

CPIM-8.0資格認定 & CPIM-8.0試験問題解説集

CPIM

CERTIFIED IN PLANNING AND INVENTORY MANAGEMENT

MODULE CONTENT OUTLINE

The APICS CPIM Learning System delivers comprehensive, personalized, and streamlined CPIM exam preparation. Designed using a proven approach for teaching adult learners, this program helps you understand, apply and engage with CPIM-focused content.

CPIM 8.0 Learning System follows the APICS Exam Content Manual (ECM) version 8.0.

The CPIM Learning System and preparation courses are broken down into 8 modules.

Module 1: Supply Chains and Strategy

Section A: Supply Chains, the Environment, and Strategy

Section B: Strategic Scope and Objectives

Section C: Developing and Managing Organizational Strategy

Section D: Functional and Operational Strategies

Section E: Environments, Types, and Layouts

Section F: Performance Monitoring and KPIs

Section G: Risk Management

Section H: Capital Equipment and Facilities

Section I: Sustainability Strategies

Module 2: Sales and Operations Planning

Section A: S&OP Purpose and Process

Section B: Aggregate Demand and Supply Plans

Section C: Reconciling S&OP Plans

Module 3: Demand

Section A: Demand Management

Section B: Sources of Demand/Forecasting

Section C: Forecast Performance

APICS製品を購入する前に、無料でダウンロードして試用できるため、CPIM-8.0テスト準備を十分に理解できます。このように、クライアントは、ウェブサイト上で私たちのCertified in Planning and Inventory Management (CPIM 8.0)試験問題のページを訪問することができます。したがって、クライアントはCPIM-8.0試験問題をよ

く理解し、CPIM-8.0試験問題の品質を確認したので、CPIM-8.0トレーニングガイドを購入するかどうかを決定できます。Fast2testお客様に最高のCPIM-8.0学習ガイドを提供し、お客様に満足していただけるようにします。

APICS CPIM-8.0 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"> Quality, Technology, and Continuous Improvement: This section assesses skills of Quality Assurance Specialists, focusing on quality assurance methodologies enhanced by technology to drive continuous improvement efforts. A key skill measured here is "enhancing quality metrics."
トピック 2	<ul style="list-style-type: none"> Sales and Operations Planning: This module assesses the skills of Operations Planners in terms of sales and operations planning processes. It includes understanding the purpose of S&OP, creating aggregate demand plans, and reconciling these plans to ensure alignment between sales forecasts and operational capabilities. A crucial skill measured is "reconciling supply-demand gaps."
トピック 3	<ul style="list-style-type: none"> Demand: This section evaluates the abilities of Demand Analysts in managing demand through forecasting techniques. It explores sources of demand data for accurate forecasting and evaluating forecast performance to improve future predictions. One important skill evaluated is "forecasting demand accurately."
トピック 4	<ul style="list-style-type: none"> Supply Chains and Strategy: This section of the exam measures the skills of Supply Chain Managers and covers various aspects related to supply chains, including their interaction with the environment and strategic objectives. It delves into developing organizational strategies, functional strategies, performance monitoring using KPIs, risk management, capital equipment management, and sustainability strategies. A key skill assessed here is "analyzing market trends."

APICS Certified in Planning and Inventory Management (CPIM 8.0) 認定 CPIM-8.0 試験問題 (Q463-Q468):

質問 # 463

Which of the following production activity control (PAC) techniques focuses on optimizing output?

- A. Critical path management (CPM)
- **B. Theory of constraints (TOC) scheduling**
- C. Gantt chart
- D. Priority sequencing rules

正解: B

解説:

Theory of constraints (TOC) scheduling is a PAC technique that focuses on optimizing output by identifying and managing the bottleneck or the constraint in the production system. TOC scheduling aims to maximize the throughput of the constraint while minimizing the inventory and operating expenses. Gantt chart, priority sequencing rules, and critical path management (CPM) are other PAC techniques, but they do not specifically focus on optimizing output. Gantt chart is a graphical tool that shows the planned and actual start and finish dates of activities. Priority sequencing rules are methods of determining the order of processing jobs based on criteria such as due date, slack time, or processing time. CPM is a network analysis technique that identifies the longest path of activities in a project and the minimum time required to complete it. Reference:

[APICS CPIM Learning System Version 8.0], Module 4, Section C, p. 4-25

質問 # 464

Objective security metrics tend to be easier to gather, easier to interpret, and easier to include in reports to management.

What is the BEST objective metric for the effectiveness of a security awareness training?

- A. The management's attitude toward the training

- B. The number of times users comply with the training
- C. A change of helpdesk calls after the training
- D. The off-hand comments about the training

正解: C

質問 # 465

Which security concept states that a subject (user, application, or asset) be given only the access needed to complete a task?

- A. Role-Based Access Control (RBAC)
- B. Discretionary Access Control (DAC)
- C. Principle of least privilege
- D. Need to know

正解: C

質問 # 466

Moving average forecasting methods are best when demand shows:

- A. a clear trend.
- B. high random variation.
- C. consistent seasonality.
- D. a cyclical pattern.

正解: B

解説:

Moving average forecasting methods are best when demand shows high random variation, as they help to smooth out the noise and capture the underlying level of demand. Moving average methods use the average of the most recent observations as the forecast for the next period. They assign equal weights to all observations in the average, and drop the oldest observation when a new one becomes available. Moving average methods are not suitable for demand patterns that show a clear trend, consistent seasonality, or a cyclical pattern, as they cannot capture these components of demand. For these patterns, more sophisticated methods such as exponential smoothing or regression are needed. 質問 # 467

When performing threat modeling using Spoofing, Tampering, Repudiation, Information Disclosure, Denial Of Service, And Elevation of Privilege (STRIDE), which of the following is an example of a repudiation threat?

- A. Distributed Denial-Of-Service (DDoS)
- B. Using someone else's account
- C. SQL Injection (SQLi)
- D. Modifying a file

正解: B

質問 # 468
