

# LEED-AP-Homes Schulungsmaterialien & LEED-AP-Homes Dumps Prüfung & LEED-AP-Homes Studienguide

Außerdem sind jetzt einige Teile dieser ITZert LEED-AP-Homes Prüfungsfragen kostenlos erhältlich: <https://drive.google.com/open?id=1YMqqytqoneNifchsv4aESCed7tSdDV-L>

Wollen Sie USGBC LEED-AP-Homes Dumps von ITZert probieren? Diese Dumps sind unbedingt die besten Unterlagen auf dem Markt, die im Zusammenhang mit den Prüfungen sind. Warum? Es gibt die folgenden vier Gründe. Zuerst sind die Prüfungsfragen von ITZert von den reichen Erfahrungen der IT-Eliten entworfen und auch sehr genau. Zweitens beinhalten ITZert Dumps alle möglichen Prüfungsfragen in aktuellen Prüfungen. Drittens, die ITZert Dumps garantieren Ihnen, nur einmal die USGBC LEED-AP-Homes Prüfung zu bestehen. Wenn die Teilnehmer durchgefallen sind, können Sie die volle Rückerstattung bekommen. Viertes gliedern sich ITZert in zwei verschiedenen Versionen, PDF-Versionen und Software-Versionen. Wenn Sie beide Dumps kaufen, können Sie diese Prüfung leichter vorbereiten.

Unser ITZert hat langjährige Schulungserfahrungen über IT-Zertifizierungsprüfungen. Die Schulungsunterlagen zur USGBC LEED-AP-Homes Prüfung von ITZert sind zuverlässig. Unser Eliteteam aktualisiert ständig die neuesten Schulungsunterlagen zur USGBC LEED-AP-Homes Prüfung. Unsere Angestellten haben sich sehr viel Mühe dafür geben, um Ihnen zu helfen, eine gute Note in der Prüfung zu bekommen. Es ist sicher, dass ITZert Ihnen die realen und besten Schulungsunterlagen zur USGBC LEED-AP-Homes Prüfung bietet.

>> LEED-AP-Homes Fragen&Antworten <<

## USGBC LEED-AP-Homes PDF Demo, LEED-AP-Homes Antworten

Um jeden Kunden geeignete Vorbereitungsmethode für USGBC LEED-AP-Homes finden zu lassen, bieten wir insgesamt 3 Versionen von USGBC LEED-AP-Homes Prüfungsunterlagen, nämlich PDF, Online Test Engine, sowie Simulations-Software. Mindestens wird wohl eine davon Ihnen am besten bei der Vorbereitung unterstützen. Kostenlose Demos aller drei Versionen sind angeboten. Jede Version enthält die neuesten und umfassendsten Prüfungsunterlagen der USGBC LEED-AP-Homes.

## USGBC LEED AP Homes (Residential) Exam LEED-AP-Homes Prüfungsfragen mit Lösungen (Q41-Q46):

### 41. Frage

A gut rehab LEED for Homes project will maintain the building's existing exterior wall and floor framing. Under Materials and Resources Credit, Environmentally Preferable Products category, these components get credit for being:

- A. Refurbished
- B. Restructured
- C. Recycled
- **D. Reclaimed**

## Antwort: D

### Begründung:

The LEED for Homes Rating System (v4) awards points for the Materials and Resources (MR) Credit:

Environmentally Preferable Products for using materials with sustainable attributes, such as reused or salvaged materials. In a gut rehab project, maintaining existing exterior wall and floor framing qualifies these components as reused materials.

According to the LEED Reference Guide for Homes Design and Construction (v4):

MR Credit: Environmentally Preferable Products (1-4 points)

Use products that meet one or more of the following criteria for at least 25%, 50%, or 90% (by cost) of the total materials:

\* Reused or salvaged materials: Materials that are reclaimed from the same or another project, such as existing framing maintained in a gut rehab. In gut rehab projects, existing structural components (e.g., wall and floor framing) that are reused in place qualify as reclaimed materials. Source: LEED Reference Guide for Homes Design and Construction, v4, Materials and Resources Credit:

Environmentally Preferable Products, p. 160.

The LEED v4.1 Residential BD+C rating system confirms:

MR Credit: Environmentally Preferable Products

Reclaimed materials, such as existing framing reused in gut rehab projects, contribute to the percentage of environmentally preferable products based on their cost.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The term reclaimed (Option B) is used in LEED to describe materials that are reused or salvaged, such as existing framing kept in place during a gut rehab. This reduces the demand for new materials and aligns with the credit's intent.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 160.

