Microsoft SC-401 Exam Overview:

Certification Vendor:	Microsoft
Exam Name:	Administering Information Security in Microsoft 365
Exam Number:	SC-401
Exam Duration:	100 minutes
Certificate Validity Period:	1 year (renewable via free online assessment)
Exam Price:	\$165 USD
Exam Format:	Drag and drop, Matching, Multiple choice, Case studies, Scenario-based questions
Real Exam Qty:	40–60
Related Certifications:	Microsoft Certified: Information Protection Administrator Associate Microsoft Certified: Security Administrator Associate
Passing Score:	700 (on a scale of 1000)
Available Languages:	English, Japanese, Spanish, Portuguese (Brazil), French, German, Chinese (Simplified)
Recommended Training:	Microsoft Learn: Administering Information Security in Microsoft 365 Learning Path
Exam Registration:	Microsoft Learn Exam Page Pearson VUE Registration
Sample Questions:	Microsoft SC-401 Sample Questions
Exam Way:	Online proctored (OnVUE) or in-person at Pearson VUE test centers
Pre Condition:	No mandatory prerequisites; recommended experience: working knowledge of Microsoft 365 services, PowerShell, Microsoft Entra ID, Microsoft Defender portal, and security concepts
Official Syllabus URL:	https://learn.microsoft.com/en-us/credentials/certifications/resources/study-guides/sc-401

Administering Information Security in Microsoft 365復習教材

Microsoft知ってほしいのは、人々が私たちの製造哲学の中心にいます。そのため、SC-401試験問題をより高度なものにする直感的な機能に重点を置いています。したがって、SC-401ガイドトレントを使用すると、SC-401試験に最も効率的かつ生産的な方法で簡単に合格し、献身と熱意を持って勉強する方法を学ぶことができます。Administering Information Security in Microsoft 365試験に合格して目標を達成するためのPassTest最良のツールでなければなりません。

Microsoft SC-401 認定試験の出題範囲：

トピック	出題範囲
トピック 1	情報保護の実装：このセクションでは、情報セキュリティアナリストがデータの分類と保護を行うスキルを評価します。機密情報の識別と管理、機密ラベルの作成と適用、Windows、ファイル共有、Exchangeの保護の実装を網羅します。受験者は、Microsoft Purviewを使用して、ドキュメントフィンガープリンティング、トレーニング可能な分類器、暗号化戦略を構成する必要があります。
トピック 2	データ損失防止と保持の実装：このセクションでは、データ保護責任者（DLP）のデータ損失防止（DLP）ポリシーと保持戦略の設計と管理能力を評価します。データセキュリティポリシーの設定、エンドポイントDLPの構成、保持ラベルとポリシーの管理などが含まれます。受験者は、Microsoft 365におけるアダプティブスコープ、ポリシーの優先順位、データ復旧について理解する必要があります。
トピック 3	AIサービスで使用するデータの保護：このセクションでは、AIガバナンススペシャリストがAI主導環境におけるデータセキュリティをどのように確保しているかを評価します。Microsoft Purviewのコントロール実装、AI向けデータセキュリティポスチャ管理（DSPM）の構成、コンプライアンスと保護を確保するためのAI関連のセキュリティリスクの監視などが含まれます。
トピック 4	リスク、アラート、アクティビティの管理：このセクションでは、セキュリティ運用アナリストのインサイダーリスク管理、アラートの監視、セキュリティアクティビティの調査能力を評価します。リスクポリシーの設定、フォレンジック証拠の取り扱い、Microsoft PurviewおよびDefenderツールを使用したアラートへの対応などが含まれます。また、監査ログの分析とセキュリティワークフローの管理も必要です。

Microsoft Administering Information Security in Microsoft 365 認定 SC-401 試験問題 (Q36-Q41):

質問 #36

You have a Microsoft 365 E5 subscription that contains a trainable classifier named Trainable1.

You plan to create the items shown in the following table.

Name	Type
Label1	Sensitivity label
Label2	Retention label
Policy1	Retention label policy
DLP1	Data loss prevention (DLP) policy

Which items can use Trainable 1?

- A. Label1 and Policy1 only
- B. Label1 and Label2 only
- C. Label2, Policy1, and DLP1 only
- D. Label2 only
- E. Label1, Label2, Policy1, and DLP1

正解：C

解説:

A trainable classifier in Microsoft Purview is used to automatically identify and classify unstructured data based on content patterns. The classifier can be used in:

1. Retention Labels (Label2) Supported

Trainable classifiers can be linked to retention labels to automatically classify and apply retention policies to documents.

2. Retention Label Policies (Policy1) Supported

Retention label policies define how and where retention labels are applied, including automatically using trainable classifiers.

3. Data Loss Prevention (DLP) Policies (DLP1) Supported

Trainable classifiers can be used in DLP policies to detect and protect sensitive content automatically.

質問 # 37

You have a Microsoft 365 E5 subscription that contains three users named User1, User2, and User3 and a file named File1.docx. You create a sensitivity label named Label1 as shown in the following exhibit.

