Salesforce Certified Experience Cloud Consultant Sample Questions (Q160-Q165):

NEW QUESTION # 160

Northern Trail Outfitters (NTO) would like to create a public Knowledge base for the general public to be able to view articles, manuals, and FAQs.

Which template should NTO select when building its site?

- A. Partner Central
- B. Help Center
- C. Customer Account Portal
- D. Customer Service

Answer: C

NEW QUESTION # 161

The Universal Containers Experience Cloud admin needs to move a site from one production org to another production org that it is not directly connected to.

What is the recommended choice for moving the site from one org to the other?

- A. Publication via Experience Builder
- B. Deployment via Metadata API
- C. Deployment via Change Set
- **D. Lightning Bolt Export and Installation**

Answer: D

Explanation:

To move a site from one production org to another production org that is not directly connected, UC should use Lightning Bolt Export and Installation. Lightning Bolt is a feature that allows UC to export a site as a package that contains the site template, theme, pages, components, and content. UC can then install the package in another org using the AppExchange or a URL link.

NEW QUESTION # 162

Ursa Major Solar (UMS) would like to render a header and footer from an external content management system into its customer portal.

Which feature should UMS use to accomplish this?

- A. Developer Console
- B. Rich Content Editor
- C. Compact Header Properties
- **D. CMS Connect**

Answer: D

Explanation:

CMS Connect allows you to display content from an external content management system (CMS) in your Experience Cloud site. You can use CMS Connect to render a header and footer from your CMS in your site, as well as other content types such as articles, banners, or images.

NEW QUESTION # 163

The system administrator at Get Cloudy Consulting is trying to import Customer Portal users to the newly created Experience Cloud. However, the import failed.

What could be two reasons for this failure?

Choose 2 answers

- A. User records are missing. Penal & Pep ore
- **B. Contact records have not been created.**
- C. The portal profile record has not been created.
- **D. The portal role record has not been created.**

Answer: B,D

Explanation:

Two reasons for the import failure are A and D. To import Customer Portal users to the Experience Cloud, you need to have a portal role record and a contact record for each user. A portal role record is a record that defines the role of a portal user in the portal hierarchy. A contact record is a record that contains the personal information of a portal user, such as name, email, phone, etc. If these records are missing, the import will fail.
