# 100% Pass Quiz 2026 3V0-21.23: VMware vSphere 8.x Advanced Design Accurate Latest Exam Practice

P.S. Free 2026 VMware 3V0-21.23 dumps are available on Google Drive shared by Actual4Labs: https://drive.google.com/open?id=1WPHXA4zqoq3_SYPc7aJpBKKFaFwzQbW1

Our company committed all versions of 3V0-21.23 practice materials attached with free update service. When 3V0-21.23 exam preparation has new updates, the customer services staff will send you the latest version. So we never stop the pace of offering the best services and 3V0-21.23 practice materials for you. And we offer you the free demo of our 3V0-21.23 Learning Materials to check the quality before payment. Tens of thousands of candidates have fostered learning abilities by using our 3V0-21.23 Learning materials you can be one of them definitely.

VMware 3V0-21.23 Exam Syllabus Topics:

Topic	Details
Topic 1	• IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers differentiating between business and technical requirements, as well as conceptual, logical, and physical design. A key skill measured is "Designing System Availability."
Topic 2	• Plan and Design the VMware Solution: This part targets Solution Designers, evaluating their ability to gather business objectives, create conceptual models based on these objectives, develop logical designs, and translate them into physical designs that meet specific requirements like manageability or security.
Topic 3	• VMware Products and Solutions: Targeting VMware Engineers, this section describes VMware Cloud Foundation architecture, its components like vSphere and NSX, benefits such as automation and scalability, and use cases like hybrid cloud environments. It assesses understanding of VMware Validated Solutions.

3V0-21.23 Valid Test Fee - 3V0-21.23 Test Objectives Pdf

There are a lot of experts and professors in our company. All 3V0-21.23 study torrent of our company are designed by these excellent experts and professors in different area. We can make sure that our 3V0-21.23 test torrent has a higher quality than other study materials. The aim of our design is to improving your learning and helping you gains your certification in the shortest time. If you long to gain the certification, our VMware vSphere 8.x Advanced Design guide torrent will be your best choice. Many experts and

professors consist of our design team, you do not need to be worried about the high quality of our 3V0-21.23 Test Torrent. If you decide to buy our study materials, you will have the opportunity to enjoy the best service.

VMware vSphere 8.x Advanced Design Sample Questions (Q69-Q74):

NEW QUESTION # 69
What is the purpose of vSphere Replication in a vSphere environment?

- A. To synchronize time between virtual machines and the host
- B. To enable replication of virtual machines to a recovery site for disaster recovery purposes
- C. To provide automatic backup of virtual machines to a secondary site
- D. To replicate virtual machines between vCenter Servers in linked mode

Answer: B

NEW QUESTION # 70
What is the purpose of determining storage segregation techniques in a given scenario?

- A. To ensure the design meets industry compliance requirements.
- B. To separate different types of data or workloads to achieve performance and security goals.
- C. To evaluate the storage protocols required for vSphere networking.
- D. To determine the hardware and infrastructure requirements for vSphere storage.

Answer: B

NEW QUESTION # 71
What does evaluating storage protocols in a given scenario involve?

- A. Determining the physical and storage connectivity topology.
- B. Identifying the network protocols required for vSphere networking.
- C. Ensuring that different storage segregation techniques are implemented in the vSphere environment.
- D. Selecting the most suitable storage protocol (e.g., NFS, iSCSI, Fibre Channel) based on specific requirements.

Answer: D

NEW QUESTION # 72
A company has a requirement that all production applications must have a maximum tolerable downtime (MTD) of one hour per month.
Which statement would be included in the conceptual design to support this requirement?

- A. Production applications will run in a dedicated Tier 2 cluster.
- B. Server hardware has been allocated for the production applications.
- C. vSphere Fault Tolerance (FT) will not be enabled for the production applications.
- D. vSphere HA Host Failure Response will be set to Restart VMs.

Answer: B

Explanation:
To meet the requirement of maximum tolerable downtime (MTD) of one hour per month, the system must ensure that in the event of a host failure, the production applications (virtual machines) are restarted as quickly as possible. Configuring vSphere HA Host Failure Response to Restart VMs ensures that VMs are automatically restarted on available hosts in the cluster if a host failure occurs. This setup minimizes downtime and ensures that the system can recover within the specified MTD of one hour per month.

NEW QUESTION # 73
An architect is designing a new vSphere-based solution for a customer.
During a requirement gathering workshop, the following information is provided:

The solution must have a primary and secondary site.

The solution must support a maximum of 1,000 concurrent workloads.

The profile of the workloads are as follows:

- Production Workloads
-- 300 x Small: 1 vCPU, 2 GB RAM
-- 400 x Medium: 2 vCPU, 6 GB RAM
-- 100 x Large: 4 vCPU, 8 GB RAM
- Development Workloads
-- 200 x Small: 1 vCPU, 2 GB RAM

The corporate security policy states that, during normal operations, production workloads must be physically segregated from development workloads.

All production workloads are split evenly across the primary and secondary site.

All development workloads run only within the secondary site.

In the event of a disaster affecting workloads in the primary site, the secondary site must be capable of running all production and development workloads.

The vCPU to physical core ratio should be a maximum of 10:1 for production workloads and 20:1 for development workloads.

The solution should provide a minimum of N + 1 resiliency at each component level.

The target physical host hardware platform has already been defined by the company's hardware standards and therefore each host has the following configuration:

-- 2 x 24 physical cores
-- 768 GB RAM
-- 2 x 100 GB SSD drives
-- 6 x 10 GbE network cards

What is the minimum number of hosts required to meet the requirements?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

NEW QUESTION # 74

......

Our delivery speed is also highly praised by customers. Our 3V0-21.23 exam dumps won't let you wait for such a long time. As long as you pay at our platform, we will deliver the relevant 3V0-21.23 test prep to your mailbox within 5-10 minutes. Our company attaches great importance to overall services, if there is any problem about the delivery of 3V0-21.23 Test Braindumps, please let us know, a message or an email will be available. We are pleased that you can spare some time to have a look for your reference about our 3V0-21.23 test prep.
