So our product is a good choice for you. Choose our CDIP learning materials, you will gain a lot and lay a solid foundation for success.

AHIMA Certified Documentation Integrity Practitioner Sample Questions (Q14-Q19):

NEW QUESTION # 14
Automated registration entries that generate erroneous patient identification-possibly leading to patient safety and quality of care issues, enabling fraudulent activity involving patient identity theft, or providing unjustified care for profit-is an example of a potential breach of:

- A. Documentation integrity
- B. Auditing integrity

- C. Patient identification and demographic accuracy
- D. Authorship integrity

Answer: C

Explanation:
Explanation
Patient identification and demographic accuracy is the process of ensuring that the patient's identity and personal information are correctly recorded and verified in the health record and other systems. A potential breach of this process could result in automated registration entries that generate erroneous patient identification, which could lead to patient safety and quality of care issues, enabling fraudulent activity involving patient identity theft, or providing unjustified care for profit2 Authorship integrity is the process of ensuring that the source and content of the health record are authentic, accurate, complete, and consistent. Documentation integrity is the process of ensuring that the health record reflects the patient's clinical status, treatment, and outcomes. Auditing integrity is the process of ensuring that the health record is reviewed and monitored for compliance, quality, and improvement purposes2

NEW QUESTION # 15
Identify the error in the following query:
This patient's echocardiogram showed an ejection fraction of 25%. The chest x-ray showed congestive heart failure (CHF). The patient was prescribed Lasix and an angiotensin-converting enzyme inhibitor (ACEI). Is this patient's CHF systolic?

- A. The query is leading.
- B. The query contains irrelevant information.
- C. The query does not contain clinical indicators.
- D. The query is unclear.

Answer: A

Explanation:
Explanation
A leading query is one that suggests a specific diagnosis, condition, or treatment to the provider, or implies that a certain response is desired or expected. A leading query can compromise the integrity and accuracy of the documentation and the coded data, and may also raise compliance and ethical issues. A query should be non-leading, meaning that it presents the facts from the health record without bias or influence, and allows the provider to use their clinical judgment to determine the appropriate response.
The query in the question is leading because it implies that the patient's CHF is systolic by asking a yes/no question that only offers one option. A non-leading query would ask an open-ended question that offers multiple options, such as "What type of CHF does this patient have?" or "Please specify the type of CHF:
systolic, diastolic, or combined."

NEW QUESTION # 16
An 86-year-old female is brought to the emergency department by her daughter. The patient complains of feeling tired, weak and excessive sleeping. The patient's daughter comments that patient's mental condition has not been the same. Lab results are unremarkable except for a sodium level of 119, a BUN of 22, and a creatinine of 1.35. The patient receives normal saline IV infusing at 100 cc/hr. The admitting diagnosis is weakness, altered mental status and dehydration. Which of the following queries is presented in an ethical manner thus avoiding potential fraud and/or compliance issues?

- A. Patient's sodium is 119 and she is on NS IV at 100 cc/hr, does patient have hyponatremia?
- B. Patient's sodium is 119 and she is on NS IV at 100 cc/hr, is this clinically significant? If so, please document a corresponding diagnosis related to this lab result.
- C. Patient is feeling tired, weak, sleeping a lot and has altered mental status. Sodium is 119 and she is on NS IV at 100 cc/hr. Is the altered mental status related to the sodium of 119?
- D. Patient is feeling tired, weak, sleeping a lot and has altered mental status. Sodium is 119 and she is on NS IV at 100 cc/hr, please clarify the clinical significance of the lab result.

Answer: D

NEW QUESTION # 17
The correct coding for insertion of a dialysis catheter into the right internal jugular vein with the tip ending in the cavoatrial junction is

- A. 05HP33Z Insertion of infusion device into right external jugular vein, percutaneous approach
- B. 02HV33Z Insertion of infusion device into superior vena cava, percutaneous approach
- C. 05HM33Z Insertion of infusion device into right internal jugular vein, percutaneous approach
- D. 02H633Z Insertion of infusion device into right atrium, percutaneous approach

Answer: C

Explanation:
Explanation
According to the ICD-10-PCS Reference Manual 2023, the insertion of a dialysis catheter into the right internal jugular vein with the tip ending in the cavoatrial junction is coded as follows1:
The first character 0 indicates the Medical and Surgical section.
The second character 5 indicates the Extracorporeal or Systemic Assistance and Performance root operation, which is defined as "Putting in or on a device that completely takes over a body function by extracorporeal means"1.
The third character H indicates the Central Vein body system, which includes the internal jugular vein1.
The fourth character M indicates the Infusion Device device value, which is defined as "A device that is inserted into a body part to deliver fluids or other substances to a body part or into the circulation"1.
The fifth character 3 indicates the Right Internal Jugular Vein body part value, which is the specific site of the procedure1.
The sixth character 3 indicates the Percutaneous approach, which is defined as "Entry, by puncture or minor incision, of instrumentation through the skin or mucous membrane and any other body layers necessary to reach and visualize the site of the procedure"1.
The seventh character Z indicates No Qualifier, which means there is no additional information necessary to complete the code1.
Therefore, the correct coding for insertion of a dialysis catheter into the right internal jugular vein with the tip ending in the cavoatrial junction is 05HM33Z.

NEW QUESTION # 18
Reviewing and analyzing physician query content on a regular basis

- A. assists in identifying gaps in skills and knowledge
- B. aids in discussion between physician and reviewer
- C. helps to calculate query response rate
- D. facilitates physician data collection

Answer: A

Explanation:
Explanation
Reviewing and analyzing physician query content on a regular basis assists in identifying gaps in skills and knowledge of the clinical documentation integrity practitioners (CDIPs) and the providers. By evaluating the quality, accuracy, appropriateness, and effectiveness of the queries, the CDIPs can identify areas of improvement, education, and feedback for themselves and the providers. Reviewing and analyzing physician query content can also help to ensure compliance with industry standards and best practices, as well as to monitor query outcomes and trends2 References: 1:
