

便利なUiPath-ABAv1教育資料 &合格スムーズUiPath-ABAv1資格参考書 |正確的なUiPath-ABAv1模擬対策

UiPath Certified Professional Automation Business Analyst Professional v1.0

無料でクラウドストレージから最新のCertShiken UiPath-ABAv1 PDFダンプをダウンロードする: https://drive.google.com/open?id=1Qx72UaSexpglboV4Q_5myR8gSN5sC2j8

CertShikenがもっと早くUiPathのUiPath-ABAv1認証試験に合格させるサイトで、UiPathのUiPath-ABAv1認証試験についての問題集が市場にどんどん湧いてきます。あなたがまだ専門知識と情報技術を証明しています強い人材で、CertShikenのUiPathのUiPath-ABAv1認定試験について最新の試験問題集が君にもっとも助けていますよ。

UiPath UiPath-ABAv1 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">Business Knowledge: This topic focuses on understanding business process automation (BPA) and its value proposition, as well as exploring key concepts related to business processes.
トピック 2	<ul style="list-style-type: none">Workflow Analyzer: This topic covers the use of Workflow Analysis, along with configuring Workflow Analyzer settings.
トピック 3	<ul style="list-style-type: none">Control Flow: Control Flow activities, workflow types, and Flowchart layouts are discussed here, along with the usage of IF, Flow Decision, Switch activities, While, Do While, and For Each.
トピック 4	<ul style="list-style-type: none">Libraries and Templates: Creating, publishing, and consuming process libraries, as well as working with templates, are discussed here.
トピック 5	<ul style="list-style-type: none">Debugging: Debugging modes, actions, breakpoints, and debugging panels are explained in this topic, along with using Profile Execution features to improve project execution performance.
トピック 6	<ul style="list-style-type: none">Orchestrator: Understanding Orchestrator entities, tenant entities, provisioning robots, defining roles, and utilizing logging features are covered in this topic.
トピック 7	<ul style="list-style-type: none">PDF Automation: It discusses extracting data from native and scanned PDFs. Moreover, the topic focuses on different techniques for working with PDF documents.
トピック 8	<ul style="list-style-type: none">Object Repository: Creation, publication, and consumption of UI libraries with static and dynamic descriptors are covered in this section.
トピック 9	<ul style="list-style-type: none">Data Manipulation: String manipulation, array operations, list initialization, dictionary usage, and DataTable operations are discussed in this topic.

トピック 10	<ul style="list-style-type: none"> Integration Service: This topic explains Integration Service, use of integration service connectors, triggers, and the Integration Service Connector Builder.
トピック 11	<ul style="list-style-type: none"> Email Automation: Handling emails via IMAP, POP3, SMTP, and integrating with Microsoft and Gmail are covered in this section. It also discusses the usage of Microsoft 365 and Gsuite packages.
トピック 12	<ul style="list-style-type: none"> Working with Files and Folders: Creating, managing, and iterating through local files and folders are covered here.
トピック 13	<ul style="list-style-type: none"> Variables and Arguments: This topic explores data types and how they're utilized, along with creating, managing, and using variables and arguments. It also addresses the differences between variables, arguments, global constants, and global variables.
トピック 14	<ul style="list-style-type: none"> Platform Knowledge: It delves into UiPath products and their uses, including Studio types, Robot types, Orchestrator, and Integration Service. Additionally, it discusses the value of components within the UiPath Ecosystem.
トピック 15	<ul style="list-style-type: none"> Logging: This topic addresses interpreting robot execution logs and implementing logging best practices during development for effective debugging and analysis.
トピック 16	<ul style="list-style-type: none"> Implementation Methodology: Understanding project implementation stages, interpreting PDDs and SDDs, and conducting peer reviews are discussed here.
トピック 17	<ul style="list-style-type: none"> UI Automation: UI Automation principles, including modern and classic design experiences, are discussed alongside utilizing modern recorder and input output activities.
トピック 18	<ul style="list-style-type: none"> Excel Automation: It explains Excel Automation principles and modern Excel integration including reading, writing, and manipulating Excel files. Additionally, the topic focuses on the usage of the Excel Workbook activities.
トピック 19	<ul style="list-style-type: none"> Exception Handling: This topic covers using Try Catch, Throw, Rethrow, and Retry Scope activities.