C). Refurbished: Refurbished materials are restored or repaired for reuse (e.g., refinished doors). Framing maintained in place is not refurbished but simply reused, so this term does not apply. Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 160.

D). Restructured: This term is not used in LEED and does not describe the reuse of existing framing.

Reference: LEED Reference Guide for Homes Design and Construction, v4, MR Credit: Environmentally Preferable Products, p. 160.

The LEED AP Homes Candidate Handbook emphasizes MR credits, including Environmentally Preferable Products, and references the LEED Reference Guide for Homes Design and Construction as a key resource.

The exam is based on LEED v4, ensuring the relevance of the term "reclaimed." References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Materials and Resources Credit: Environmentally Preferable Products, p. 160.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming reclaimed material criteria.

## 42. Frage

The owner requires a fireplace in a new house and is pursuing LEED for Homes certification. Which of the following strategies is acceptable?

- A. Use an unvented decorative log fireplace
- **B. Install doors on the fireplace**
- C. Install carbon monoxide monitors in each room
- D. Use unvented combustion appliances

## Antwort: B

### Begründung:

The LEED for Homes Rating System (v4) addresses fireplaces in the Indoor Environmental Quality (EQ) Credit: Enhanced Combustion Venting, which promotes safe combustion practices to prevent indoor air quality issues from fireplaces.

According to the LEED Reference Guide for Homes Design and Construction (v4):

EQ Credit: Enhanced Combustion Venting (1 point)

For fireplaces, install doors and ensure they are direct-vented or power-vented to prevent combustion byproducts from entering the home. Unvented fireplaces or appliances are not permitted due to indoor air quality risks.

Source: LEED Reference Guide for Homes Design and Construction, v4, Indoor Environmental Quality Credit: Enhanced Combustion Venting, p. 144.

The LEED v4.1 Residential BD+C Crating system confirms:

EQ Credit: Enhanced Combustion Venting

Fireplaces must have doors and be vented to the outdoors (e.g., direct-vent) to qualify for the credit, ensuring safe operation and minimal indoor air pollution.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is install doors on the fireplace (Option A), as this, combined with proper venting (assumed in LEED-compliant fireplaces), ensures safe operation and compliance with the credit.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, EQ Credit: Enhanced Combustion Venting, p. 144.

C). Use an unvented decorative log fireplace: Unvented fireplaces are not allowed, as they pose significant indoor air quality risks. Reference: LEED Reference Guide for Homes Design and Construction, v4, EQ Credit: Enhanced Combustion Venting, p. 144.

D). Install carbon monoxide monitors in each room: While monitors are recommended for safety, they do not address the credit's requirement for vented fireplaces with doors. Reference: LEED Reference Guide for Homes Design and Construction, v4, EQ Credit: Enhanced Combustion Venting, p. 144.

The LEED AP Homes Candidate Handbook emphasizes EQ credits, including combustion venting, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of fireplace doors.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Indoor Environmental Quality Credit: Enhanced Combustion Venting, p. 144.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming fireplace venting requirements.

### 43. Frage

For a typical single-family home, plumbing fixtures may account for what fraction of the home's total indoor water use?

- A. 2/3
- B. 1/3
- C. 1/2
- D. 3/4

**Antwort: A**

Begründung:

The LEED for Homes Rating System (v4) addresses indoor water use in the Water Efficiency (WE) Credit:

Indoor Water Use, which focuses on reducing water consumption through efficient plumbing fixtures (e.g., toilets, faucets, showerheads). Understanding the contribution of fixtures to total indoor water use is key to this credit.

According to the LEED Reference Guide for Homes Design and Construction (v4):

WE Credit: Indoor Water Use (1-6 points)

In a typical single-family home, plumbing fixtures (toilets, showerheads, and faucets) account for approximately two-thirds (2/3) of total indoor water use. Installing high-efficiency fixtures can significantly reduce water consumption.

Source: LEED Reference Guide for Homes Design and Construction, v4, Water Efficiency Credit: Indoor Water Use, p. 96.

The LEED v4.1 Residential BD+C Crating system confirms:

WE Credit: Indoor Water Use

Plumbing fixtures typically represent about 2/3 of indoor water use in single-family homes, making their efficiency critical for achieving water savings.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is 2/3 (Option C), as plumbing fixtures account for approximately two-thirds of a typical single-family home's indoor water use.

Why not the other options?

\* A. 1/3: This underestimates the contribution of plumbing fixtures, which are the primary indoor water users.

\* B. 1/2: This is closer but still underestimates the typical proportion (2/3).

