

312-85 Latest Exam - 312-85 Reliable Exam Syllabus

EC-COUNCIL CTIA 312-85 CERTIFICATION SYLLABUS AND FREE SAMPLE QUESTIONS

EC-Council 312-85 Exam

EDUSUM.COM

The EC-Council 312-85 Exam is challenging and thorough preparation is essential for success. This exam study guide is designed to help you prepare for the CTIA certification exam.

P.S. Free & New 312-85 dumps are available on Google Drive shared by ITExamDownload: <https://drive.google.com/open?id=1YczfSmYGJ4g-kzA502-Qw07FK7LOGzh5>

Our 312-85 study guide is convenient for the clients to learn and they save a lot of time and energy for the clients. After the clients pay successfully for the 312-85 exam preparation materials they can immediately receive our products in the form of mails in 5-10 minutes and then click on the links to use our software to learn. The clients only need 20-30 hours to learn and then they can attend the 312-85 test. For those in-service office staff and the students who have to focus on their learning this is a good new because they have to commit themselves to the jobs and the learning and don't have enough time to prepare for the 312-85 test

ECCouncil 312-85 Exam is designed to test the candidate's knowledge and skills in various areas related to threat intelligence. 312-85 exam consists of 100 multiple-choice questions that need to be completed within 3 hours. 312-85 exam covers topics such as the collection and analysis of intelligence data, threat intelligence methodologies, and the use of threat intelligence tools and technologies. Candidates who pass the exam earn the CTIA certification, which demonstrates their expertise in the field of threat intelligence.

The CTIA certification is designed to provide professionals with a comprehensive understanding of the various types of cyber threats that exist and how to identify them. Certified Threat Intelligence Analyst certification also covers various techniques for analyzing and interpreting data to identify potential threats. This knowledge is crucial for professionals who are responsible for safeguarding their organization's critical information and data assets.

ECCouncil, the organization that offers the CTIA certification, is a respected authority in the field of cybersecurity. It is known for its rigorous certification programs that are designed to meet the needs of both individuals and organizations. The ECCouncil is recognized by employers around the world as a trusted source for cybersecurity certifications.

ITExamDownload provide you the product with high quality and reliability. You can free download online part of ITExamDownload's providing practice questions and answers about the ECCouncil Certification 312-85 Exam as a try. After your trail I believe you will be very satisfied with our product. Such a good product which can help you pass the exam successfully, what are you waiting for? Please add it to your shopping cart.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q12-Q17):

NEW QUESTION # 12

Jame, a professional hacker, is trying to hack the confidential information of a target organization. He identified the vulnerabilities in the target system and created a tailored deliverable malicious payload using an exploit and a backdoor to send it to the victim. Which of the following phases of cyber kill chain methodology is Jame executing?

- A. Reconnaissance
- B. Exploitation
- **C. Weaponization**
- D. Installation

Answer: C

Explanation:

In the cyber kill chain methodology, the phase where Jame is creating a tailored malicious deliverable that includes an exploit and a backdoor is known as 'Weaponization'. During this phase, the attacker prepares by coupling a payload, such as a virus or worm, with an exploit into a deliverable format, intending to compromise the target's system. This step follows the initial 'Reconnaissance' phase, where the attacker gathers information on the target, and precedes the 'Delivery' phase, where the weaponized bundle is transmitted to the target. Weaponization involves the preparation of the malware to exploit the identified vulnerabilities in the target system.

NEW QUESTION # 13

In a team of threat analysts, two individuals were competing over projecting their own hypotheses on a given malware. However, to find logical proofs to confirm their hypotheses, the threat intelligence manager used a de-biasing strategy that involves learning strategic decision making in the circumstances comprising multistep interactions with numerous representatives, either having or without any perfect relevant information.

Which of the following de-biasing strategies the threat intelligence manager used to confirm their hypotheses?

- A. Game theory
- **B. Decision theory**
- C. Machine learning
- D. Cognitive psychology

Answer: B

NEW QUESTION # 14

Alison, an analyst in an XYZ organization, wants to retrieve information about a company's website from the time of its inception as well as the removed information from the target website.

What should Alison do to get the information he needs.

- A. Alison should recover cached pages of the website from the Google search engine cache to extract the required website information.
- **B. Alison should use <https://archive.org> to extract the required website information.**
- C. Alison should use SmartWhois to extract the required website information.
- D. Alison should run the Web Data Extractor tool to extract the required website information.

Answer: B

Explanation:

To retrieve historical information about a company's website, including content that may have been removed or altered, Alison should use the Internet Archive's Wayback Machine, accessible at <https://archive.org>. The Wayback Machine is a digital archive of the World Wide Web and other information on the Internet, providing free access to snapshots of websites at various points in time. This tool is invaluable for researchers and analysts looking to understand the evolution of a website or recover lost information. References:

* "Digital Forensics with the Archive's Wayback Machine," by Jeff Kaplan, Internet Archive

NEW QUESTION # 15

Karry, a threat analyst at an XYZ organization, is performing threat intelligence analysis. During the data collection phase, he used a data collection method that involves no participants and is purely based on analysis and observation of activities and processes going on within the local boundaries of the organization.

Identify the type data collection method used by the Karry.

- A. Raw data collection
- **B. Passive data collection**
- C. Active data collection
- D. Exploited data collection

Answer: B

NEW QUESTION # 16

In a team of threat analysts, two individuals were competing over projecting their own hypotheses on a given malware. However, to find logical proofs to confirm their hypotheses, the threat intelligence manager used a de-biasing strategy that involves learning strategic decision making in the circumstances comprising multistep interactions with numerous representatives, either having or without any perfect relevant information.

Which of the following de-biasing strategies the threat intelligence manager used to confirm their hypotheses?

- A. Decision theory
- **B. Game theory**
- C. Machine learning
- D. Cognitive psychology

Answer: B

Explanation:

Game theory is a mathematical framework designed for understanding strategic situations where individuals' or groups' outcomes depend on their choices and the choices of others. In the context of threat intelligence analysis, game theory can be used as a de-biasing strategy to help understand and predict the actions of adversaries and defenders. By considering the various strategies and potential outcomes in a 'game' where each player's payoff is affected by the actions of others, analysts can overcome their biases and evaluate hypotheses more objectively. This approach is particularly useful in scenarios involving multiple actors with different goals and incomplete information. References:

* "Game Theory and Its Applications in Cybersecurity" in the International Journal of Computer Science and Information Security
