There are a lot of advantages of our SAFe-Agilist Study Materials, and then, I am going to introduce the special functions of our SAFe-Agilist study materials in detail to you. We are hopeful that you will like our products.

Scaled Agile Framework (SAFe) is a methodology used by organizations to scale agile practices across the enterprise. SAFe provides a set of guidelines that can be used to implement agile at scale, ensuring that all teams within the organization are aligned towards a common goal. The SAFe-Agilist certification is designed for individuals who are responsible for leading agile transformation initiatives within their organizations.

Scaled Agile SAFe-Agilist certification is an excellent way for professionals to demonstrate their knowledge and expertise in Agile methodology and the SAFe framework. SAFe 6 Agilist - Leading SAFe (SA) (6.0) certification is highly valued by organizations looking to implement Agile practices in their operations and can lead to higher salaries and career growth opportunities. If you're interested in pursuing a career in Agile methodology, the SAFe-Agilist Certification is an excellent place to start.

SAFe-Agilist Exam is designed to test the knowledge and skills of candidates in various areas such as Agile and Lean principles, SAFe principles, Agile Release Trains, and more.

Scaled Agile SAFe 6 Agilist - Leading SAFe (SA) (6.0) Sample Questions (Q51-Q56):

NEW QUESTION # 51

What is one of the dimensions of Lean-Agile Leadership?

- A. Mindset and principles

- B. Emotional intelligence
- C. Relentless improvement
- D. Support organizational change

Answer: A

Explanation:

Explanation

Mindset and principles is one of the dimensions of Lean-Agile Leadership. Lean-Agile Leadership is one of the core competencies of business agility in SAFe. Lean-Agile Leadership means exhibiting the behaviors that enable an organization to achieve business agility. Lean-Agile Leadership has three dimensions: mindset and principles; leading change; and developing people. Mindset and principles means adopting the values and principles of Lean thinking and Agile development, and applying them to lead others in achieving business agility. NEW QUESTION # 52

Which statement applies to uncommitted objectives?

- A. They are counted when calculating load
- B. They are extra things teams can do if they have time
- C. They are items the team has high confidence in
- D. They are included in the commitment

Answer: A

Explanation:

Explanation

Uncommitted objectives are counted when calculating load. Load is a measure of how much work a team can realistically accomplish in a PI. Load is calculated by adding up the story points of all the committed and uncommitted objectives of a team. Committed objectives are SMART goals that reflect the value that each team intends to deliver in a PI with high confidence. Uncommitted objectives are stretch goals that reflect additional value that each team may be able to deliver in a PI if they have extra capacity or time. Uncommitted objectives are not included in the commitment or the business value scoring, but they are included in the load to account for their potential impact on team capacity. References: PI Planning, Team PI Objectives

NEW QUESTION # 53

Why do Business Owners assign business value to team PI Objectives?

- A. To override the decisions made in WSJF prioritization
- B. To ensure the teams do not work on architectural Enablers
- C. To determine what the teams should work on first
- D. To empower teams to make decisions around work

Answer: D

Explanation:

The reason why business owners assign business value to team PI objectives is to empower teams to make decisions around work. Business value is a relative measure of the importance of a work item or an outcome to the business. Team PI objectives are SMART (Specific, Measurable, Achievable, Relevant, Time-bound) goals that reflect the value that each team intends to deliver in a PI. Business owners assign business value points to each team PI objective based on their alignment with the program vision and objectives. This helps teams prioritize their work, balance their capacity, negotiate dependencies, and make trade-offs based on value delivery. References: PI Planning, Business Owners

NEW QUESTION # 54

Which statement is true about batch size?

- A. Large batch sizes enable enough time for built-in quality
- B. Large batch sizes flow slower through the system
- C. Large batch sizes reduce bottlenecks
- D. Large batch sizes make it easier to prioritize items using WSJF

Answer: B

Explanation:

The SAFe Workbook emphasizes that:

"Large batch sizes increase variability... Small batches go through the system faster with lower variability." The workbook includes exercises demonstrating that smaller batch sizes reduce cycle time and increase predictability, while large batches slow flow and introduce delays.

NEW QUESTION # 55

During the PI Planning event, when are planning adjustments agreed upon?

- A. During Scrum of scrums
- B. During the draft plan review
- C. During the management review and problem-solving
- D. During breakout sessions

Answer: C
