PracticeTorrent makes your investment 100% secure when you purchase GitHub-Copilot practice exams. We guarantee your success in the GitHub-Copilot exam. Otherwise, our full refund policy will enable you to get your money back. The practice exams for GitHub Certification are prepared by the GitHub-Copilot subject experts who are well aware of the GitHub-Copilot exam syllabus requirements. Our Customer support team is 24/7 available that you can reach through email or Live Chat for any GitHub-Copilot exam preparation product related question.

## GitHub GitHub-Copilot Exam Syllabus Topics:

| Topic | Details |
| --- | --- |
| Topic 1 | • How GitHub Copilot Works and Handles Data: This section of the exam measures the skills of Data Security Specialists and DevOps Engineers and covers how GitHub Copilot processes data, handles code suggestions and manages privacy concerns. It explains the data pipeline for Copilot's suggestions, how it gathers context, and how prompts are processed through its AI model. The section also discusses the limitations of AI-generated code, the effects of historical data on suggestions, and the role of prompt crafting. Best practices for improving prompt effectiveness and optimizing AI-generated responses are included. |
| Topic 2 | • Prompt Engineering: This section of the exam measures skills of AI Engineers and Software Developers and covers the fundamentals of prompt engineering, including key principles, techniques, and best practices for generating high-quality outputs. It explains different prompting strategies such as zero-shot and few-shot prompting, how context influences AI-generated responses, and the role of structured prompts in guiding Copilot's behavior. It also discusses the prompt lifecycle and ways to enhance model performance through refined input instructions. |
| Topic 3 | • Testing with GitHub Copilot: This section of the exam measures skills of QA Engineers and Test Automation Specialists and covers AI-assisted testing methodologies, including the generation of unit tests, integration tests, and edge case detection. It explains how GitHub Copilot improves test effectiveness by suggesting relevant assertions and boilerplate test cases. The section also discusses privacy considerations, organizational code suggestion settings, and best practices for configuring GitHub Copilot's testing features. |
| Topic 4 | • Developer Use Cases for AI: This section of the exam measures skills of Full-Stack Developers and Cloud Engineers and covers how AI enhances developer productivity across various tasks such as learning new programming languages, debugging, writing documentation, and refactoring code. It discusses how GitHub Copilot integrates with the Software Development Lifecycle (SDLC) and its role in modernizing legacy applications. It also highlights the use of AI for personalized responses, sample data generation, and improving overall efficiency in software development. |

| Topic 5 | • Responsible AI: This section of the exam measures the skills of AI Ethics Analysts and AI Developers and covers the principles of responsible AI usage, the risks associated with AI, and the limitations of generative AI tools. It includes the importance of validating AI-generated outputs and operating AI systems responsibly. It also explores potential harms such as bias, privacy concerns, and fairness issues, along with methods to mitigate these risks. The ethical considerations of AI development and deployment are also discussed. |
|---|---|
| Topic 6 | • Privacy Fundamentals and Context Exclusions: This section of the exam measures skills of Cybersecurity Specialists and Compliance Officers and covers privacy safeguards and content exclusion settings in GitHub Copilot. It explains how Copilot can identify security vulnerabilities, suggest optimizations, and enforce secure coding practices. It also includes details on content ownership, data filtering mechanisms, and exclusion configurations. The section concludes with troubleshooting guidelines for managing context exclusions and ensuring compliance with organizational security policies. |

# Here's a Quick and Proven Way to Pass GitHub-Copilot Certification exam

GitHub GitHub-Copilot Exam Questions just focus on what is important and help you achieve your goal. With high-quality GitHub-Copilot guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember.

# GitHub CopilotCertification Exam Sample Questions (Q48-Q53):

**NEW QUESTION # 48**
How does GitHub Copilot Enterprise assist in code reviews during the pull request process? (Select two.)

- A. It automatically merges pull requests after an automated review.
- B. It can validate the accuracy of the changes in the pull request.
- C. It can answer questions about the changeset of the pull request.
- D. It generates a prose summary and a bulleted list of key changes for pull requests.

**Answer: C,D**

Explanation:
GitHub Copilot Enterprise assists in code reviews by generating summaries of pull requests and answering questions about the changes made.

**NEW QUESTION # 49**
Which of the following GitHub Copilot Business related activities can be tracked using the organization audit logs?

- A. Code suggestions made by GitHub Copilot
- B. Changes to content exclusion settings
- C. Suggestions blocked by duplication detection filtering
- D. Accepted chat suggestions

**Answer: B**

**NEW QUESTION # 50**
How can GitHub Copilot be limited when it comes to suggesting unit tests?

- A. GitHub Copilot can handle any complexity in code and automatically generate appropriate unit tests.
- B. GitHub Copilot's limitations in generating unit tests can vary based on the IDE version you are using.
- C. GitHub Copilot can generate all types of unit tests, including those for edge cases and complex integration scenarios.
- D. GitHub Copilot primarily suggests basic unit tests that focus on core functionalities, often requiring additional input from

developers for comprehensive coverage.

**Answer: D**

Explanation:
GitHub Copilot often suggests basic unit tests and may not cover all edge cases or complex integration scenarios, requiring developers to supplement its suggestions.

**NEW QUESTION # 51**
How can you use GitHub Copilot to get inline suggestions for refactoring your code? (Select two.)

- A. By running the gh copilot fix command.
- B. By highlighting the code you want to fix, right-clicking, and selecting "Refactor using GitHub Copilot."
- C. By highlighting the code you want to fix, right-clicking, and selecting "Fix using GitHub Copilot."
- D. By adding comments to your code and triggering a suggestion.
- E. By using the "/fix" command in GitHub Copilot in-line chat.

**Answer: B,D**

Explanation:
You can use GitHub Copilot for inline refactoring suggestions by adding comments to your code to trigger suggestions and by highlighting the code and selecting "Refactor using GitHub Copilot" from the context menu.

**NEW QUESTION # 52**
What is the correct way to access the audit log events for GitHub Copilot Business?

- A. Use the Audit log section in the organization's GitHub settings
- B. Navigate to the Security tab in the organization's GitHub settings
- C. Use the Code tab in the GitHub repository
- D. Navigate to the Insights tab in the repository settings

**Answer: A**

Explanation:
Audit log events for GitHub Copilot Business can be accessed through the Audit log section within the organization's GitHub settings. This log provides a record of activities related to Copilot usage and configuration.

**NEW QUESTION # 53**
......
