Oracle 1z0-1057-25 Convenient PDF Format for Flexible Study

Do you want to pass the exam just for one time? If you do want choose our 1z0-1057-25 exam dumps. The pass rate is 98%, and pass guarantee and money back guarantee if you fail to pass the exam. Besides we also have the free demo for you to try, before buying, it will help you to have a general idea of the 1z0-1057-25 Exam Dumps. If you have any questions, please contact us directly, we will try our best to help you the problem, so don't hesitate to contact us.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q41-Q46):

NEW QUESTION # 41

When setting up capitalization options on a project type, you have decided to enable the Require Complete Asset Definition option. If this option is enabled, the "Transfer Assets to Oracle Fusion Assets" process will place asset lines with complete definition into which queue in Oracle Fusion Assets?

- A. Hold
- B. Posted
- C. New
- D. Post

Answer: A

Explanation:

If the Require Complete Asset Definition option is enabled on a project type, the "Transfer Assets to Oracle Fusion Assets" process will place asset lines with complete definition into the Hold queue in Oracle Fusion Assets. This queue holds the asset lines that require manual review and approval before they can be posted to the asset register. Asset lines with incomplete definition will be placed into the Error queue in Oracle Fusion Assets. This queue holds the asset lines that have errors or missing information that need to be corrected before they can be transferred to the Hold queue. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfin/manage-project-assets.html#OAPFM2356041>

NEW QUESTION # 42

Your client is involved in automation control systems installation. Over the years, they have analyzed their total project spend on specific resource classes. They have identified that their cost spread distribution factor on a 10 spread point scale resembles: 0-4-10-11-14-13-10-4-0-0. Identify two ways to handle this kind of a spread on their budgets and forecasts. (Choose two)

- A. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to a project template.
- B. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to the resource class.
- C. Use the predefined Bell Curve spread with small deviations on the spread points.
- D. Use the predefined S-Curve spread with small deviations on the spread points.

Answer: A,B

Explanation:

To handle a custom spread on budgets and forecasts, you can either create a new spread curve or edit an existing one to match the desired spread points. Then, you can attach the spread curve to a project template or a resource class, depending on whether you want to apply it to all projects using that template or all transactions using that resource class. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfin/define-project-budgets-and-forecasts.html#OAPFM2355819>

NEW QUESTION # 43

Your organization has been using project class categories and codes for reporting purposes and is set up at the project level. You recently defined a new project type, Capital-Contract, and created new class categories named Build, Operate, and Transfer (BOT) and Build, Transfer, and Maintain (BTM), with class codes of Yes/No. But on creation of a project, you are unable to associate these class categories and codes. Identify two setups that are mandatory for these class categories and codes to be displayed. (Choose two.)

- A. Class categories should be assigned to business unit.
- B. Class codes should be associated with a related set code.
- C. Class codes should be assigned to project unit.
- D. Class categories should be assigned to project type.

Answer: B,D

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-foundation-configuration-manage-project-types.html#OAPFM360164> Topic - Associating Project Types and Class Categories: Examples Project classifications group your projects according to categories and codes that you define. When you associate project classifications with project types, the classification is available for selection on projects with that project type.

Use any of the following methods to associate class categories with project types:

* Add a classification to the project type definition

For each classification that you associate with the project type, you can enable the Assign to All Projects option to automatically add the classification to the project definition for all new projects with the project type. When this option is enabled, all projects with this project type must be assigned a class code for the class category.

* Add a project type to the class category definition

* Enable the Assign to all Project Types option on the class category definition

NEW QUESTION # 44

Which component of performance measures allows you to select the method that is used to measure accounts such as budget, forecast, and actual?

- A. Category Member
- B. Time Member
- C. Accounts Member
- D. Scenario Member

Answer: C

Explanation:

The Accounts Member component of performance measures allows you to select the method that is used to measure accounts such as budget, forecast, and actual. The Accounts Member component defines the account dimension member for the performance measure, which represents the financial data that is measured. You can also specify the aggregation rule and calculation method for the account dimension member. Reference:

<https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-performance-reporting.html#OAPFM2356081>

NEW QUESTION # 45

You search for resources to fulfill a project resource request but are unable to proceed after receiving the following error message: "The search for resources cannot be completed because the project resource search index is not available. Contact your help desk." Identify the cause for this error message. (Choose the best answer.)

- A. The index is in the process of being updated.
- B. The index is not in the process.
- C. The most recent update of the index finished successfully.
- D. The index has been built.

Answer: A

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/fapfm/implementing-project-execution-management-applications.html#FAPFM1724547> Topic - Submitting the Process to Maintain Project Resource Search Index: Procedure Submit the Maintain Project Resource Search Index job set to update the resources that appear on the Search and Evaluate Resources page when a resource manager searches for resources to fulfill project resource requests. The job set consists of a set of processes that facilitate efficient and rapid searches for qualified resources.

Resource managers can't search for resources or view resource details if the search index isn't available for a project resource request with qualifications or keywords. For project resource requests without qualifications and keywords, resource managers can search for and evaluate resources based on resource availability even if the search index isn't current or available.

Caution: The search index isn't available if the Maintain Project Resource Search Index job set process fails, or while the process is running.

NEW QUESTION # 46

.....

Oracle 1z0-1057-25 exam include all the important concepts leaving behind the stories to tell for some other time. For the complete and quick Oracle 1z0-1057-25 preparation the Oracle 1z0-1057-25 Exam Questions are the best study material. With Oracle 1z0-1057-25 Exam Practice test questions you can ace your Oracle 1z0-1057-25 exam preparation simply and quickly to pass the final 1z0-1057-25 exam easily.
