GAQM CASPO-001 (Certified Agile Scrum Product Owner) certification exam is a professional certification designed for individuals who want to validate their knowledge and skills in the Agile Scrum framework. It is ideal for professionals who work as product owners, project managers, business analysts, or anyone who is involved with Agile Scrum projects. CASPO certification provides the candidate with a globally recognized validation of their skills.

The CASPO-001 exam covers a wide range of topics such as Agile Scrum methodology, Product Owner roles and responsibilities, stakeholder management, product backlog management, agile requirements gathering, and product visioning. CASPO-001 exam is designed to test the candidate's ability to apply these concepts in real-world scenarios.

GAQM CASPO-001 Certification Exam is designed to test an individual's proficiency in Agile methodologies, Scrum practices, and product ownership. CASPO-001 exam covers various topics such as Agile principles and values, Scrum framework, product backlog management, stakeholder engagement, and product delivery. Passing the CASPO certification exam demonstrates an individual's ability to work as an Agile Scrum Product Owner and manage product development effectively. Certified Agile Scrum Product Owner (CASPO) certification also demonstrates an individual's commitment to professional development and continuous

learning in the field of Agile methodologies.

If you choose the online version of our CASPO-001 study materials, you can use our products by your any electronic equipment.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q12-Q17):

NEW QUESTION # 12

What two phrases best describe the relationship of the Product Owner and the Developers? (Choose the best two answers)

- A. They collaborate often so the Developers build Increments keeping end-user and stakeholder concerns in mind.
- B. They collaborate often so the Product Owner can make informed decisions in balancing effort and value of Product Backlog items.
- C. The Product Owner should be with the Developers full-time to grow a deep understanding of the technology being used.
- D. They should share no more than the Sprint Planning and the Sprint Review meeting.
- E. They should work apart as much as possible in order to keep the concerns of business and technology separated.

Answer: A,B

Explanation:

The Product Owner and Developers must collaborate closely to maximize value, as per the Scrum Guide.

* B: Collaboration enables the Product Owner to balance effort (Developer input) and value (their priority), aligning with: "The Product Owner may influence the Developers by helping them understand and select trade-offs."

* D: Frequent collaboration ensures the Developers understand stakeholder needs, supporting the creation of a valuable Increment: "The Developers are required to conform to the Definition of Done and to deliver an Increment that meets the Sprint Goal."

* A: Separation contradicts Scrum's emphasis on teamwork; the Scrum Team is cohesive, not siloed.

* C: Full-time co-location isn't required; the Product Owner focuses on value, not technical mastery.

NEW QUESTION # 13

Who creates the Definition of "Done"? (Choose the best answer)

- A. The Product Owner as he/she is responsible for the product's success
- B. The development organization (or Scrum Team if none is available from the development organization)
- C. The Scrum Team, in a collaborative effort where the result is the common denominator of all members' definitions
- D. The Scrum Master as he/she is responsible for the Developers' productivity

Answer: B

Explanation:

The Definition of "Done" is a shared standard, often set by the organization, but defaults to the Scrum Team if no broader standard exists. The Scrum Guide states: "If the Definition of Done for an increment is part of the conventions, standards, or guidelines of the development organization, all Scrum Teams must follow it as a minimum. If it is not an organizational standard, the Scrum Team must create a Definition of Done appropriate for the product."

* A: Correct-organizational standards take precedence, otherwise the Scrum Team defines it.

* B: Collaboration occurs, but it's not just a "common denominator."

NEW QUESTION # 14

The Product Owner is accountable for the functionality included in each Increment. Does he or she have the final say over the definition of "Done"?

- A. No, the Scrum Team is responsible for the definition of "Done". The Product Owner may be consulted.
- B. Yes, the Product Owner is responsible for the definition of "Done". The Developers may be consulted.

Answer: A

Explanation:

The Scrum Guide clarifies that the definition of "Done" is a shared commitment created by the Scrum Team:

"The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product." While the Product Owner defines what goes into the Increment (via the Product Backlog), the definition of "Done" is a collaborative effort, often driven by the Developers' technical expertise and organizational standards, with input from the Product Owner on value and quality expectations.

Option A incorrectly gives the Product Owner sole authority, while B correctly reflects the team's collective responsibility, with the Product Owner as a contributor, not the final arbiter.

NEW QUESTION # 15

True or False: The Sprint Review is the only time at which stakeholder feedback is taken into account.

- A. True
- B. False

Answer: B

Explanation:

Stakeholder feedback isn't limited to the Sprint Review. The Scrum Guide encourages ongoing collaboration:

"The Product Owner is also accountable for effective Product Backlog management, which includes...

representing the needs of many stakeholders." Feedback can occur during refinement, informal discussions, or releases, not just the Sprint Review, which is a formal inspection point: "The Scrum Team presents the results of their work to key stakeholders."

* A: False-feedback is continuous.

NEW QUESTION # 16

What pre-conditions must be fulfilled in order to allow Sprint Planning to begin? (Choose the best answer)

- A. A clear and non-negotiable Sprint Goal
- B. Formal budget approval to conduct another Sprint
- C. Enough "Ready" Product Backlog to fill the Sprint
- D. A clear but negotiable business objective for the Sprint
- E. There are no such pre-conditions
- F. A fully refined Product Backlog

Answer: E

Explanation:

Scrum imposes no formal pre-conditions for Sprint Planning beyond the Sprint starting. The Scrum Guide states: "Sprint Planning initiates the Sprint by laying out the work to be performed for the Sprint."

* A: A fully refined backlog isn't required; refinement is ongoing.

* B: Budget approval isn't a Scrum concept.

* C, D: The Sprint Goal is defined during, not before, Sprint Planning.

* E: Some "Ready" items help, but it's not mandatory; planning can refine items.

NEW QUESTION # 17

.....

Do you want to choose a lifetime of mediocrity or become better and pursue your dreams? I believe you will have your own pursuit. Perhaps you do not know how to go better our CASPO-001 learning engine will give you some help. The choice is like if a person is at a fork, and which way to go depends on his own decision.
