

Pass Guaranteed Microsoft - Professional PL-400 - Microsoft Power Platform Developer Certificate Exam

2026 Latest PDFDumps PL-400 PDF Dumps and PL-400 Exam Engine Free Share: <https://drive.google.com/open?id=1pbR1EZRNQag6c9HvLS9ewJ5TJAp2X4FB>

PL-400 learning materials have a variety of self-learning and self-assessment functions to test learning outcomes. PL-400 study guide is like a tutor, not only gives you a lot of knowledge, but also gives you a new set of learning methods. PL-400 Exam Practice is also equipped with a simulated examination system that simulates the real exam environment so that you can check your progress at any time.

Microsoft PL-400, also known as the Microsoft Power Platform Developer Exam, is a certification exam that validates a developer's knowledge and skills in building solutions using the Microsoft Power Platform. PL-400 exam is designed for professionals who have experience in developing and implementing the Power Platform, including Power Apps, Power Automate, Power BI, and Dataverse. PL-400 Exam measures the ability of developers to design, develop, secure, and troubleshoot Power Platform solutions.

Now we have good news for you: our PL-400 study materials will solve all your worries and help you successfully pass it. With the high pass rate as 98% to 100%, you will find that we have the best Microsoft Power Platform Developer PL-400 learning braindumps which contain the most accurate real exam questions.

Microsoft Power Platform Developer Sample Questions (Q196-Q201):

NEW QUESTION # 196

A company uses Dynamics 365 Sales and the Microsoft Online Services portal.

The multi-select OptionSet field data type is not supported in the portal.

You need to copy the selected field value to the text field.

How should you configure the Organization service request? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
Entity entity = (Entity) context.InputParameters["Target"];
var attributeRequest = new RetrieveAttributeRequest
{
    EntityLogicalName = "entityname",
    LogicalName = "fieldname",
    RetrieveAsIfPublished = 
};

var attributeResponse = (RetrieveAttributeResponse)
service.Execute(attributeRequest);
var attributeMetadata =
(EnumAttributeMetadata) attributeResponse.
```

<input type="checkbox"/>	AttributeMetadata
<input type="checkbox"/>	AttributeResponse
<input type="checkbox"/>	OptionMetadataCollection
<input type="checkbox"/>	MultiSelectPicklistAttributeMetadata

Answer:

Explanation:

```
Entity entity = (Entity) context.InputParameters["Target"];
var attributeRequest = new RetrieveAttributeRequest
```

```
:
```

```
    EntityLogicalName = "entityname",
    LogicalName = "fieldname",
```

```
    RetrieveAsIfPublished = 
};
```

<input checked="" type="checkbox"/>	true
<input type="checkbox"/>	false

```
var attributeResponse = (RetrieveAttributeResponse)
service.Execute(attributeRequest);
var attributeMetadata =
(EnumAttributeMetadata) attributeResponse.
```

<input checked="" type="checkbox"/>	AttributeMetadata
<input type="checkbox"/>	AttributeResponse
<input type="checkbox"/>	OptionMetadataCollection
<input type="checkbox"/>	MultiSelectPicklistAttributeMetadata

NEW QUESTION # 198

A company designs a Microsoft Dataverse Custom API to encapsulate business logic in it. The Custom API business logic must be encapsulated in a way that does not allow the business logic behavior to be modified or canceled.

You need to set the parameter value of the custom API so it cannot be customized.
Which parameter value should you set?

- A. Execute Privilege Name to prv. SdkMessageProcessingStep
- **B. Custom Processing Step to None**
- C. Binding Type to Entity
- D. Enabled for Workflow to No

Answer: B

NEW QUESTION # 199

A company is creating a new system based on Dynamics 365 Sales.

The company has the following requirements for their claim process:

Approval process must be the same for all claim applications.

Claim applications must go through approvers at each stage.

Fields must be shown or hidden, based on the requirements in the approval process.

You need to design the data model for the claim process using out-of-the-box components whenever possible.

Which features should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Feature				
Claim applications must go through the same approval process.	<table border="1"><tr><td>Workflow</td></tr><tr><td>Business process flow</td></tr><tr><td>Plug-ins</td></tr><tr><td>Custom workflow</td></tr></table>	Workflow	Business process flow	Plug-ins	Custom workflow
Workflow

NEW QUESTION # 200

User1 and User2 use a form named F1 to enter account data. Both users have the same security role, SR1, in the same business unit.

User1 has a business rule to make the main phone mandatory if the relationship type is Reseller. User2 must occasionally create records of the Reseller type without having the reseller's phone number and is blocked by User1's business rule.

You need to ensure that User2 can enter reseller data into the system.

Which three actions should perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct order you select.

Actions

- Copy the security role as SR2. Assign the SR2 security to User2 and remove the original security role SR1.
- Open form F1 and save it as a form named F2.
- Remove the business role from form F2.
- Set the SR1 security role to be the only role for form F1 and the SR2 role to be the only role for form F2.
- Create a business rule for form F2 to make the phone number optional for resellers.

Answer Area

Answer:

Explanation:

Actions	Answer Area
Copy the security role as SR2. Assign the SR2 security to User2 and remove the original security role SR1.	Open form F1 and save it as a form named F2.
Open form F1 and save it as a form named F2.	Remove the business role from form F2.
Remove the business role from form F2.	Create a business rule for form F2 to make the phone number optional for resellers.
Set the SR1 security role to be the only role for form F1 and the SR2 role to be the only role for form F2.	
Create a business rule for form F2 to make the phone number optional for resellers.	

Explanation

Open form F1 and save it as a form named F2.
Remove the business role from form F2.
Create a business rule for form F2 to make the phone number optional for resellers.

NEW QUESTION # 201

.....

By seeing your goofs you can work on your show continually for the Microsoft PL-400 approach.