ユニークなUiPath-ABAv1教育資料試験-試験の準備方法-100%合格率のUiPath-ABAv1資格参考書

時間は何もありません。タイミングが全てだ。他しないでください。UiPath-ABAv1 VCEダンプは、試験をクリアする時間を節約するのに役立ちます。有効な試験ファイルを選択した場合、試験は一発で合格します。UiPath VCEダンプで最短時間で認定資格を取得できます。今すぐ上級職に就くと、他の人よりも絶対に有利になります。これで、時間を無駄にせずに、UiPath-ABAv1 VCEダンプから始めてください。優れた有効なVCEダンプは、あなたの夢を実現し、他の仲間よりも先に人生のピークを迎えます。

UiPath Certified Professional Automation Business Analyst Professional v1.0認定UiPath-ABAv1試験問題(Q68-Q73):

質問 #68

UiPath Process Mining provides TemplateOne application that offers different generic dashboards containing information, KPIs, and analysis functionality focused on a specific process area. What are the 3 standard KPIs part of the Automation Dashboard within the TemplateOne application?

- A. Automation Rate, Material Group Count, Avg. throughput time
- B. Automation Rate, Total Manual Processing time, Supplier Avg. Time
- C. Automation Rate, Total Manual event cost, Intercompany case value
- D. Automation Rate, Total Manual Processing time, Total Manual event cost**

正解: D

解説:

In the TemplateOne application provided by UiPath Process Mining, the Automation Dashboard includes the following three standard KPIs: Automation Rate, Total Manual Processing Time, and Total Manual Event Cost. These KPIs help in assessing the efficiency and cost-effectiveness of manual vs automated processes within an organization.

Reference: UiPath Documentation on Process Mining and TemplateOne at <https://docs.uipath.com/>.

質問 #69

Which type of automation is most commonly used in Customer Service or Customer Support processes?

- A. UI automation
- B. Unattended automation
- C. Attended automation
- D. Desktop automation

正解: C

解説:

The type of automation most commonly used in Customer Service or Customer Support processes is Attended automation. This form of automation is interactive and requires human intervention at certain points, making it ideal for customer service environments where decisions and responses need to be tailored to specific customer interactions.

UiPath Documentation on Automation Types at <https://docs.uipath.com/>.

質問 #70

What would be the most cost effective way to extract an email address from a structured document?

- A. Using the Form Extractor
- B. Using the RegEx extractor
- C. Using FormsAI
- D. Using the ML Extractor in combination with an ML model

正解: B

解説:

The most cost-effective way to extract an email address from a structured document is by using the RegEx extractor. This method is efficient because regular expressions can be tailored to match the specific pattern of email addresses without the need for more complex and resource-intensive tools. The RegEx extractor is particularly suitable for structured documents where the format is predictable and consistent, making it easy to identify and extract email addresses based on their common patterns¹.

References: The use of RegEx for extracting information from structured documents is a common practice in RPA and is supported by discussions in the UiPath Community Forum, where similar methods are recommended for data extraction tasks¹.

質問 #71

Which of the following best describes the differences between an "as is" process map and a "to be" process map in the context of RPA (Robotic Process Automation)?

- A. An "as is" process map shows the current state of a process, while a "to be" process map shows the desired future state of the process
- B. An "as is" process map shows the steps in a process, while a "to be" process map shows the inputs and outputs for each step
- C. An "as is" process map is used for manual processes, while a "to be" process map is used for automated processes
- D. An "as is" process map is used for data analysis, while a "to be" process map is used for process optimization

正解: A

解説:

The differences between an "as is" process map and a "to be" process map in the context of RPA are that an "as is" process map shows the current state of a process, while a "to be" process map shows the desired future state of the process

after automation has been implemented. This distinction is fundamental as it guides the transformation from manual to automated processes by highlighting necessary changes and enhancements. References: UiPath Documentation on Process Mapping at <https://docs.uipath.com/>.

質問 #72

By what step at most should the analysis of input and its future standardization be decided upon?

- A. During process analysis
- B. During To-Be process documentation
- C. During As-Is process documentation
- D. During talks with the SME and Business Owner

正解: A

解説:

The analysis of input and its future standardization should ideally be decided upon during the process analysis phase. This phase involves a detailed review of the current process inputs and outputs, identifying variations, and establishing standardization requirements. During process analysis, a thorough examination of all elements related to the workflow is conducted, which enables the identification of areas where standardization can lead to greater efficiency and consistency. Deciding on standardization at this stage helps ensure that the designed automation will be robust, scalable, and aligned with the organization's goals.

References: The information is based on the UiPath Automation Business Analyst Learning Plans and the Automation Business Analysis Fundamentals course available on the UiPath Academy, which addresses topics covered in the UiPath Automation Business Analyst (UiABA) certification exam

質問 #73

.....

人生にはあまりにも多くの変化および未知の誘惑がありますから、まだ若いときに自分自身のために強固な基盤を築くべきです。あなた準備しましたか。CertShikenのUiPathのUiPath-ABAv1試験トレーニング資料は最高のトレーニング資料です。IT職員としてのあなたは切迫感を感じましたか。CertShikenを選んだら、成功への扉を開きます。頑張ってください。
