

# JN0-224 Updated Demo, JN0-224 Valid Test Tutorial

JN0-224 Exam Details	
Vendor	Juniper
Exam Code	JN0-224
Full Exam Name	Automation and DevOps Associate
Number of Questions	65
Sample Questions	<a href="#">Juniper JN0-224 Sample Questions</a>
Practice Exams	<a href="#">Juniper Networks Certified Associate Automation and DevOps Practice Test</a>
Passing Score	Pass / Fail (60-70% Approx.)
Time Limit	90 minutes
Languages	English

100% Guaranteed Success with MWExam.com

2026 Latest TestPDF JN0-224 PDF Dumps and JN0-224 Exam Engine Free Share: <https://drive.google.com/open?id=1pmNmPU3rFJMCKoM42iMrTdez2q5dx6QH>

Our Software version of JN0-224 exam questions can carry on the simulation study, fully in accordance with the true real exam simulation, as well as the perfect timing system, at the end of the test is about to remind users to speed up the speed to solve the problem, the JN0-224 Training Materials let users for their own time to control has a more profound practical experience, thus effectively and perfectly improve user efficiency, let them do it keep up on JN0-224 exams.

We understand your itching desire of the exam. Do not be bemused about the exam. We will satisfy your aspiring goals. Our JN0-224 real questions are high efficient which can help you pass the exam during a week. We just contain all-important points of knowledge into our JN0-224 latest material. And we keep ameliorate our JN0-224 latest material according to requirements of JN0-224 exam. Besides, we arranged our JN0-224 Exam Prep with clear parts of knowledge. You may wonder whether our JN0-224 real questions are suitable for your current level of knowledge about computer, as a matter of fact, our JN0-224 exam prep applies to exam candidates of different degree. By practicing and remember the points in them, your review preparation will be highly effective and successful.

## Juniper JN0-224 Valid Test Tutorial, Valid Dumps JN0-224 Sheet

According to the needs of all people, the experts and professors in our company designed three different versions of the JN0-224 study materials for all customers. The three versions are very flexible for all customers to operate. According to your actual need, you can choose the version for yourself which is most suitable for you to preparing for the coming exam. All the JN0-224 Study Materials of our company can be found in the three versions. It is very flexible for you to use the three versions of the JN0-224 study materials to preparing for your coming exam.

### Juniper JN0-224 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>NETCONF</li><li>XML API: This domain focuses on XML syntax, XPath expressions, NETCONF protocol, and XML API functionality for programmatic device configuration and communication.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Rest API: This domain covers Junos REST API implementation, REST API Explorer tool, and cURL usage for HTTP-based device management and configuration.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Python</li><li>PyEZ: This domain examines Python programming with PyEZ library for Junos automation, including JSNAPy, Jinja2 templates, RPC calls, exception handling, and device configuration management.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Junos Automation Stack and DevOps Concepts: This domain covers fundamental automation tools, frameworks, APIs, and DevOps culture applicable to Junos platform operations and network management.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Data Serialization: This domain addresses YAML and JSON formats used for structured data representation and exchange in network automation workflows.</li> </ul>

## Juniper Automation and DevOps, Associate (JNCIA-DevOps) Sample Questions (Q61-Q66):

### NEW QUESTION # 61

Exhibit.

```

...
rest (
  http (
    port 3000;
  )
  traceoptions (
    flag all;
  )
  enable-explorer;
)
...
web-management {
  http;
  https (
    system-generated-certificate;
  )
}
...

user@router> show configuration interfaces
ge-0/0/0 {
  unit 0 {
    family inet6 {
      address 2001:db8:0:1::/64;
    }
  }
}

```

You have the configuration shown in the exhibit, but are unable to access the REST API Explorer. Which configuration is necessary to solve this problem?

- A. Configure a firewall filter to explicitly permit SSH.
- B. Configure a secondary IPv6 address on ge-0/0/0.0.
- C. Configure the rest service to be active on port 80.
- D. Configure an IPv4 address on ge-0/0/0 0.

Answer: B

### NEW QUESTION # 62

Which Junos configuration database is updated by PyEZ by default?

- A. dynamic
- B. shared
- C. private
- D. ephemeral

**Answer: C**

Explanation:

An event script is used to automate responses to system events in Junos, such as an interface going down. These scripts are triggered automatically when a specified event occurs, making them suitable for tasks like monitoring interface status and executing actions when the status changes.

Option B (event) is correct because event scripts are designed for reacting to system events like an interface going down.

Option A (commit) is used for configuration changes, Option C (operation) is used for operational tasks, and Option D (SNMP) is not applicable in this context.

Supporting Reference:

Juniper Networks Event Scripts Documentation: Details how event scripts are used to automate responses to specific system events in Junos

### NEW QUESTION # 63

What is the difference between a list and a tuple in Python?

- A. Lists are mutable objects that use square brackets, and tuples are immutable objects that use parentheses.
- B. Lists are immutable objects that use parentheses, and tuples are immutable objects that use square brackets.
- C. Lists are immutable objects that use square brackets, and tuples are mutable objects that use parentheses.
- D. Lists are mutable objects that use parentheses, and tuples are immutable objects that use square brackets.

**Answer: A**

Explanation:

In Python, the distinction between lists and tuples is essential for efficient programming:

Lists:

Mutable (B): This means that once a list is created, its elements can be changed, added, or removed. Lists are versatile and commonly used when the data is expected to change.

Square Brackets: Lists are defined using square brackets [].

Example:

```
my_list = [1, 2, 3]
my_list[0] = 10 # Modifying the first element
```

Tuples:

Immutable (B): Once a tuple is created, it cannot be altered. Tuples are used when a fixed collection of items is needed, providing more integrity to the data.

Parentheses: Tuples are defined using parentheses ().

Example:

```
my_tuple = (1, 2, 3)
# my_tuple[0] = 10 # This would raise an error because tuples are immutable
```

Python Official Documentation: The Python Language Reference provides detailed information on data types like lists and tuples, including their mutability and syntax.

Automation Scripts: In the context of automation, understanding when to use mutable or immutable data structures can significantly impact script performance and reliability.

### NEW QUESTION # 64

Given the following Python script:

```
a = [1,2,3,4,5,6,7,8,9]
print(a[0])
```

What is the output of this print command?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

Explanation:

In Python, lists are zero-indexed, meaning the first element of the list is at index 0. The given script is:

```
pythona = [1, 2, 3, 4, 5, 6, 7, 8, 9]
```

```
print(a[0])
```

a[0] refers to the first element in the list a, which is 1.

So, the output of the print(a[0]) command is 1.

Option A is correct because Python indexing starts at 0, making the first element of the list at index 0.

Reference:

Python Official Documentation: Covers list indexing and operations.

Python Programming Tutorials: Provide examples of list indexing.

### NEW QUESTION # 65

You want to perform a dry run on the myPlays playbook and use a custom inventory file called myRouters.ini.

Which Ansible command would you use in this scenario?

- A. ansible-playbook myPlays --check -i myRouters.ini
- B. ansible-playbook myPlays -limit myRouters
- C. ansible-playbook myPlays -extra-vars "inventory\_file=myRouters .ini"
- D. ansible-playbook myPlays -extra-vars "dry run=True" myRouters.ini

**Answer: C**

### NEW QUESTION # 66

.....

Maybe though you believe that our our JN0-224 exam questions are quite good, you still worry that the pass rate. Then the data may make you more at ease. The passing rate of JN0-224 preparation prep reached 99%, which is a very incredible value, but we did. If you want to know more about our products, you can consult our staff, or you can download our free trial version of our JN0-224 Practice Engine. We are looking forward to your joining.
