# Pass Guaranteed Quiz 2026 CloudSec-Pro: Perfect Palo Alto Networks Cloud Security Professional Actual Test Answers

Everyone has a utopian dream in own heart. Dreams of imaginary make people feel disheartened. In fact, as long as you take the right approach, everything is possible. You can pass the Palo Alto Networks CloudSec-Pro Exam easily. Why? Because you have Exam4PDF's Palo Alto Networks CloudSec-Pro exam training materials. Exam4PDF's Palo Alto Networks CloudSec-Pro exam training materials are the best training materials for IT certification. It is famous for the most comprehensive and updated by the highest rate. It also can save time and effort. With it, you will pass the exam easily. If you pass the exam, you will have the self-confidence, with the confidence you will succeed.

Whereas the other two Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam questions formats are concerned both are the easy-to-use and compatible mock CloudSec-Pro exam that will give you a real-time environment for quick Palo Alto Networks Exams preparation. Now choose the right Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam questions format and start this career advancement journey.

Palo Alto Networks CloudSec-Pro Online Practice Test

Our clients can have our CloudSec-Pro exam questions quickly. The clients only need to choose the version of the product, fill in the

correct mails and pay for our CloudSec-Pro useful test guide. Then they will receive our mails in 5-10 minutes. Once the clients click on the links they can use our CloudSec-Pro Study Materials immediately. If the clients can't receive the mails they can contact our online customer service and they will help them solve the problem successfully. The purchase procedures are simple and the delivery of our CloudSec-Pro study tool is fast.

Palo Alto Networks Cloud Security Professional Sample Questions (Q214-Q219):

NEW QUESTION # 214
Which type of query is used for scanning Infrastructure as Code (laC) templates?

- A. JSON
- B. XML
- C. API
- D. RQL

Answer: A

Explanation:
https://www.paloaltonetworks.com/blog/prisma-cloud/cloud-iac-build-policies/

NEW QUESTION # 215
A Prisma Cloud Administrator needs to enable a Registry Scanning for a registry that stores Windows images.
Which of the following statement is correct regarding this process?

- A. They can deploy any type of container defender to scan this registry.
- B. A defender is not required to configure this type of registry scan.
- C. There are Windows host defenders deployed in your environment already. Therefore, they do not need to deploy any additional defenders.
- D. There are Windows host defenders deployed in your environment already.

Answer: D

Explanation:
When enabling Registry Scanning in Prisma Cloud for a registry that stores Windows images, it's important to note that Windows host defenders must be deployed in the environment to scan these images effectively. The Windows host defenders are specialized versions of the Prisma Cloud Defender that are designed to run on Windows operating systems. They provide the necessary functionality to scan Windows container images stored in registries, identifying vulnerabilities and ensuring the images comply with security policies before they are deployed. This requirement underscores the importance of having the appropriate Defender deployments that match the operating systems of the images being scanned.

NEW QUESTION # 216
Which two processes ensure that builds can function after a Console upgrade? (Choose two.)

- A. configuring build pipelines to download twistcli at the start of each build
- B. creating a new policy that allows older versions of twistcli to connect the Console
- C. allowing Jenkins to automatically update the plugin
- D. updating any build environments that have twistcli included to use the latest version

Answer: A,D

Explanation:
Ensuring that builds can function properly after a Console upgrade in Prisma Cloud involves strategies that maintain compatibility and functionality with the latest versions of the Prisma Cloud tools and services.
* Option B: Updating any build environments that have twistcli included to use the latest version is crucial because twistcli is Prisma Cloud's CLI tool used for scanning images, serverless functions, and IaC for vulnerabilities and compliance issues. Ensuring that twistcli is up to date in all build environments guarantees compatibility with the latest features and security definitions provided by Prisma Cloud, as well as ensures that any new or updated policies and checks are accurately enforced during the build process.
* Option C: Configuring build pipelines to download twistcli at the start of each build ensures that the most current version of twistcli

is used every time a build is initiated. This approach is beneficial in dynamic CI/CD environments where builds are frequent, and maintaining the latest security posture is critical. By downloading twistcli dynamically, teams can automatically adapt to any updates or changes introduced in the Prisma Cloud Console without manual intervention, ensuring seamless integration and continuous compliance with Prisma Cloud's security standards.

References:

Prisma Cloud Documentation: Emphasizes the importance of keeping security tools up to date and integrating them into CI/CD pipelines for continuous security.

Best Practices for Integrating Security Tools in CI/CD: Guides on how to effectively incorporate security scanning tools like twistcli into the CI/CD process to ensure builds are secure and compliant.

NEW QUESTION # 217

Which three serverless runtimes are supported by Prisma Cloud for vulnerability and compliance scans?

(Choose three.)

- A. Swift
- B. Node.js
- C. Java
- D. Python
- E. Dart

Answer: B,C,D

Explanation:

Prisma Cloud supports several serverless runtimes for vulnerability and compliance scans, including Python, Java, and Node.js. These runtimes are widely used in the development of serverless applications, which are designed to run in stateless compute containers that are event-triggered and fully managed by cloud services.

By providing vulnerability and compliance scans for these serverless runtimes, Prisma Cloud helps organizations identify and remediate security issues within their serverless applications, ensuring that they adhere to security best practices and compliance standards. This capability is crucial for maintaining the security and integrity of serverless architectures, where traditional security approaches may not be applicable.

NEW QUESTION # 218

When configuring SSO how many IdP providers can be enabled for all the cloud accounts monitored by Prisma Cloud?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

Prisma Cloud supports configuring Single Sign-On (SSO) with Identity Providers (IdPs) to streamline user authentication processes. However, for all the cloud accounts monitored by Prisma Cloud, only one IdP provider can be enabled at any given time. This limitation ensures a unified authentication mechanism across the platform, reducing complexity and potential security risks associated with managing multiple IdP configurations.

NEW QUESTION # 219

......

The language of our CloudSec-Pro study torrent is easy to be understood and the content has simplified the important information. Our product boosts the function to simulate the exam, the timing function and the self-learning and the self-assessment functions to make the learners master the CloudSec-Pro guide torrent easily and in a convenient way. Based on the plenty advantages of our product, you have little possibility to fail in the exam. We guarantee to you that we provide the best CloudSec-Pro study torrent to you and you can pass the exam with high possibility and also guarantee to you that if you fail in the exam unfortunately we will provide the fast and simple refund procedures.
