使用NS0-528參考資料意味著你已經通過Implementation Engineer - Data Protection Exam的一半

PDFExamDumps不僅可以成就你的夢想，而且還會為你提供一年的免費更新和售後服務。PDFExamDumps給你提供的練習題的答案是100%正確的，可以幫助你通過Network Appliance NS0-528的認證考試的。你可以在網上免費下載PDFExamDumps為你提供的部分Network Appliance NS0-528的認證考試的練習題和答案作為嘗試。

Network Appliance NS0-528 考試大綱：

主題	簡介
主題 1	NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.
主題 2	Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.

主題 3	NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
主題 4	NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.
主題 5	Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.

最新的 NCIE-Data-Protection NS0-528 免費考試真題 (Q200-Q205):

問題 #200

Click the Exhibit button on the right.

You have an AFF A300 controller with four volumes in the aggregate that is shown in the exhibit. You replicate all four volumes to one aggregate on a FAS8200 controller in a different cluster.

Referring to the exhibit, what are the storage efficiency savings on the destination FAS8200?

- A. 5.78:1
- B. 4.28:1
- C. 1.5:1
- D. 2:1

答案: A

問題 #201

You have a network outage that affects client access to site A. You need to temporarily reverse the SnapMirror relationship of a volume to serve data from site B.

Which two steps must you perform first? (Choose two.)

- A. Break the SnapMirror relationship.
- B. Delete the SnapMirror relationship.
- C. Take the source volume offline.
- D. Abort the SnapMirror relationship.

答案: A,C

問題 #202

You must determine if there have been any backup problems overnight.

Which two reports in OnCommand Unified Manager 6.2 would provide you with the required information? (Choose two.)

- A. On Command Job Events Details
- B. Unresolved Incidents and Risks area
- C. On Command Cluster Events Details
- D. On Command Unified Manager Dashboard

答案: A,D

問題 #203

You have recently installed and set up a new NetApp HCI deployment in your data center that consists of four compute nodes and four storage nodes. Inside this HCI deployment, you are using ONTAP Select for file services. You must protect the data inside the ONTAP Select VM in case of a rack failure.

Which two methods would accomplish this task? (Choose two.)

- A. Replicate the SVMs from inside the ONTAP Select VM to an existing ONTAP cluster using SVM D
- B. Using SolidFire real-time remote replication, replicate the hosting volumes to an ONTAP cluster.
- C. Enable FabricPools in the ONTAP Select instance.
- D. Replicate the volumes using SnapMirror from inside the ONTAP Select VM to an existing ONTAP cluster.

答案：A,B

問題 #204

A customer wants to replicate between their two NetApp ONTAP clusters but is concerned that replication traffic might slow down normal data traffic. They still have two unused network ports on every node. You recommend using dedicated ports for the Intercluster LIFs, and you are tasked with creating the Intercluster LIFs so that they are on dedicated ports at all times.

Which command must you use before creating InterCluster LIFs?

- A. network ipspace create -ip-space
- B. system services firewall policy create
- C. network interface failover-groups create
- D. network interface service-policy create

答案：D

解題說明：

To ensure Intercluster LIFs are bound to dedicated ports and used only for replication traffic, you must first create a service policy that defines the LIF's role (e.g., intercluster). The network interface service-policy create command allows you to specify that the LIF is intended strictly for intercluster services, ensuring it's isolated from data traffic.

問題 #205

.....

PDFExamDumps為每個需要通過Network Appliance的NS0-528考試認證的考生提供了一個明確和卓越的解決方案，我們為你提供Network Appliance的NS0-528考試詳細的問題及答案，我們團隊的IT專家是最有經驗和資格的，我們的考試測試題及答案幾乎和真實得考試一樣，做到這樣的確很了不起，更重要的是我們PDFExamDumps網站在全球範圍內執行這項考試培訓通過率最大。
