Fire-Inspector-II 100% Exam Coverage

With our APP online version of our Fire-Inspector-II learning guide, the users only need to open the App link, you can quickly open the learning content in real time in the ways of the Fire-Inspector-II study materials, can let users anytime, anywhere learning through our App, greatly improving the use value of our Fire-Inspector-II Exam Prep, but also provide mock exams, timed test and on-line correction function, achieve multi-terminal equipment of common learning.

International Code Council 67 - Fire Inspector II Exam Sample Questions (Q19-Q24):

NEW QUESTION # 19

An acceptance test for a fire alarm system in a new apartment building should be scheduled after:

- A. the system has been installed and operating for one year.
- B. each zone is completed.
- C. the hydrostatic test of the underground main is completed.
- D. the contractor verifies full compliance.

Answer: D

Explanation:

IFC Section 901.5 (Acceptance Tests) requires fire protection systems, including fire alarms, to be tested upon completion to ensure compliance with NFPA 72 (National Fire Alarm and Signaling Code) and the IFC. The contractor's verification of full compliance (B) signals readiness for the official acceptance test by the fire code official, ensuring all components are installed and functional. Option A (zone-by-zone testing) is impractical for final acceptance. Option C ties the test to water supply, irrelevant to alarms. Option D (one year) is excessive and not required by IFC or NFPA 72 for initial acceptance. Thus, B is correct.

NEW QUESTION # 20

Evidence of a fire inspection report being written and delivered to the person in charge of the property:

- A. must be retained by the code official for a minimum of three years.
- B. must be copied to the building code official.
- C. must be copied to the city manager or mayor's office.
- D. forms the basis for any legal action.

Answer: D

Explanation:

Fire Inspection Report as Legal Documentation

A fire inspection report serves as an official record of inspection findings, compliance violations, and corrective actions required. It provides documented evidence that can be used in legal proceedings if enforcement actions are necessary.

2. Legal Basis and ICC Reference

According to the International Fire Code (IFC) and NFPA Standards, a properly documented inspection report ensures that violations are enforceable in court.

The ICC Fire Inspector Study Guide (2021) emphasizes that an inspection report is a critical legal document that supports the fire department or authority having jurisdiction (AHJ) in case of disputes or appeals.

3. Retention of Reports (Why Other Options Are Incorrect)

Option B (must be copied to the building code official) - Not necessarily required unless local jurisdiction mandates coordination between fire and building code officials.

Option C (must be copied to the city manager or mayor's office) - Fire inspection reports are not typically sent to city administration unless they involve significant violations or policy concerns.

Option D (must be retained by the code official for a minimum of three years) - While record retention is required, the period varies by jurisdiction (some require 3 years, others more), making this an incomplete and less universally correct answer.

NEW QUESTION # 21

Conditions that may exist and warrant a modification include all of the following except where the:

- A. special individual reason makes the strict letter of the code impractical.
- B. modification is in compliance with the intent and purpose of the code.
- C. modification does not lessen health, life, and fire safety.
- **D. modification requires the use of an alternative building material.**

Answer: D

Explanation:

Reference to Code Modifications and Equivalency Requirements:

According to International Fire Code (IFC 2021), Section 104.10, modifications may be granted if they meet the intent of the code and do not reduce fire and life safety.

The NFPA 1 (Fire Code) and NFPA 101 (Life Safety Code) also allow modifications under specific conditions, provided safety is maintained.

Understanding the Exception in the Question:

The question asks for conditions that DO NOT warrant a modification.

Using an alternative building material alone does not justify a modification unless it meets equivalent safety standards.

Code modifications are granted based on maintaining or improving safety, not simply changing materials.

Clarification of Incorrect Answer Choices:

A: Modification does not lessen health, life, and fire safety # Correct condition for modification, so incorrect answer IFC 104.10 allows modifications as long as safety is not compromised.

C: Modification is in compliance with the intent and purpose of the code # Correct condition for modification, so incorrect answer Codes provide flexibility if the intent of fire and life safety is still met.

D: Special individual reason makes the strict letter of the code impractical # Correct condition for modification, so incorrect answer Some codes allow modifications if strict compliance is impractical, provided alternative safety measures are implemented.

Conclusion:

The correct and verified answer is B (modification requires the use of an alternative building material) because material substitution alone does not justify a modification unless safety is maintained, as per IFC 104.10 and NFPA standards.

NEW QUESTION # 22

Given: A health club contains a 1,000-sq. ft. exercise room.

Based on the square footage, what is the calculated occupant load allowed for this exercise room?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

The occupant load of a space is determined using the 2021 International Building Code (IBC), Table 1004.5 - Maximum Floor Area Per Occupant.

IBC Table 1004.5 - Occupant Load Factor for Exercise Rooms:

The occupant load factor for an exercise room is 1 person per 20 square feet.

Given that the exercise room is 1,000 sq. ft.:

$1,000 \text{ sq. ft.} \div 20 \text{ sq. ft. per person} = 50 \text{ occupants}$

Why Other Options Are Incorrect?

A). 10 - Would require a 100 sq. ft. per person load factor, which is not applicable for exercise rooms.

B). 20 - Incorrect calculation; using the correct load factor, the actual number is 50.

C). 30 - Also incorrect based on the proper load factor.

Correct answer: D. 50

NEW QUESTION # 23

The occupant load of an R-2 building's common patio area is to be calculated using the value:

- A. assigned by the code official.
- B. 11 gross per person.
- C. 50 net per person.
- D. 15 gross per person.

Answer: D

Explanation:

The occupant load for an R-2 building's common patio area must be calculated using an occupant load factor.

The correct factor is 15 gross sq. ft. per person.

Reference to Fire Inspector Documentation:

1. 2021 International Building Code (IBC) - Table 1004.5 (Occupant Load Factor) For outdoor areas (such as patios and terraces), the applicable factor is 15 gross sq. ft. per person.
2. 2021 International Fire Code (IFC) - Section 1004.5 (Outdoor Occupant Loads) The 15 gross per person requirement is applied to common outdoor gathering areas in residential occupancies (R-2).

Detailed Explanation of Answer Choices:

Option A (Incorrect): 50 net per person applies to storage areas, not patios.

Option B (Incorrect): 11 gross per person is used for business occupancies (B), not residential patios.

Option C (Correct): 15 gross per person is the correct calculation factor for common outdoor spaces in R-2 buildings.

Option D (Incorrect): The code official does not assign occupant load values arbitrarily-they follow IBC Table 1004.5.

Thus, the correct and verified answer is: C. 15 gross per person.

NEW QUESTION # 24

.....

If you purchase our study materials to prepare the Fire-Inspector-II Exam, your passing rate will be much higher than others. Also, the operation of our study material is smooth and flexible and the system is stable and powerful. You can install the Fire-Inspector-II exam guide on your computers, mobile phone and other electronic devices. There are no restrictions to the number equipment you install. In short, it depends on your own choice. We sincerely hope that you can enjoy the good service of our products.
