CheckPoint Check Point Certified Security Expert - R82 Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which Management Server Process receives an install command if it comes to install a policy?

- A. The CPWD process invokes the install function.

- B. The FWD process is involved in installing a policy.
- **C. The CPM process is involved in installing a policy to the gateway.**
- D. The FWM process is involved in installing the policy.

Answer: C

Explanation:

In R8x architecture, the Check Point Management process receives the policy installation request from SmartConsole and orchestrates the entire installation workflow, including preparation of the policy package and coordination with other processes for compilation and transfer to the gateway.

NEW QUESTION # 42

What is collision mode in Management HA?

- A. This situation is with two Management Servers - 1st set as Active, 2nd set as Standby
- B. This situation is with two Management Servers - 1st set as Standby, 2nd set as Standby
- **C. This situation is with two Management Servers - both set as Active**
- D. This situation is with three Management Servers - 1st set as Active, 2nd and 3rd set as Standby

Answer: C

Explanation:

Collision mode occurs when both Management Servers incorrectly assume the active role at the same time, resulting in two active servers, which creates a conflict and risks database inconsistency.

NEW QUESTION # 43

While enabling the Identity Awareness blade the Identity Awareness wizard does not automatically detect the windows domain. Why does it not detect the windows domain?

- A. Security Management Server is not part of the domain
- B. Identity Awareness is not enabled on Global properties
- **C. SmartConsole machine is not part of the domain**
- D. Security Gateway is not part of the Domain

Answer: C

NEW QUESTION # 44

When exporting the database, are the logs and indexes automatically exported?

- **A. no**
- B. yes
- C. logs are but not indexes
- D. indexes are but not logs

Answer: A

Explanation:

When exporting the Check Point database, neither logs nor their indexes are included automatically; they must be exported separately if needed for backup or migration purposes.

NEW QUESTION # 45

As part of the SmartEvent Initial Settings which option is not automatically configured initially and needs to be configured manually during the deployment?

- A. Offline Jobs
- B. SmartEvent Servers
- **C. Internal Networks**

- D. Correlation Units

Answer: C

Explanation:

Internal Networks must be defined manually during SmartEvent deployment because the system cannot automatically determine which networks are considered internal, and this information is required for accurate event correlation and traffic direction analysis.

NEW QUESTION # 46

.....

You can easily get CheckPoint 156-315.82 certified if you prepare with our CheckPoint 156-315.82 questions. Our product contains everything you need to ace the 156-315.82 certification exam and become a certified CheckPoint professional. So what are you waiting for? Purchase this updated CheckPoint 156-315.82 Exam Practice material today and start your journey to a shining career.

156-315.82 Test Engine Version: <https://www.fast2test.com/156-315.82-premium-file.html>

If you fail exam with our exam questions, you just need to send your 156-315.82 failure score scanned to our email address, we will full refund to you soon without any other doubt, CheckPoint 156-315.82 Certification It will also enable you to make a decision based on your own needs and will not regret, The user-friendly interface of the software enables you to prepare for the 156-315.82 Test Engine Version - Check Point Certified Security Expert - R82 exam quickly and to cover the entire syllabus in a systematic manner.