Assign permissions to specific users and groups * ⓘ

Assign permissions

3 items

Users and groups	Permissions	Edit	Delete
User1@86s40q.onmicrosoft.com	Co-Author		
User2@86s40q.onmicrosoft.com	Review		
User3@86s40q.onmicrosoft.com	Viewer		

☐ Use dynamic watermarking ⓘ

☒ Use Double Key Encryption ⓘ

You apply Label1 to File1.

For which users can Microsoft 365 Copilot summarize File1?

- A. User1 only
- B. User1 and User2 only
- C. No user
- D. User1, User2, and User3

正解: A

解説:

When the sensitivity label applies encryption, the user must have the EXTRACT and VIEW usage rights for Copilot to summarize the data.

User1 - Yes

User1 is Co-Author.

Microsoft 365 co-authors typically have both view and extract permissions when working on documents collaboratively. Co-authors can view and edit the document, and also copy and extract content from it, depending on the specific permissions granted.

User2 - No

A "Reviewer" role generally has view permissions, but not necessarily extract permissions.

Reviewers can typically view the content of documents, files, or other resources, and often can add comments or make tracked changes (depending on the specific implementation and settings). However, they may not have the ability to download or export the content, unless explicitly granted those rights.

User3 - No

User3 has only view permission, not extract permissions.

Note:

If a user is the owner of a sensitivity label and that label is applied to a file, Microsoft 365 Copilot can summarize the file for that

user, provided the user also has the necessary usage rights, specifically EXTRACT and VIEW, granted by the sensitivity label, according to Microsoft Learn. If the label includes encryption, these usage rights become crucial for Copilot's ability to access and summarize the content.

質問 # 38

You have a Microsoft SharePoint Online site named Site1 that has the users shown in the following table.

Name	Role
User1	Owner
User2	Member

You create the retention labels shown in the following table.

Name	Retention period	Retention action	Based on
Retention1	4 years	Retain only	When a file was labeled
Retention2	2 years	Retain and delete	When a file was labeled

You publish the retention labels to Site1.

On March 1, 2023, you assign the retention labels to the files shown in the following table.

Name	Modified by	Retention label
File1	User1	Retention1
File2	User1	Retention2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	☐	☐
User2 can delete File1 on March 10, 2027.	☐	☐
User2 can edit File2 on March 15, 2025.	☐	☐

正解:

解説:

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	☐	☒
User2 can delete File1 on March 10, 2027.	☐	☒
User2 can edit File2 on March 15, 2025.	☐	☒

Explanation:

Answer Area

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	☐	☒
User2 can delete File1 on March 10, 2027.	☐	☒
User2 can edit File2 on March 15, 2025.	☒	☐

User1 can delete File1 on March 10, 2023.

No - File1 has Retention1 applied, which retains it for 4 years with a "Retain only" action. This means it cannot be deleted during the retention period, which ends on March 1, 2027.

User2 can delete File1 on March 10, 2027.

No - User2 is a Member and does not have the Owner role, which is required to delete files under retention policies during the retention period. Additionally, the "Retain only" action prevents deletion until the retention period ends on March 1, 2027.

User2 can edit File2 on March 15, 2025.

No - File2 has Retention2 applied, which retains it for 2 years with a "Retain and delete" action. This means the file is protected from edits or deletions during the retention period, which ends on March 1, 2025. Since March 15, 2025, is after the retention period, the file would be eligible for deletion, but the question specifies editing, which is restricted during the retention period.

質問 # 39

You have a Microsoft 365 alert named Alert2 as shown in the following exhibit.

View alerts

Severity	Alert name	Status	Category	Activity count	Last occurrence...
Medium	Alert2	Resolved	Data loss prevention	1	6 days ago

You need to manage the status of Alert2.

To which status can you change Alert2?

- A. Investigating only
- B. Dismissed only
- C. Active or Investigating only
- D. Investigating, Active, or Dismissed
- E. The status cannot be changed.

正解: D

解説:

Despite status showing resolved it still can be changed. Select alert > Under Alert status > Actions > select "Edit comments" > choose new status: Active, Investigating, Dismissed or Resolved. Alert status will change Note: Alert status When an alert is created, its status is Active. As you review the details of each alert, you can update its status to any of the states listed below:

Active: default state of the alert until its status is changed

Investigating: alert is under investigation

Resolved: the alert doesn't require further investigation or follow-up

Dismissed: the alert isn't relevant or doesn't need investigation

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/dlp-configure-view-alerts-policies>

質問 # 40

You have a Microsoft 365 tenant

You need to create a new sensitive info type for items that contain the following:

* An employee ID number that consists of the hire date of the employee followed by a three digit number

* The words "Employee", "ID", or "Identification" within 300 characters of the employee ID number What should you use for the primary and secondary elements? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point

Answer Area

Microsoft

Primary element:

Functions
A keyword list
A regular expression

Secondary element:

Functions
A keyword list
A regular expression

正解:

解説:

Answer Area

Microsoft

Primary element:

Functions
A keyword list
A regular expression

Secondary element:

Functions
A keyword list
A regular expression

Explanation:

Answer Area

Microsoft

Primary element: A regular expression

Secondary element: A keyword list
