In other words, you can just feel rest assured to buy our C-SEC-2405 exam materials in this website and our advanced operation system will ensure the security of your personal information for all it's worth.

SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.

Topic 2	<ul style="list-style-type: none"> • Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 3	<ul style="list-style-type: none"> • Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Topic 4	<ul style="list-style-type: none"> • Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.

SAP Certified Associate - Security Administrator Sample Questions (Q35-Q40):

NEW QUESTION # 35

What does a status text value of "Old" mean during the maintenance of authorizations for an existing role?

- A. The field delivered with content was changed but the old value was retained.
- B. Field values were unchanged and no new authorization was added.
- C. Field values have not been changed.
- D. Field values were changed as a result of the merge process.

Answer: A

Explanation:

* Context: During role maintenance in SAP, status values indicate changes or actions applied to field values.

* Solution Explanation:

* A status of "Old" means the field value was delivered with content but has since been modified, retaining the old value.

SAP Security References:

* SAP Role Maintenance Guide (Transaction PFCG)

* SAP Authorization Concept Documentation

NEW QUESTION # 36

When performing a comparison from the imparting role, what happens to the organizational level field values in the derived role?

Note: There are 2 correct answers to this question.

- A. Data for organizational levels that have already been maintained in the derived role is overwritten.
- B. Data for organizational levels is always transferred when authorization data for the derived role is modified.
- C. Data for organizational levels that have already been maintained in the derived role is NOT overwritten.
- D. Data for organizational levels is transferred only when authorization data for the derived role is first modified.

Answer: C,D

Explanation:

When comparing an imparting role to a derived role:

* Preservation of Data (B): If organizational levels have already been maintained in the derived role, they are not overwritten to preserve specific configurations.

* Conditional Data Transfer (C): Organizational data is transferred only when the authorization data in the derived role is being modified for the first time.

* SAP Help Portal: Derived Role Maintenance

NEW QUESTION # 37

What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign authorization object S_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.
- B. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".
- **C. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.**
- D. Assign the authorization object to be checked to the chosen transaction code in the SAP Default authorization data using transaction SU22 and set Check Indicator to "Check".

Answer: C

Explanation:

To enforce an additional authorization check when a user starts an SAP transaction, you must assign the relevant authorization object and its permissions to the transaction code using transaction SE93. This transaction allows you to define or modify the properties of a transaction, including specifying authorization objects that must be checked when the transaction is executed. By linking the authorization object directly to the transaction in SE93, the system enforces the additional check at the point of transaction execution, ensuring that only authorized users can proceed. Transactions SU24 and SU22 are used for maintaining authorization defaults, but they do not directly enforce checks at transaction start, and S_START is specific to Fiori app authorizations, not general transactions.

NEW QUESTION # 38

What are some of the rules for SAP-developed roles in SAP S/4HANA Cloud Public Edition? Note: There are 3 correct answers to this question.

- **A. Role maintenance reads applications from a catalog.**
- **B. Authorization defaults define role authorizations.**
- **C. Catalogs are assigned to role menus.**
- D. Manual role authorizations are supported in custom catalogs.
- E. Role maintenance reads applications from role menus.

Answer: A,B,C

NEW QUESTION # 39

What authorization object can be used to restrict which users a security administrator is authorized to maintain?

- A. S_USER_GRD
- B. S_USER_GRP
- C. S_USER_AUTO
- **D. S_USER_SASO**

Answer: D

Explanation:

The authorization object S_USER_SASO (Security Administrator's Specific Object) is used to restrict the users that a security administrator can maintain. It ensures granular control over user maintenance activities.

SAP Security References:

- * SAP Authorization Object Documentation
- * SAP Note on User Administration and Maintenance

NEW QUESTION # 40

.....
