Slack-Admn-201높은 통과율 덤프자료 인증시험공부

Salesforce인증 Slack-Admn-201시험을 패스하기 위하여 잠을 설쳐가며 시험준비 공부를 하고 계신 분들은 이 글을 보는 즉시 공부방법이 틀렸구나 하는 생각이 들것입니다. Fast2test의Salesforce인증 Slack-Admn-201덤프는 실제시험을 대비하여 제작한 최신버전 공부자료로서 문항수도 적합하여 불필요한 공부는 하지 않으셔도 되게끔 만들어져 있습니다.가격도 착하고 시험패스율 높은Fast2test의Salesforce인증 Slack-Admn-201덤프를 애용해보세요. 놀라운 기적을 안겨드릴것입니다.

최신 Salesforce Administrator Slack-Admn-201 무료샘플문제 (Q210-Q215):

질문 # 210

Your Slack Governance Support model includes a group of people designated as Workspace Admins to distribute the workload. What is a key benefit of setting up a user group for the Workspace Admins?

- A. People that the team works with in Slack Connect can be added to the user group in order to work more closely with the Workspace Admins on certain issues.
- B. Any @mention of the Workspace Admin user group will notify all of the group members, allowing any Slack member to send questions to the group.
- C. Any Slack member by default can add themselves to the Workspace Admin user group to follow along with their activities.
- D. Any Enterprise Grid member can @mention the user group from any workspace within the Enterprise Grid org to send a notification to all of the user group members.

정답: B

설명:

Slack user group functionality explains:

"When a user group is @mentioned, all members of the user group are notified, making it easy for others to reach all members at once for questions or updates." Option A is misleading because visibility of user groups depends on workspace settings. B and C

are inaccurate - external users cannot be added, and users cannot add themselves to user groups.
(Reference: Slack Administration Study Guide - Using User Groups)

질문 # 211

You built a workflow using Workflow Builder that shares onboarding info with project team members. The project has pivoted, and the onboarding workflow info is outdated. How do you ensure new team members receive the correct information?

- A. Download the workflow file, edit the JSON file, and import the updated workflow file.
- **B. Unpublish your workflow, modify the workflow steps, and republish your workflow.**
- C. Delete your workflow and create a new workflow with the updated project information.
- D. Add a new step to your workflow calling out what has changed since the previous iteration.

정답: B

설명:

Slack's Workflow Builder guidance states:

"To update an existing workflow, unpublish it, make edits to the steps or messages, and republish it." Editing JSON manually (B) is unnecessary. Adding a step (C) is a patch, not a real fix. Deleting and rebuilding (D) is inefficient when Slack allows direct editing.
(Reference: Slack Administration Study Guide - Managing Workflows)

-

질문 # 212

You're the Primary Owner of your company's Slack Business+ workspace. You need more assistance managing users and channels, so you task the Head of IT with these duties.

In order to be able to perform these duties, what is the role with the fewest privileges that the Head of IT should be assigned?
(Select the best answer.)

- A. Workspace Owner
- B. Member
- **C. Workspace Admin**
- D. Org Admin

정답: C

설명:

According to Slack role definitions:

"Workspace Admins can manage members, channels, and settings for the workspace without the broader privileges of Workspace Owners or Org Admins." Org Admin (A) is too high-level for this task on Business+ (Org Admin is primarily an Enterprise Grid role).

Workspace Owner (C) has more extensive authority, including transferring workspace ownership. Member (D) cannot manage users or channels.

(Reference: Slack Administration Study Guide - Roles and Permissions)

-

질문 # 213

Anna, a Workspace Owner, has decided to restrict channel creation in her workspace to Workspace Admins only. This will allow her and the other Workspace Admins to enforce channel naming conventions.

What are two best practices Workspace Admins should follow in this scenario? (Choose two.)

- **A. Keep up to date on all channel naming conventions to accurately process requests.**
- **B. Create a process for channel requests.**
- C. Prepare for a decrease in workload since channel requests will need to be processed less frequently.
- D. Appoint other members of their workspace to help with the workload.

정답: A,B

설명:

When restricting channel creation to Workspace Admins, Slack's best practices recommend:
"Admins should maintain familiarity with naming conventions to process channel requests consistently.
Additionally, setting up a clear, efficient channel request process ensures members know how to request new channels and receive prompt responses." Option B is incorrect - restricting channel creation usually increases the admin workload. Option D is not directly aligned with Slack best practices, as permissions to create channels would still be limited to Admins.
(Reference: Slack Administration Study Guide - Channel Management and Naming Governance)

-

질문 # 214

You're a Workspace Owner introducing Slack to your organization for the first time.
In order to encourage employees to use Slack, you've organized a contest to see who can send the most messages in Slack channels in a week.
What's the best way to determine the winner?
(Select the best answer.)

- A. View the Members tab in the Slack analytics dashboard.
- B. Export messages from your workspace to view message data offline.
- C. View the Channels tab in the Slack analytics dashboard.
- D. Install a custom bot in each channel to count all messages.

정답: A

설명:

Slack's analytics dashboard provides detailed activity metrics per user:
"The Members tab in the analytics dashboard shows the number of messages sent by each member, making it easy to track individual engagement." The Channels tab tracks activity per channel, not per user.
Installing a bot (option B) or exporting messages (option D) would be unnecessary and complex when Slack's native analytics already provide this data.
