GICSP Prep Guide, GICSP Valid Exam Objectives

The content system of GICSP exam simulation is constructed by experts. After-sales service of our study materials is also provided by professionals. If you encounter some problems when using our GICSP study materials, you can also get them at any time. After you choose GICSP Preparation questions, professional services will enable you to use it in the way that suits you best, truly making the best use of it, and bringing you the best learning results.

GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q82-Q87):

NEW QUESTION # 82

Which of the following is a key responsibility of ICS operators?

Response:

- A. Managing the corporate network
- B. Ensuring the physical processes remain operational
- C. Managing user access to cloud resources
- D. Designing enterprise-level software

Answer: B

NEW QUESTION # 83

What is a best practice for securing Windows endpoints in an ICS environment?

Response:

- A. Running applications with full administrative privileges
- B. Disabling all security features to increase speed

- C. Using Group Policies to enforce security settings
- D. Enabling automatic login for users

Answer: C

NEW QUESTION # 84

How can virtualization be leveraged in an ICS environment?

- A. Increasing processing speed
- B. Increasing networking speed
- C. Sharing hardware resources across security levels
- D. Testing new patches

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Virtualization allows ICS administrators to test new patches or software updates (B) in a controlled, isolated environment before deploying them on production systems. This minimizes operational risk and downtime.

Virtualization does not inherently increase networking speed (A) or processing speed (D).

Sharing hardware resources across different security levels (C) is generally discouraged due to security risks.

GICSP highlights virtualization as a valuable tool for safe testing and development in ICS environments.
