Reliable 212-82 Dumps Ebook | 212-82 Latest Exam Forum

Now is the ideal time to prepare for and crack the 212-82 exam. To do this, you just need to enroll in the 212-82 examination and start preparation with top-notch and updated ECCouncil 212-82 actual exam dumps. All three formats of Certified Cybersecurity Technician 212-82 Practice Test are available with up to three months of free Certified Cybersecurity Technician exam questions updates, free demos, and a satisfaction guarantee. Just pay an affordable price and get 212-82 updated exam dumps.

ECCouncil Certified Cybersecurity Technician Sample Questions (Q36-Q41):

NEW QUESTION # 36

TechSolutions, a leading IT consultancy, has been contracted to overhaul the wireless network infrastructure for the city's public libraries. With thousands of users accessing the network daily, there is a critical need for robust encryption that can deter potential threats. TechSolutions must also consider the diverse range of devices used by library-goers and ensure backward compatibility. Which encryption mechanism would best suit this scenario?

- A. AES-CCMP (Advanced Encryption Standard with Counter Mode Cipher Block Chaining Message Authentication Code Protocol)
- B. WEP (Wired Equivalent Privacy)
- C. WPA3 (Wi-Fi Protected Access 3)
- D. TKIP (Temporal Key Integrity Protocol)

Answer: C

Explanation:

For TechSolutions to overhaul the wireless network infrastructure for the city's public libraries, WPA3 is the best choice due to the following reasons:

- * Security: WPA3 provides enhanced security over previous protocols like WPA2, offering stronger encryption mechanisms and protection against brute-force attacks.
- * Backward Compatibility: WPA3 ensures compatibility with devices supporting WPA2, making it suitable for diverse devices used by library-goers.
- * Features:
 - * Simultaneous Authentication of Equals (SAE): Enhances security during the handshake process.
 - * Forward Secrecy: Protects past communications even if the current encryption key is compromised.
 - * Improved Encryption: Uses AES-256 in Galois/Counter Mode (AES-GCM) for secure encryption.

NEW QUESTION # 37

Andre, a security professional, was tasked with segregating the employees' names, phone numbers, and credit card numbers before sharing the database with clients. For this purpose, he implemented a deidentification technique that can replace the critical information in database fields with special characters such as asterisks (*) and hashes (#).

Which of the following techniques was employed by Andre in the above scenario?

- A. Masking
- B. Bucketing
- C. Tokenization
- D. Hashing

Answer: A

NEW QUESTION # 38

Ashton is working as a security specialist in SoftEight Tech. He was instructed by the management to strengthen the Internet access policy. For this purpose, he implemented a type of Internet access policy that forbids everything and imposes strict restrictions on all company computers, whether it is system or network usage.

Identify the type of Internet access policy implemented by Ashton in the above scenario.

- A. Prudent policy
- B. Promiscuous policy
- C. Permissive policy
- D. Paranoid policy

Answer: D

Explanation:

The correct answer is A, as it identifies the type of Internet access policy implemented by Ashton in the above scenario. An Internet access policy is a set of rules and guidelines that defines how an organization's employees or members can use the Internet and what types of websites or services they can access. There are different types of Internet access policies, such as:

Paranoid policy: This type of policy forbids everything and imposes strict restrictions on all company computers, whether it is system or network usage. This policy is suitable for organizations that deal with highly sensitive or classified information and have a high level of security and compliance requirements.

Prudent policy: This type of policy allows some things and blocks others and imposes moderate restrictions on company computers, depending on the role and responsibility of the user. This policy is suitable for organizations that deal with confidential or proprietary information and have a medium level of security and compliance requirements.

Permissive policy: This type of policy allows most things and blocks few and imposes minimal restrictions on company computers, as long as the user does not violate any laws or regulations. This policy is suitable for organizations that deal with public or general information and have a low level of security and compliance requirements.

Promiscuous policy: This type of policy allows everything and blocks nothing and imposes no restrictions on company computers, regardless of the user's role or responsibility. This policy is suitable for organizations that have no security or compliance requirements and trust their employees or members to use the Internet responsibly.

In the above scenario, Ashton implemented a paranoid policy that forbids everything and imposes strict restrictions on all company computers, whether it is system or network usage. Option B is incorrect, as it does not identify the type of Internet access policy implemented by Ashton in the above scenario. A prudent policy allows some things and blocks others and imposes moderate

restrictions on company computers, depending on the role and responsibility of the user. In the above scenario, Ashton did not implement a prudent policy, but a paranoid policy. Option C is incorrect, as it does not identify the type of Internet access policy implemented by Ashton in the above scenario. A permissive policy allows most things and blocks few and imposes minimal restrictions on company computers, as long as the user does not violate any laws or regulations. In the above scenario, Ashton did not implement a permissive policy, but a paranoid policy. Option D is incorrect, as it does not identify the type of Internet access policy implemented by Ashton in the above scenario. A promiscuous policy allows everything and blocks nothing and imposes no restrictions on company computers, regardless of the user's role or responsibility. In the above scenario, Ashton did not implement a promiscuous policy, but a paranoid policy.

NEW QUESTION # 39

Walker, a security team member at an organization, was instructed to check if a deployed cloud service is working as expected. He performed an independent examination of cloud service controls to verify adherence to standards through a review of objective evidence. Further, Walker evaluated the services provided by the CSP regarding security controls, privacy impact, and performance.

Identify the role played by Walker in the above scenario.

- A. Cloud auditor
- B. Cloud consumer
- C. Cloud provider
- D. Cloud carrier

Answer: A

Explanation:

A cloud auditor is a role played by Walker in the above scenario. A cloud auditor is a third party who examines controls of cloud computing service providers. Cloud auditor performs an audit to verify compliance with the standards and expressed his opinion through a report⁸⁹. A cloud provider is an entity that provides cloud services, such as infrastructure, platform, or software, to cloud consumers¹⁰. A cloud carrier is an entity that provides connectivity and transport of cloud services between cloud providers and cloud consumers¹⁰. A cloud consumer is an entity that uses cloud services for its own purposes or on behalf of another entity

NEW QUESTION # 40

A government agency's confidential information is leaked to the public, causing significant embarrassment and damage to its reputation. The leaked data includes sensitive documents related to military operations and diplomatic communications. Considering the scenario, which threat actor group is typically employed by governments to penetrate and gather top-secret information from other government or military organizations?

- A. Criminal syndicates
- B. State-sponsored hackers
- C. Industrial spies
- D. Script Kiddies

Answer: B

NEW QUESTION # 41

.....

The more you practice with our 212-82 simulating exam, the more compelling you may feel. Even if you are lack of time, these 212-82 practice materials can speed up your pace of review. Our 212-82 guide questions are motivating materials especially suitable for those exam candidates who are eager to pass the exam with efficiency. And we can claim that with our 212-82 study braindumps for 20 to 30 hours, you will be bound to pass the exam.
