Mule-101 Exam Vce 100% Pass | The Best Salesforce Vce Salesforce Certified MuleSoft Integration Foundations Files Pass for sure

It will provide you with the Salesforce Mule-101 dumps latest updates until 365 days after purchasing the Mule-101 exam questions. Above all, you will obtain these updates entirely free if the Salesforce Mule-101 certification authorities issue fresh updates. Lead2PassExam ensures that you will hold the prestigious Salesforce Mule-101 certificate on the first endeavor if you work consistently, taking help from our remarkable, up-to-date, and competitive Salesforce Mule-101 dumps.

If you choose our Mule-101 test engine, you are going to get the certification easily. As you can see the data on our website, there are tens of thousands of our worthy customers who have passed the exam and achieved their certification with the help of our Mule-101 learning guide. Just make your choice and purchase our Mule-101 study materials and start your study right now! Knowledge, achievement and happiness are waiting for you!

Free PDF 2026 Salesforce Perfect Mule-101: Salesforce Certified MuleSoft Integration Foundations Exam Vce

If you do not quickly begin to improve your own strength, the next one facing the unemployment crisis is you. The time is very tight, and choosing our Mule-101 study materials can save you a lot of time. And our Mule-101 Exam Questions can really save you time and efforts. If you study with our Mule-101 learning guide for 20 to 30 hours, then you will be able to pass the exam and get the certification.

Salesforce Certified MuleSoft Integration Foundations Sample Questions (Q54-Q59):

NEW QUESTION # 54

What is an ad8vantage that Anypoint Platf9orm offers by providing universal API management and Integration-Platform-as-a-Service (iPaaS) capabilities in a unified platform?

- A. Ability to use a single iPaaS to manage all API developer portals
- B. Ability to use a single iPaaS to manage and integrate all API gateways
- C. Ability to use a single control plane for both full-lifecycle API management and integration
- D. Ability to use a single connector to manage and integrate all APIs

Answer: C

Explanation:
Unified Platform: Many vendors offer either API Management (APIM) or Integration (iPaaS) as separate tools. Anypoint Platform combines them.
Single Control Plane: The primary advantage is having a single interface (The Anypoint Control Plane) where you can do everything: design APIs, build integrations, deploy them, govern them with policies, and monitor them.
Impact: This reduces complexity, lowers costs (no need to buy two separate stacks), and streamlines the workflow from development to operations.

NEW QUESTION # 55

CloudHub is an example of which cloud computing service model?

- A. Monitoring as a Service (MaaS)
- B. Software as a Service (SaaS)
- C. Infrastructure as a Service (IaaS)
- D. Platform as a Service (PaaS)

Answer: D

Explanation:
PaaS (Platform as a Service): CloudHub is MuleSoft's managed integration platform. In the NIST cloud model, it falls under iPaaS, which is a specialized form of PaaS.
The Model:
MuleSoft manages: The underlying infrastructure (AWS EC2 instances), operating systems, updates, security patching, and the Java/Mule Runtime environment.
Customer manages: The application code (Mule apps) and data.
Why it is not IaaS: In IaaS (like raw AWS EC2), the customer would be responsible for installing the OS, Java, and patching the server. In CloudHub, this is abstracted away.

NEW QUESTION # 56

A Kubernetes controller automatically adds another pod replica to the resource pool in response to increased application load.

- A. Diagonal
- B. Horizontal
- C. Vertical
- D. Down

Answer: B

Explanation:
Horizontal Scaling (Scale Out): This involves adding more instances (replicas/nodes) of a resource to handle increased load1111. In a Kubernetes or Runtime Fabric context, when the controller adds another "pod replica," it is strictly defined as horizontal scaling.
Vertical Scaling (Scale Up): This would involve increasing the size (CPU or RAM capacity) of an existing single instance/pod2, rather than adding more copies of it.
Context: MuleSoft's Runtime Fabric (RTF) runs on Kubernetes and leverages this horizontal auto-scaling capability to maintain performance under high traffic.

NEW QUESTION # 57

Which Anypoint Platform component should a MuleSoft developer use to create an API specification prior to building the API implementation?

- A. API Designer
- B. MDint (Likely typo in PDF, refers to MUnit or similar tools)
- C. Runtime Manager
- D. API Manager

Answer: A

Explanation:
Design-First Approach: The lifecycle starts with Design.
API Designer: This is the web-based tool within Design Center where developers write the API contract using RAML (RESTful API Modeling Language) or OAS (OpenAPI Specification). 9 Functionality: It provides syntax highlighting, error checking, and a "Mocking Service" that allows you to test the API's behavior before writing any actual code.
Why others are incorrect:
API Manager: Used after design to manage policies and gateways.
Runtime Manager: Used after build to deploy the application.

NEW QUESTION # 58
An API client makes an HTTP request to an API gateway with an Accept header containing the value "application/json".

- A. status('healthy')
- B. status>healthy</status>
- C. status: healthy
- D. {"status": "healthy"}

Answer: D

Explanation:
Content Negotiation: The HTTP Accept header is used by the client to tell the server what media type (format) it expects in the response4444.
application/json: This MIME type explicitly requests JSON (JavaScript Object Notation).
Analyzing the Options:
(B) {"status": "healthy"} is valid JSON format (Key-Value pair wrapped in braces).
(C) status>healthy</status> is XML.
(A) is YAML or Plain Text.

NEW QUESTION # 59
