

# Databricks Databricks-Certified-Data-Engineer-Associate Exam | Databricks-Certified-Data-Engineer-Associate Latest Test Simulator - Supplying you best Download Databricks-Certified-Data-Engineer-Associate Demo

2026 Latest ITdumpsfree Databricks-Certified-Data-Engineer-Associate PDF Dumps and Databricks-Certified-Data-Engineer-Associate Exam Engine Free Share: <https://drive.google.com/open?id=1Tnz0jMUMxqe9lsR0k-QjTWm2VgqPwwF2>

When it comes to the practice material, many writers did not think of the diversity of needs from exam candidates, and this was inconvenient for them. However, our Databricks-Certified-Data-Engineer-Associate torrent prep respects your inclination and preference of practice materials. PDF version being legible to read and remember, support customers' printing request, and allow you to have a print and practice in papers. Software version of Databricks-Certified-Data-Engineer-Associate Exam Questions supports simulation test system. Remember this version support Windows system users only.

The ITdumpsfree are one of the high-in-demand and top-rated platforms that has been offering real, valid, and updated Databricks Certified Data Engineer Associate Exam (Databricks-Certified-Data-Engineer-Associate) practice test questions for many years. Over this long time period countless candidates have got success in their dream Databricks Certified Data Engineer Associate Exam (Databricks-Certified-Data-Engineer-Associate) certification exam. They all got help from Databricks Certified Data Engineer Associate Exam (Databricks-Certified-Data-Engineer-Associate) exam questions and easily crack the final Databricks Databricks-Certified-Data-Engineer-Associate exam.

## Download Databricks Databricks-Certified-Data-Engineer-Associate Demo - Databricks-Certified-Data-Engineer-Associate Reliable Exam Price

ITdumpsfree are stable and reliable exam questions provider for person who need them for their exam. We have been staying and growing in the market for a long time, and we will be here all the time, because the excellent quality and high pass rate of our Databricks-Certified-Data-Engineer-Associate Exam Questions. As for the safe environment and effective product, there are thousands of candidates are willing to choose our Databricks-Certified-Data-Engineer-Associate study question, why don't you have a try for our study question, never let you down!

## Databricks Certified Data Engineer Associate Exam Sample Questions (Q68-Q73):

### NEW QUESTION # 68

What is the primary function of the Silver layer in the Databricks medallion architecture?

- A. Validate, clean, and deduplicate data for further processing
- B. Ingest raw data in its original state
- C. Aggregate and enrich data for business analytics
- D. Store historical data solely for auditing purposes

**Answer: A**

#### NEW QUESTION # 69

An engineering manager wants to monitor the performance of a recent project using a Databricks SQL query. For the first week following the project's release, the manager wants the query results to be updated every minute. However, the manager is concerned that the compute resources used for the query will be left running and cost the organization a lot of money beyond the first week of the project's release.

Which of the following approaches can the engineering team use to ensure the query does not cost the organization any money beyond the first week of the project's release?

- A. They cannot ensure the query does not cost the organization money beyond the first week of the project's release.
- **B. They can set the query's refresh schedule to end on a certain date in the query scheduler.**
- C. They can set the query's refresh schedule to end after a certain number of refreshes.
- D. They can set a limit to the number of individuals that are able to manage the query's refresh schedule.
- E. They can set a limit to the number of DBUs that are consumed by the SQL Endpoint.

**Answer: B**

Explanation:

In Databricks SQL, you can use scheduled query executions to update your dashboards or enable routine alerts. By default, your queries do not have a schedule. To set the schedule, you can use the dropdown pickers to specify the frequency, period, starting time, and time zone. You can also choose to end the schedule on a certain date by selecting the End date checkbox and picking a date from the calendar. This way, you can ensure that the query does not run beyond the first week of the project's release and does not incur any additional cost. Option A is incorrect, as setting a limit to the number of DBUs does not stop the query from running. Option B is incorrect, as there is no option to end the schedule after a certain number of refreshes. Option C is incorrect, as there is a way to ensure the query does not cost the organization money beyond the first week of the project's release. Option D is incorrect, as setting a limit to the number of individuals who can manage the query's refresh schedule does not affect the query's execution or cost. Reference: Schedule a query, Schedule a query - Azure Databricks - Databricks SQL

#### NEW QUESTION # 70

A data engineer has configured a Structured Streaming job to read from a table, manipulate the data, and then perform a streaming write into a new table.

The code block used by the data engineer is below:

```
(spark.readStream
  .table("sales")
  .withColumn("avg_price", col("sales") / col("units"))
  .writeStream
  .option("checkpointLocation", checkpointPath)
  .outputMode("complete")
  ._____
  .table("new_sales")
)
```

If the data engineer only wants the query to process all of the available data in as many batches as required, which of the following lines of code should the data engineer use to fill in the blank?

- **A. trigger(availableNow=True)**
- B. trigger(processingTime="once")
- C. processingTime(1)
- D. trigger(parallelBatch=True)
- E. trigger(continuous="once")

**Answer: A**

Explanation:

Explanation:

<https://stackoverflow.com/questions/71061809/trigger-availablenow-for-delta-source-streaming-queries-in-pyspa>

### NEW QUESTION # 71

A data engineer wants to create a data entity from a couple of tables. The data entity must be used by other data engineers in other sessions. It also must be saved to a physical location.

Which of the following data entities should the data engineer create?

- A. Function
- B. Temporary view
- C. Database
- **D. Table**
- E. View

**Answer: D**

Explanation:

1: A table is a data entity that is stored in a physical location and can be accessed by other data engineers in other sessions. A table can be created from one or more tables using the CREATE TABLE or CREATE TABLE AS SELECT commands. A table can also be registered from an existing DataFrame using the spark.catalog.createTable method. A table can be queried using SQL or DataFrame APIs. A table can also be updated, deleted, or appended using the MERGE INTO command or the DeltaTable API.

Reference:

Create a table

Create a table from a query result

Register a table from a DataFrame

[Query a table]

[Update, delete, or merge into a table]

### NEW QUESTION # 72

Which of the following can be used to simplify and unify siloed data architectures that are specialized for specific use cases?

- A. Data lake
- **B. Data lakehouse**
- C. All of these
- D. None of these
- E. Data warehouse

**Answer: B**

Explanation:

A data lakehouse is a new paradigm that can be used to simplify and unify siloed data architectures that are specialized for specific use cases. A data lakehouse combines the best of both data lakes and data warehouses, providing a single platform that supports diverse data types, open standards, low-cost storage, high-performance queries, ACID transactions, schema enforcement, and governance. A data lakehouse enables data engineers to build reliable and scalable data pipelines that can serve various downstream applications and users, such as data science, machine learning, analytics, and reporting. A data lakehouse leverages the power of Delta Lake, a storage layer that brings reliability and performance to data lakes. References: What is a data lakehouse?, Delta Lake, Lakehouse: A New Generation of Open Platforms that Unify Data Warehousing and Advanced Analytics

### NEW QUESTION # 73

.....

What you can get from the Databricks-Certified-Data-Engineer-Associate certification? Of course, you can get a lot of opportunities to enter to the bigger companies. After you get more opportunities, you can make full use of your talents. You will also get more salary, and then you can provide a better life for yourself and your family. Databricks-Certified-Data-Engineer-Associate Exam Preparation is really good helper on your life path. Quickly purchase Databricks-Certified-Data-Engineer-Associate study guide and go to the top of your life!
