

H35-211_V2.5 Valid Test Papers - Braindumps H35-211_V2.5 Pdf

What's more, part of that PrepAwayExam H35-211_V2.5 dumps now are free: <https://drive.google.com/open?id=1yN06Rt2gxGl-va7rj5tq2OvYKP5RtOv>

By contrasting with other products in the industry, our H35-211_V2.5 test guide really has a higher pass rate, which has been verified by many users. As long as you use our H35-211_V2.5 exam training I believe you can pass the exam. If you fail to pass the exam, we will give a full refund. H35-211_V2.5 learning guide hopes to progress together with you and work together for their own future. The high passing rate of H35-211_V2.5 exam training also requires your efforts. If you choose H35-211_V2.5 test guide, I believe we can together contribute to this high pass rate.

Huawei H35-211_V2.5 (HCIP-Access V2.5) Certification Exam is a professional-level certification exam offered by Huawei, a leading global provider of information and communication technology (ICT) infrastructure and smart devices. HCIP-Access V2.5 certification is designed to validate the knowledge and skills of IT professionals who are responsible for designing, deploying, and maintaining access networks based on Huawei's access products and solutions.

Huawei H35-211_V2.5 (HCIP-Access V2.5) Exam is a comprehensive certification exam that is designed to validate the skills and knowledge of IT professionals in the field of network access control. Passing the exam demonstrates that candidates have the expertise required to design, implement, and maintain complex access control networks, and can be a valuable asset to any organization looking to improve their network security.

Pass Your Huawei H35-211_V2.5 Exam on the First Try with PrepAwayExam

The HCIP-Access V2.5 (H35-211_V2.5) certification has become a basic requirement to advance rapidly in the information technology sector. Since HCIP-Access V2.5 (H35-211_V2.5) actual dumps are vital to prepare quickly for the examination. Therefore, you will need them if you desire to ace the HCIP-Access V2.5 (H35-211_V2.5) exam in a short time.

Huawei H35-211_V2.5 (HCIP-Access V2.5) certification exam is an excellent opportunity for IT professionals to validate their knowledge and skills related to access network technologies. HCIP-Access V2.5 certification exam is comprehensive and covers a wide range of topics related to access network technologies. HCIP-Access V2.5 certification can help professionals to advance their career and gain recognition for their proficiency in access network technologies.

Huawei HCIP-Access V2.5 Sample Questions (Q29-Q34):

NEW QUESTION # 29

In the upstream direction of the OLT, link aggregation can be used to improve bandwidth and reliability. Which of the following OLT uplink aggregation modes are supported?

- A. Manual
- B. Dynamic
- C. Automatic
- D. Static

Answer: B,D

NEW QUESTION # 30

Huawei OLT supports device diagnosis based on service flows. Which of the following statements is incorrect?

- A. Only packet headers are captured for data packets, and entire packets are captured for protocol packets.
- B. You need to set the information about the backup server.
- C. Service flow packet capturing is configured in the global configuration view.
- D. The number or duration for captured packets can be specified.

Answer: B

NEW QUESTION # 31

On U2000, if an OLT PON port LED is not green, it indicates the PON port is faulty.

- A. Right
- B. Wrong

Answer: B

Explanation:

This is wrong. A PON port LED not green may indicate several states-not only a hardware fault. It can mean the port is administratively shutdown, no ONUs are registered, or the port is in an alarm or idle state depending on the LED color and blinking pattern. Fault requires correlation with alarms and performance counters in U2000, not LED color alone.

References: HCIP-Access V2.5-OLT maintenance and alarm interpretation; Huawei OLT Hardware Description & Indicator Guide (PON port LED states and meanings).

NEW QUESTION # 32

The (radio) prerequisites for esight to automatically discover OLT and MXU devices by IP address are not included

- A. The SMMP parameters on the esight side have been configured and are aligned with the device side SP parameters.
- B. You already have the operation permission of "Resource Access".
- C. Esight and the device need to be on the same network segment, otherwise the device cannot be discovered using the ARP broadcast protocol.
- D. Esight and the device can be routed to communicate (ping each other).

Answer: C

NEW QUESTION # 33

In the evolution from EPON to 10G-EPON, a smooth transition is achieved at the central office by adding WDM modules, and ODNs can coexist/reuse.

- A. True
- B. False

Answer: A

Explanation:

IEEE 802.3av (10G-EPON) explicitly enables coexistence of 1G-EPON and 10G-EPON on the same outside plant (ODN) by separating downstream wavelengths (1G ~1480-1500 nm vs 10G ~1575-1580 nm) and using dual-rate TDMA in the upstream (10G uses 1260-1280 nm within the broader 1G band). This wavelength plan and OLT capabilities allow operators to reuse existing ODN and achieve a smooth upgrade via WDM overlays at the OLT. Industry and standards materials emphasize this approach for incremental migration.

NEW QUESTION # 34
