## Reliable Salesforce AP-223 Exam Labs | AP-223 Prep Guide

In fact, our AP-223 exam materials provide comprehensive customers service, and our commitment to users does not end at the point of sale. If you have any questions related to our AP-223 exam materials, you can always consult our customer service. Our customer service is 24 hours online and will answer your questions in the shortest possible time. Our AP-223 Exam Materials assure

you that we will provide the best service before you pass the AP-223 exam. ITEXamSimulator will never disappoint you. Therefore, you can prepare real AP-223 exams using the actual AP-223 exam questions. This is indeed a huge opportunity. Don't miss it!

## Salesforce CPQ and Billing Consultant Accredited Professional Sample Questions (Q107-Q112):

### NEW QUESTION # 107

An escalation on a Revenue Cloud Project happens, which role is primarily responsible for project success?

- A. Customer Success Manager
- B. Solution Architect
- C. Project Manager
- D. Developer
- E. Technical Architect

**Answer: C**

Explanation:

When an escalation occurs on a Revenue Cloud implementation, the question is:

Who is ultimately responsible for the success of the project?

While many roles contribute, the Project Manager (PM) is the one accountable for:

Scope

Budget

Timeline

Risk & issue management

Cross-team coordination

Customer communication

Driving escalations and resolutions

Salesforce project methodology is clear:

The Project Manager owns overall project success.

Why the other roles are not the primary accountable party:Role

Why Not Responsible for Overall Success

Technical Architect

Owens technical integrity, not project success.

Solution Architect

Owens functional solution design, not delivery metrics.

Developer

Executes tasks, not responsible for project outcome.

Customer Success Manager

Supports customer relationship but not delivery execution.

Thus, the correct answer is:

✓ B - Project Manager

### NEW QUESTION # 108

Universal Containers sell boxes based on size. Price for a specific product is based on the selection of length and width and height. which cpq pricing functionality should be used here?

- A. Price Rule with lookup table
- B. Discount Schedule
- C. Multi Dimensional Quoting
- D. Percent of total

**Answer: A**

Explanation:

This use case describes a three-dimensional pricing model where the price of a product is determined by length × width × height.

These values are user selections (likely stored on Quote Line fields), and CPQ must determine the correct price based on a matrix of dimensions.

Salesforce CPQ documentation identifies Lookup Tables used with Price Rules as the standard method for implementing matrix or multi-attribute pricing.

✓ Why Price Rule with Lookup Table is the correct answer  
Salesforce CPQ Lookup Tables allow you to store pricing data externally from the product record and return the correct price based on multiple inputs.

Lookup tables can key off of multiple dimensions, e.g.:

Length

Width

Height

A price rule performs the lookup at calculation time and sets:

List Price, or

Custom price field

Create custom fields on Quote Line:

Length\_\_c

Width\_\_c

Height\_\_c

Build a Lookup Table with key columns:

Length range

Width range

Height range

Resulting price

Build a Price Rule that uses:

Price Conditions → to map entered dimensions

Lookup Query → to fetch matching price

Price Action → to set the Quote Line's Unit Price

Relevant capabilities: Typical CPQ design for dimensional pricing: This is exactly the pattern Salesforce recommends for multi-attribute pricing.

Why the other options are incorrect

A. Percent of Total Used for:

Support fees

Add-on fees based on parent products Not for dimensional pricing.

B. Multi-Dimensional Quoting (MDQ) Used for:

Term-based pricing (Year 1, Year 2, Year 3)

Usage tiers over time

MDQ does not support 3-dimensional physical attributes.

C. Discount Schedule Supports:

Volume tiering

Quantity-based pricing

Does not support multi-attribute dimensional pricing.

### NEW QUESTION # 109

In Salesforce Revenue Cloud, a consultant is setting up a new user who will primarily be responsible for managing customer assets. What is a fundamental requirement to ensure this user can effectively view and manage customer assets?

- A. The Asset viewer must have a Salesforce CPQ Plus license assigned to access the Asset-related objects.
- B. The user must have the Customize Application permission enabled on their profile to view the Assets on Accounts.
- C. The products must be configured as assetizable, and the createOrUpdateAssetFromOrder flow action should be triggered.

Answer: C

### NEW QUESTION # 110

During User Acceptance Testing (UAT) a tester submits an incident because the Invoice total did not match the expected results. Which three types of Information should be Included In the description of the incident to facilitate a quick resolution?  
Choose 3 answers

- A. Determine if the expected result is not a request for new functionality.
- B. Adjust formula fields until the correct values match his expectations to provide an immediate fix
- C. Validate the tester is properly following the UAT plan and is trained
- D. Re-write the test case with a corrected expected result
- E. Investigate for root cause, if the design was implemented incorrectly then apply corrective action to resolve the defect.

Answer: A,C,E

### NEW QUESTION # 111

A new order is created with these details:

1. The account has a default Billing Profile with a billing address in San Francisco.
2. An order is created associated with this account with a billing address in New York.
3. The order has a billing account attached with a billing address in Chicago.

When billing processes the order, which city will be used?

- A. San Francisco
- **B. Chicago**
- C. New York

**Answer: B**

### NEW QUESTION # 112