Reference: LEED Reference Guide for Homes Design and Construction, v4, WE Credit: Indoor Water Use, p. 96.

The LEED AP Homes Candidate Handbook emphasizes WE credits, including indoor water use, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of the 2/3 fraction.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Water Efficiency Credit: Indoor Water Use, p. 96.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming indoor water use proportions.

#### 44. Frage

Sustainable Sites Prerequisite, No Invasive Plants requires that all site vegetation:

- A. Be native to the project's region
- **B. Be listed by USDA Cooperative Extension Service or equivalent**
- C. Provide shading to 25% of hardscapes
- D. Be drought tolerant

**Antwort: B**

Begründung:

The LEED for Homes Rating System (v4) includes the Sustainable Sites (SS) Prerequisite: No Invasive Plants, which ensures that landscaping does not introduce invasive species that could harm local ecosystems.

According to the LEED Reference Guide for Homes Design and Construction (v4):

SS Prerequisite: No Invasive Plants

All site vegetation must be non-invasive, as verified by the USDA Cooperative Extension Service or an equivalent authority (e.g., local native plant societies or university extension programs). Invasive species are those that are non-native and likely to cause environmental harm.

Source: LEED Reference Guide for Homes Design and Construction, v4, Sustainable Sites Prerequisite: No Invasive Plants, p. 72.

The LEED v4.1 Residential BD+C Crating system confirms:

SS Prerequisite: No Invasive Plants

All plants must be verified as non-invasive by the USDA Cooperative Extension Service or equivalent to ensure they do not disrupt local ecosystems.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The correct answer is **be listed by USDA Cooperative Extension Service or equivalent (Option C)**, as this ensures that all site vegetation is non-invasive, meeting the prerequisite.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, SS Prerequisite: No Invasive Plants, p. 72.

B). Be drought tolerant: This is relevant to WE Credit: Outdoor Water Use, not the No Invasive Plants prerequisite. Reference: LEED Reference Guide for Homes Design and Construction, v4, WE Credit: Outdoor Water Use, p. 98.

D). Provide shading to 25% of hardscapes: This is related to SS Credit: Heat Island Reduction, not the No Invasive Plants prerequisite. Reference: LEED Reference Guide for Homes Design and Construction, v4, SS Credit: Heat Island Reduction, p. 80.

The LEED AP Homes Candidate Handbook emphasizes SS prerequisites, including invasive plant prevention, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of USDA verification.

References:

LEED Reference Guide for Homes Design and Construction, v4, USGBC, Sustainable Sites Prerequisite: No Invasive Plants, p. 72.

LEED v4.1 Residential BD+C, USGBC LEED Credit Library, accessed via LEED Online (<https://www.usgbc.org/credits>).

LEED AP Homes Candidate Handbook, GBCI, October 2024, p. 12 (references study resources and exam scope based on LEED v4).

USGBC LEED for Homes Rating System (v4), available via USGBC website (<https://www.usgbc.org/resources/leed-homes-design-and-construction-v4>).

LEED v4.1 for Homes, USGBC, accessed via LEED Online, confirming invasive plant verification.

#### 45. Frage

A home has a large shower compartment of 3,750 in<sup>2</sup> (2.4 m<sup>2</sup>) with dual 1.5 gpm (5.6 lpm) shower heads. How should the flow rate be calculated?

- A. The flow rate is calculated as two separate compartments of 1.5 gpm (5.6 lpm)
- **B. Multiple shower heads are not allowed**
- C. The flow rates are added to total 3.0 gpm (11.2 lpm)
- D. Shower compartment size does not affect shower head flow rates for LEED compliance

#### Antwort: B

Begründung:

The LEED for Homes Rating System (v4) addresses shower compartments in the Water Efficiency (WE) Credit: Indoor Water Use, where the size and number of showerheads impact water use calculations.

According to the LEED Reference Guide for Homes Design and Construction (v4):

WE Credit: Indoor Water Use (1-6 points)

A shower compartment is defined as an enclosed area with a floor area of no more than 2,500 in<sup>2</sup> (1.6 m<sup>2</sup>), where all fixtures (e.g., multiple showerheads) count as a single fixture for water use calculations.

Compartments larger than 2,500 in<sup>2</sup> are considered multiple compartments, and multiple showerheads in such cases are not allowed for LEED compliance to ensure water efficiency.

Source: LEED Reference Guide for Homes Design and Construction, v4, Water Efficiency Credit: Indoor Water Use, p. 96.

