Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q249-Q254):

NEW QUESTION # 249

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site! and the data loss prevention (DLP) policies shown in the following table.

Name	Priority	Rule
DLP1	0	Rule1
DLP2	1	Rule2
DLP3	2	Rule3
DLP4	3	Rule4

The DLP rules are configured as shown In the following table.

Rule	User notifications	Policy tip	If there's a match for this rule, stop processing additional DLP policies and rules
Rule1	On	Tip 1	Enabled
Rule2	On	Tip 2	Disabled
Rule3	On	Tip 3	Enabled
Rule4	On	Tip 4	Disabled

All the policies are assigned to Site1.

You need to ensure that if a user uploads a document to Site1 that matches all the rules, the user will be shown the Tip 2 policy tip. What should you do?

- A. Change the priority of DLP2 to 0.
- B. Enable additional processing of the policies if there is a match for Rule1.
- C. Change the priority of DLP2 to 3.
- D. Prevent additional processing of the policies if there is a match for Rule2

Answer: A

Explanation:
Current setup:
DLP1 (priority 0, Rule1) # Stop processing additional rules enabled # means if Rule1 matches, later rules (including Rule2 with Tip2) will never be evaluated.
Requirement: Ensure that if all rules match, the user sees Tip2 (Rule2's policy tip).
To fix this: Move DLP2 above DLP1 in priority (i.e., set DLP2 = priority 0). Then Rule2 will be evaluated first, and its policy tip (Tip2) will be displayed.
Why not others?
B). Prevent additional processing of the policies if there is a match for Rule2: That would stop processing later, but DLP1 would still block earlier due to its higher priority.
C). Change the priority of DLP2 to 3: That pushes it even lower, making it worse.
D). Enable additional processing for Rule1: Rule1 already has stop processing enabled. Changing that does not ensure Rule2 runs before Rule1, because priority is evaluated first.

Microsoft Learn: Order of rule processing in DLP

Policies with lower priority numbers run first, and "Stop processing" ends evaluation.
