Salesforce Certified Business Analyst Exam Sample Questions (Q188-Q193):

NEW QUESTION # 188

The executive director of Universal Containers (UC) plans to purchase additional Salesforce licenses. The director recently hired a business analyst (BA) to lead a series of journey mapping sessions. The director wants the Journey mapping sessions to be tailored to the features and capabilities that are currently available in UC's Salesforce environment.

Which information does the BA need to determine the features and functionality UC can implement while avoiding additional costs?

- **A. Organization edition and license type**
- B. Storage capacity and license type
- C. Number of active users and license type

Answer: A

Explanation:

Explanation

This answer states that organization edition and license type are the information that the BA needs to determine the features and functionality that UC can implement without additional costs for purchasing additional Salesforce licenses. Organization edition is a version of Salesforce that provides a set of features and functionality based on the needs and size of an organization, such as Essentials, Professional, Enterprise, Unlimited, etc. License type is a category of user access that determines what features and functionality a user can access within an organization, such as Salesforce Platform, Salesforce, Customer Community Plus, etc. Organization edition and license type are the information that the BA needs to determine the features and functionality that UC can implement without additional costs because they define the limits and capabilities of UC's Salesforce environment, and they affect the pricing and availability of additional licenses.

NEW QUESTION # 189

Sales managers at Northern Trail Outfitters (NTO) have received feedback from sales reps that record pages are slow and often take longer to load when using the app on the phone. The business analyst (BA) has been asked to evaluate NTO's org to find out which pages are the slowest to load when using the app on the phone.

What is the first step the BA should take to help resolve the issue?

- **A. Use performance analyzer to view the assessment.**
- B. Confirm steps to reproduce the issue.
- C. Create a new page layout for the phone.

Answer: A

NEW QUESTION # 190

The business analysis (BA) at Northern Trail Outfitters is assigned to a project to help revamp its Experience Cloud implementation. When assessing the existing process, which type of diagram should the BA use to identify waste within and between processes?

- A. Detailed Process Map
- **B. Value Stream Map**
- C. Suppliers, Inputs, Process, Outputs, Customers (SIPOC) Map

Answer: B

Explanation:

The type of diagram that business analyst should use to identify waste within and between processes when assessing existing processes for Northern Trail Outfitters' Service Cloud implementation is value stream map.

A value stream map is diagram that shows flow of materials information value-added non-value-added activities cycle times wait times involved in process value stream map can help identify waste inefficiencies opportunities improvement within between processes by highlighting where time resources being wasted where value being added where bottlenecks occurring etc.

A Suppliers Inputs Process Outputs Customers (SIPOC) Map is not type diagram that business analyst should use identify waste within between processes when assessing existing processes for Northern Trail Outfitters' Service Cloud implementation SIPOC Map high-level process map shows key elements process such suppliers inputs outputs customers SIPOC Map can help define scope boundaries project identifying what triggers process what are inputs outputs process who are involved affected by process what are expectations requirements process SIPOC Map does not help identify waste within between processes detail.

A detailed process map is not type diagram that business analyst should use identify waste within between processes when assessing existing processes for Northern Trail Outfitters' Service Cloud implementation detailed process map diagram shows steps activities

decisions involved in process detailed process map can help document existing processes clear concise way can easily understand anyone involved project but does not help identify waste within between processes detail.

NEW QUESTION # 191

The project team at Universal Containers has started to review the existing Salesforce manufacturing solution that has low adoption and a variety of customization including custom objects, custom fields, renamed standard fields.

What should the business analyst recommend to the project team to increase understanding when documenting requirements, process and potential solutions?

- A. Use industry terminology and language.
- **B. Use Salesforce terminology and language.**
- C. Use customer terminology and language.

Answer: B

Explanation:

This answer states that using Salesforce terminology and language is what the BA should recommend to the project team to increase understanding when documenting requirements, process and potential solutions for reviewing the existing Salesforce manufacturing solution that has low adoption and a variety of customization including custom objects, custom fields, renamed standard fields. Salesforce terminology and language are the words and phrases that are commonly used in the Salesforce ecosystem, such as objects, fields, records, apps, tabs, profiles, roles, etc. Using Salesforce terminology and language can help the BA to communicate and document the requirements, process and potential solutions in a consistent and accurate way, and avoid confusion or misunderstanding among the project team members who are familiar with Salesforce.

NEW QUESTION # 192

Universal Containers (UC) uses a Salesforce org. UC is merging with a sister company that uses a different CRM. The incoming sales team is reluctant to change to a different process. The business analyst (BA) has been asked to help reach consensus and drive adoption.

Which group is well positioned to help the BA secure alignment for the initiative?

- **A. Power users and top sales earners**
- B. System admin and project manager
- C. Executive sponsors and sales leadership

Answer: A

Explanation:

This answer identifies executive sponsors and sales leadership as the group that is well positioned to help the BA secure alignment for the initiative. Executive sponsors and sales leadership are key stakeholders who have the authority, influence, and interest in the project. They can help the BA communicate the vision, benefits, and expectations of the new process, and address any resistance or concerns from the incoming sales team.