The LEED v4.1 Residential BD+C Crating system confirms:

WE Credit: Indoor Water Use

For shower compartments exceeding 2,500 in<sup>2</sup> (1.6 m<sup>2</sup>), multiple showerheads are not permitted to maintain water efficiency goals.

Each compartment must be treated separately if applicable, but large compartments cannot have multiple heads.

Source: LEED v4.1 Residential BD+C, Credit Library, accessed via USGBC LEED Online.

The shower compartment is 3,750 in<sup>2</sup> (2.4 m<sup>2</sup>), exceeding the 2,500 in<sup>2</sup> limit. Therefore, multiple showerheads are not allowed (Option C), as LEED restricts multiple heads in oversized compartments to ensure water efficiency.

Why not the other options?

Reference: LEED Reference Guide for Homes Design and Construction, v4, WE Credit: Indoor Water Use, p. 96.

B). The flow rate is calculated as two separate compartments of 1.5 gpm (5.6 lpm): The compartment is one unit, and multiple heads are not allowed, not treated as separate compartments. Reference: LEED Reference Guide for Homes Design and Construction, v4, WE Credit: Indoor Water Use, p. 96.

D). Shower compartment size does not affect shower head flow rates for LEED compliance:

Compartment size directly affects whether multiple heads are allowed. Reference: LEED Reference Guide for Homes Design and Construction, v4, WE Credit: Indoor Water Use, p. 96.

The LEED AP Homes Candidate Handbook emphasizes WE credits, including showerhead calculations, and references the LEED Reference Guide for Homes Design and Construction as a key resource. The exam is based on LEED v4, ensuring the relevance of compartment size restrictions.

References:

#### 46. Frage

.....

Mit der Ankunft der Flut des Informationszeitalters im 21. Jahrhundert müssen die Menschen ihre Kenntnisse verbessern, um sich dem Zeitalter anzupassen. Aber das ist noch nicht genügend. In der IT-Branche ist USGBC LEED-AP-Homes

Zertifizierungsprüfung ganz notwendig. Aber diese Prüfung ist ganz schwierig. Sie können auch internationale Anerkennung und Akzeptanz erhalten, eine glänzende Zukunft haben und ein hohes Gehalt beziehen. ITZert verfügt über die weltweit zuverlässigsten IT-Schulungsmaterialien und mit ihm können Sie Ihre wunderbare Pläne realisieren. We garantieren Ihnen 100%, die Prüfung zu bestehen. Bewerber, die an der USGBC LEED-AP-Homes Zertifizierungsprüfung teilnehmen, warum zögern Sie noch. Schnell, bitte!

**LEED-AP-Homes PDF Demo:** [https://www.itzert.com/LEED-AP-Homes\\_valid-braindumps.html](https://www.itzert.com/LEED-AP-Homes_valid-braindumps.html)

Manche haben kaum zukunftsorientierte Pläne, dann wollen unser LEED-AP-Homes echter Test Unterstützungen leisten, USGBC LEED-AP-Homes Fragen&Antworten Sie werden finden, dass diese Vorbereitungsunterlagen was Sie gerade brauchen sind, Die USGBC LEED-AP-Homes (LEED AP Homes (Residential) Exam) Zertifizierungsprüfung ist eine Prüfung, die Fachkenntnisse und Fertigkeiten eines Menschen testet, Falls Sie die Prüfung leider nicht erfolgreich bestehen, erstatten wir Ihnen 100% der Kosten für USGBC LEED-AP-Homes Trainingsmaterialien zurück.

Die Menschen haben kürzlich über die chinesische Geschichte LEED-AP-Homes Online Tests entschieden und sind dieser Meinung, Zeit Zeittest kann keinen strengen experimentellen Test ertragen.

Manche haben kaum zukunftsorientierte Pläne, dann wollen unser LEED-AP-Homes echter Test Unterstützungen leisten, Sie werden finden, dass diese Vorbereitungsunterlagen was Sie gerade brauchen sind!

## **LEED-AP-Homes Übungsfragen: LEED AP Homes (Residential) Exam & LEED-AP-Homes Dateien Prüfungsunterlagen**

Die USGBC LEED-AP-Homes (LEED AP Homes (Residential) Exam) Zertifizierungsprüfung ist eine Prüfung, die Fachkenntnisse und Fertigkeiten eines Menschen testet, Falls Sie die Prüfung leider nicht erfolgreich bestehen, erstatten wir Ihnen 100% der Kosten für USGBC LEED-AP-Homes Trainingsmaterialien zurück.

Je früher Sie die wichtige Qualifikation LEED-AP-Homes erwerbt haben, bekommen Sie bessere Berufschance.
