我們都是平平凡凡的普通人，有時候所學的所掌握的東西沒有那麼容易徹底的吸收，所以經常忘記，當我們需要時就拼命的補習，當你看到NewDumps Oracle的1Z0-1061-24考試培訓資料是，你才明白這是你必須要購買的，它可以讓你毫不費力的通過考試，也可以讓你不用那麼努力的補習，相信NewDumps，相信它讓你看到你的未來美好的樣子，再苦再難，只要NewDumps還在，總會找到希望的光明。

最新的 Fusion Sales 1Z0-1061-24 免費考試真題 (Q244-Q249):

問題 #244

In Oracle Profitability and Cost Management Cloud Service, which security privilege should be assigned to a user to restrict access to a specific dimension member?

- A. Workflow Administrator

- **B. Data Access Manager**
- C. End User
- D. Security Administrator

答案： B

解題說明：

Option 1: Incorrect. The Security Administrator privilege allows users to manage security for all dimensions and data sources in the application. It does not provide the granularity required to restrict access to a specific dimension member. Option 2: Correct. The Data Access Manager privilege should be assigned to a user to restrict access to a specific dimension member. This privilege allows users to define and manage access rules for individual dimension members, thereby controlling the data that users can view and edit. Option 3: Incorrect. The Workflow Administrator privilege allows users to manage workflow processes and approvals in the application. It does not provide the functionality to restrict access to specific dimension members. Option 4: Incorrect. The End User privilege is the most basic level of access in the application. It does not provide the functionality to restrict access to specific dimension members.

問題 #245

When loading data in Oracle Profitability and Cost Management Cloud Service, what are the benefits of using the CSV format over the Excel format?

- **A. CSV files can be loaded faster.**
- B. CSV files support more formatting options.
- C. CSV files have a smaller file size.
- D. CSV files are easier to read.

答案： A

解題說明：

Option 1: This option is incorrect. While it is true that CSV files generally have a smaller file size than Excel files, this is not a specific benefit when loading data. Option 2: This option is correct. CSV files can be loaded much faster than Excel files because they do not contain any formatting or other metadata that needs to be parsed. This can be especially beneficial when loading large amounts of data. Option 3: This option is incorrect. CSV files are actually more difficult to read than Excel files because they do not contain any formatting or structure. Option 4: This option is incorrect. Excel files support more formatting options than CSV files, such as font styles, colors, and borders.

問題 #246

Which feature of Oracle Profitability and Cost Management Cloud Service allows users to integrate data from external applications?

- **A. Data Integration Framework**
- B. Allocation Manager
- C. Task Manager
- D. Business Rules

答案： A

解題說明：

Option 1: Correct. The Data Integration Framework of Oracle Profitability and Cost Management Cloud Service allows users to integrate data from external applications. It provides pre-built adapters and templates for data loading and extraction from external systems. Option 2: Incorrect. Business Rules do not allow users to integrate data from external applications in Oracle Profitability and Cost Management Cloud Service. They are used to define allocation rules and calculations. Option 3: Incorrect. Allocation Manager is not used for integrating data from external applications in Oracle Profitability and Cost Management Cloud Service. It is used to define allocation rules and perform complex allocations. Option 4: Incorrect. Task Manager is not used for integrating data from external applications in Oracle Profitability and Cost Management Cloud Service. It is used to manage tasks and workflows within the application.

問題 #247

Which feature of Oracle Profitability and Cost Management Cloud Service allows users to create custom calculations and allocations based on multiple dimensions?

- A. Data synchronization
- B. Financial Reporting
- C. Dimension management
- **D. Allocation rules**

答案： D

解題說明：

Option 1: Incorrect. Financial Reporting is a feature of Oracle Profitability and Cost Management Cloud Service that enables users to create, deploy, and distribute interactive reports and dashboards. Option 2: Incorrect. Dimension management is a feature of Oracle Profitability and Cost Management Cloud Service that allows users to define and manage dimensions. Option 3: Incorrect. Data synchronization is a feature of Oracle Profitability and Cost Management Cloud Service that enables users to integrate data from various sources into the application. Option 4: Correct. Allocation rules is a feature of Oracle Profitability and Cost Management Cloud Service that allows users to create custom calculations and allocations based on multiple dimensions. This feature enables users to define complex business rules for allocating costs and revenues across different dimensions such as products, customers, and regions.

問題 #248

When setting up models and rules in Oracle Profitability and Cost Management Cloud Service, which feature allows you to customize the calculation of allocations to meet specific business needs?

- **A. Business rules**
- B. Groovy scripts
- C. Data map
- D. Scenario

答案： A

解題說明：

Option 1: Incorrect. While Groovy scripts can offer a high level of customization, they are more commonly used for complex calculations rather than allocation rules. Option 2: Correct. Business rules in Oracle Profitability and Cost Management Cloud Service can be used to customize the calculation of allocations, allowing you to meet specific business needs. Option 3: Incorrect. The data map feature in Oracle Profitability and Cost Management Cloud Service is used to define the structure and boundaries of the data that is loaded into the application, and does not directly affect the calculation of allocations. Option 4: Incorrect. Scenarios in Oracle Profitability and Cost Management Cloud Service are used to define different sets of assumptions or planning scenarios, and do not directly affect the calculation of allocations.
