society. So our goal is to achieve the best learning effect in the shortest time.

### Microsoft GitHub Administration Sample Questions (Q38-Q43):

#### NEW QUESTION # 38

What is a key characteristic of GitHub Enterprise Server (GHES) compared to GitHub Enterprise Cloud (GHEC)?

- A. GHES allows enterprises to have complete control over their hosting environment, including data storage and network security policies.
- B. GHES users cannot integrate with external identity providers for authentication.
- C. GHES is hosted by GitHub and offers automatic scaling, while GHEC requires self-hosting.
- D. GHEC offers data residency options in regions that GHES does not support.

**Answer: A**

Explanation:

GitHub Enterprise Server is a self-hosted product you install and manage on your own infrastructure - giving you full control over data storage, network security policies, and the underlying environment.

#### NEW QUESTION # 39

What will happen if Dependabot discovers a vulnerable transitive dependency in a repository?

- A. It creates a pull request to update the direct dependency to a version that resolves the vulnerability.
- B. It opens a pull request to update the affected package directly, regardless of version compatibility.
- C. It sends an email to the repository owner but does not alter code.
- D. It automatically removes the package from the repository.

**Answer: A**

Explanation:

Dependabot will automatically open a pull request that updates the direct dependency to a version which, in turn, resolves (or removes) the vulnerable transitive dependency - ensuring the fix is applied via your declared dependencies.

#### NEW QUESTION # 40

What do you need to successfully generate a support bundle on a GitHub Enterprise Server?

- A. A GitHub App with read:org permissions

- B. Approval from GitHub Support
- C. A custom GitHub Action in the root repo
- **D. Administrator SSH access to the appliance**

**Answer: D**

Explanation:

You must have administrator-level SSH access to the GitHub Enterprise Server appliance so you can run the `ghe-support-bundle` command over SSH and capture the bundle locally.

#### NEW QUESTION # 41

When comparing Group SCIM to Team Sync for identity management in GitHub Enterprise, which statement is Correct?

- **A. Group SCIM enables centralized user and group management through the IdP.**
- B. Team Sync supports more identity providers than Group SCIM.
- C. Team Sync provides more automated user deprovisioning than Group SCIM.
- D. Group SCIM requires less initial configuration than Team Sync.

**Answer: A**

Explanation:

GroupSCIM lets you manage both user accounts and group memberships centrally in your identity provider - automatically provisioning, updating, and deprovisioning users and groups in GitHub - whereas TeamSync only mirrors IdP group membership into existing GitHub teams.

#### NEW QUESTION # 42

An organization wants to share a single API key required for their Actions workflows. They need to restrict its use to only a subset of repositories. Where should they configure the secrets to minimize maintenance?

- A. Repository secrets
- **B. Organization secrets**
- C. Development environment secrets
- D. Environment secrets

**Answer: B**

Explanation:

By defining the API key as an organization secret, you centralize management and can grant access only to the subset of repositories you choose - eliminating per-repo duplication while enforcing the desired scope.

#### NEW QUESTION # 43

.....

Our GitHub Administration torrent prep can apply to any learner whether students or working staff, novices or practitioners with years of experience. To simplify complex concepts and add examples, simulations, and diagrams to explain anything that might be difficult to understand, studies can easily navigate learning and become the master of learning.
