In addition, we provide you with free update for 365 days after purchasing AP-208 Training Materials, and our system will send you the latest version for AP-208 exam dumps automatically. We have online and offline chat service, and if you have any questions for AP-208 exam materials, you can contact us.

Salesforce Financial Services Cloud Accredited Professional Sample Questions (Q156-Q161):

NEW QUESTION # 156

Cumulus Cloud Bank needs help onboarding new customers. The business process requires updating the Know Your Customer (KYC) document checklist and performing internal tasks in a predefined order.

However, during an internal audit, it was found that bankers often miss these tasks and still move to the next stage of the onboarding process.

What should a consultant recommend?

- A. Utilize Chatter notifications for reminders.
- B. Utilize Financial Services Clouc flag Templates to flag missing items.
- C. Create an after-save trigger to generate reminder tasks.
- D. **Utilize Action Plan and Action INan Template.**

Answer: D

Explanation:

To help onboarding new customers, the consultant should recommend using Action Plan and Action Plan Template. Action Plan is a feature in Financial Services Cloud that allows you to automate and standardize common business processes or service requests, such as customer onboarding, account opening, or loan origination. You can use Action Plan to create templates that define the tasks, owners, and deadlines for each process or request. You can also use Action Plan to enforce task dependencies and completion criteria, so that bankers cannot skip or miss any tasks or move to the next stage of the onboarding process without meeting the requirements. NEW QUESTION # 157

Which three of these statements are true for Rollup By Lookup (RBL) in Financial Services Cloud?

- A. Person Accounts need to be enabled in order to use the Rollup by Lookup functionality.
- B. **An RBL (Rollup By Lookup) rule displays summary calculations of financial account information, such as account balances.**
- C. RBL rules do not require a lot of processing power.
- D. **The Rollup By Lookup (RBL) configuration updates the corresponding RBL summaries at the diem and group levels**
- E. **Salesforce does not recommend or provide support for creation or customization of Financial Services Cloud RBL rules**

Answer: B,D,E

Explanation:

The following statements are true for Rollup By Lookup (RBL) in Financial Services Cloud:

An RBL (Rollup By Lookup) rule displays summary calculations of financial account information, such as account balances. You can use RBL rules to aggregate financial account data across different levels of client relationships.

The Rollup By Lookup (RBL) configuration updates the corresponding RBL summaries at the diem and group levels. You can use RBL configuration to define which fields are rolled up and how they are calculated for each diem and group type.

Salesforce does not recommend or provide support for creation or customization of Financial Services Cloud RBL rules. RBL rules are complex and require extensive testing and validation. If you need to create or customize RBL rules, you should contact a certified Salesforce partner or consultant. Verified References: :

NEW QUESTION # 158

When importing records from a system outside of Salesforce, which ID should be used to prevent the data import from creating duplicates?

- A. User ID
- B. Org ID
- C. Data Load ID
- D. **External ID**

Answer: D

Explanation:

To prevent the data import from creating duplicates when importing records from a system outside of Salesforce, you should use External ID. External ID is a custom field type that can be used to store unique identifiers from other systems. You can use External ID to match records during data import and avoid creating duplicate records in Salesforce. You can also use External ID to enable upsert operations, which can insert new records or update existing records based on the External ID value. NEW QUESTION # 159

An administrator is logged into Data Loader with their own credentials to insert new Business Account records into their Salesforce environment. They forgot to specify the Account Owner field in the import file.

Assuming there are no other issues, what should happen when the administrator uploads the import file?

- A. The import will succeed, and the administrator will be named as the default Account Owner.
- B. The import will fail, since all records in Salesforce must have an owner.
- C. The import will succeed, and the Account Owner field will be left blank.
- D. The import will succeed, and the administrator will be prompted to select a user.

Answer: A

Explanation:

When using Data Loader to insert new records into Salesforce, if the Account Owner field is not specified in the import file, the default owner will be the user who is logged into Data Loader. In this case, since the administrator is logged into Data Loader with their own credentials, they will be assigned as the owner of all the new Business Account records. This behavior is consistent with the standard Salesforce rule that every record must have an owner.

NEW QUESTION # 160

A Financial Services Cloud (FSC) administrator is assigning permission set licenses to users, including personal bankers. Which permission set license is recommended for this set of users?

- A. FSC Standard permission set license
- B. FSC Extension permission set license
- C. FSC Basic permission set license
- D. FSC Foundations permission set license

Answer: A

Explanation:

Reference: [Financial Services Cloud Permission Set Licenses - Salesforce](#) Explanation: Permission set licenses are a way to grant additional permissions and access settings to users based on their job function or role. Permission set licenses can extend the functionality of the user's existing license type without changing it. Financial Services Cloud provides four permission set licenses that correspond to different user personas and use cases:

FSC Foundations: This permission set license grants access to basic Financial Services Cloud features, such as Client Segmentation, Relationship Groups, Relationship Map, Financial Accounts, Financial Goals, and Financial Summary. This permission set license is suitable for users who need to view and manage client data and relationships, such as personal bankers or service representatives.

FSC Basic: This permission set license grants access to advanced Financial Services Cloud features, such as Action Plans, Interaction Summaries, Interaction Participants, Financial Deals, Financial Deal Participants, and Record Alerts. This permission set license is suitable for users who need to track and execute client interactions and transactions, such as advisors or specialists.

FSC Extension: This permission set license grants access to additional Financial Services Cloud features that are not included in the other permission set licenses, such as Household Rollups and Compliant Data Sharing.

This permission set license is suitable for users who need to perform complex calculations or comply with data regulations, such as analysts or compliance managers.

FSC Standard: This permission set license grants access to all Financial Services Cloud features that are included in the other permission set licenses. This permission set license is suitable for users who need full access and functionality of Financial Services Cloud, such as super users or administrators.
