

# 100% Free AIGP–100% Free Latest Exam Questions | the Best IAPP Certified Artificial Intelligence Governance Professional Actual Dumps

P.S. Free & New AIGP dumps are available on Google Drive shared by PrepAwayPDF: [https://drive.google.com/open?id=1PLrO8pN5OReicWll1h\\_TyHTs2HvHPH\\_o](https://drive.google.com/open?id=1PLrO8pN5OReicWll1h_TyHTs2HvHPH_o)

No matter how good the product is users will encounter some difficult problems in the process of use, and how to deal with these problems quickly becomes a standard to test the level of product service. Our AIGP real exam materials are not exceptional also, in order to enjoy the best product experience, as long as the user is in use process found any problem, can timely feedback to us, for the first time you check our AIGP Exam Question performance, professional maintenance staff to help users solve problems. Our AIGP learning reference files have a high efficient product maintenance team, a professional staff every day real-time monitoring the use of the user environment and learning platform security, even in the incubation period, we can accurate solution for the user, for the use of the user to create a safer environment.

With our outstanding AIGP exam questions, we can assure you a 99% percent pass rate. Due to continuous efforts of our experts, we have exactly targeted the content of the AIGP exam. You will pass the exam after 20 to 30 hours' learning with our AIGP Study Material. Many users have witnessed the effectiveness of our AIGP guide exam you surely will become one of them. Try it right now!

# 2026 Latest AIGP Exam Questions - IAPP Certified Artificial Intelligence Governance Professional Realistic Actual Dumps Free PDF Quiz

Our AIGP study guide provides free trial services, so that you can gain some information about our study contents, topics and how to make full use of the software before purchasing. It's a good way for you to choose what kind of AIGP test prep is suitable and make the right choice to avoid unnecessary waste. Besides, if you have any trouble in the purchasing AIGP practice torrent or trail process, you can contact us immediately and we will provide professional experts to help you online.

## IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Understanding How to Govern AI Development:</b> This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Understanding How Laws, Standards, and Frameworks Apply to AI:</b> This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Understanding the Foundations of AI Governance:</b> This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• <b>Understanding How to Govern AI Deployment and Use:</b> This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li></ul>

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q85-Q90):

### NEW QUESTION # 85

An AI system's function, the industry and the location in which it operates are important factors in considering which of the following?

- A. Organizational accountability.
- B. Diversity of data sources.
- **C. Internal governance needs.**
- D. Explainability of results.

**Answer: C**

Explanation:

The AI system's function, industry, and operational location influence the internal governance needs necessary to ensure compliance, risk management, and ethical considerations appropriate to the context.

### NEW QUESTION # 86

Scenario:

A company is using different types of AI systems to enhance consumer engagement. These include chatbots, recommendation engines, and automated content generation tools.

Which of the following situations would be least likely to raise concerns under existing consumer protection laws?

- A. An AI tool using scraped digital content to generate news summaries on a publishing website
- B. An AI algorithm being used in a credit decision-making process by a financial institution
- C. An online platform offering recommendations to its users by displaying user-specific content and targeted advertisements
- D. An AI customer service system claiming that it is as accurate as a human support agent

**Answer: C**

Explanation:

The correct answer is D. Personalized content and advertisements, as long as properly disclosed and non-deceptive, are not generally a consumer protection issue under current legal regimes.

From the AI Governance in Practice Report 2024 (Consumer Protection Section):

"Standard practices like targeted advertising and recommendations are widely accepted provided they comply with transparency and consent requirements." Meanwhile, credit decision-making and misleading AI performance claims (Answers A and B) have already led to regulatory enforcement.

The AIGP ILT Guide highlights:

"Deceptive claims, biased financial decisions, and unauthorized data use may violate consumer protection and privacy laws. Advertising personalization is routine but must be disclosed appropriately."

### NEW QUESTION # 87

#### CASE STUDY

Please use the following to answer the next question:

A global marketing agency is adapting a large language model ("LLM") to generate content for an upcoming marketing campaign for a client's new product: a hard hat designed for construction workers of any gender to better protect them from head injuries.

The marketing agency is accessing the LLM through an application programming interface ("API") developed by a third-party technology company. They want to generate text to be used for targeted advertising communications that highlight the benefits of the hard hat to potential purchasers. Both the marketing agency and the technology company have taken reasonable steps to address AI governance.

The marketing company has:

- Entered into a contract with the technology company with suitable representations and warranties.
- Completed an impact assessment on the LLM for this intended use.
- Built technical guidance on how to measure and mitigate bias in the LLM.
- Enabled technical aspects of transparency, explainability, robustness and privacy.
- Followed applicable regulatory requirements.
- Created specific legal statements and disclosures regarding the use of the AI on its client's advertising.

The technology company has:

- Provided guidance and resources to developers to address environmental concerns.
- Built technical guidance on how to measure and mitigate bias in the LLM.
- Provided tools and resources to measure bias specific to the LLM.
- Enabled technical aspects of transparency, explainability, robustness and privacy.
- Mapped and mitigated potential societal harms and large-scale impacts.
- Followed applicable regulatory requirements and industry standards.
- Created specific legal statements and disclosures regarding the LLM,

including with respect to IP and rights to data.

Which stakeholder is responsible for lawful collection of data for the training of the foundational AI model?

- A. The marketing agency's client.
- B. The marketing agency.
- C. The data aggregator.
- **D. The tech company.**

**Answer: D**

### NEW QUESTION # 88

Business A sells software that provides users with writing and grammar assistance. Business B is a cloud services provider that trains its own AI models.

\* Business A has decided to add generative AI features to their software.

\* Rather than create their own generative AI model, Business A has chosen to license a model from Business B.

\* Business A will then integrate the model into their writing assistance software to provide generative AI capabilities.

\* Business A is most concerned that its writing assistance software could recommend toxic or obscene text to its users.

Which of the following governance processes should Business A take to best protect its users against potentially inappropriate text?

- A. Business A should fine-tune the AI model on user-generated text that has been verified to be appropriate.
- B. Business A should establish a user reporting feature that allows users to flag toxic or obscene text, and report any incidents to Business B.
- **C. Business A should test that the AI model performs as expected and meets their minimum requirements for filtering toxic or obscene text.**
- D. Business A should ask Business B for detailed documentation on the generative AI model's training data and whether it contained toxic or obscene sources.

**Answer: C**

Explanation:

Business A is integrating a generative AI model licensed from a third party (Business B) and is primarily concerned with the risk of toxic or obscene outputs being delivered to users. In this scenario, testing and validation of the AI model for such content risks is the most direct and effective governance strategy.

According to the AI Governance in Practice Report 2025, organizations that deploy AI must engage in performance monitoring protocols and ensure systems perform adequately for their intended purposes, including filtering harmful content:

"Operational governance... development of: #Performance monitoring protocols to ensure systems perform adequately for their intended purposes." (p. 12)

"Product governance... includes: #System impact assessments to identify and address risk prior to product development or deployment." (p. 11) Furthermore, under the EU AI Act, which sets the global standard many organizations aim to align with, there is a clear obligation to test and monitor systems for potential harmful behavior:

"The act imposes regulatory obligations... such as establishing appropriate accountability structures, assessing system impact, providing technical documentation, establishing risk management protocols and monitoring performance..." (p. 7) Option B directly reflects this best practice of pre-deployment testing and validation to ensure that the model aligns with Business A's minimum content safety requirements.

Let's now evaluate the incorrect options:

\* A. Fine-tuning on verified user-generated text may improve model alignment but does not guarantee that the model will generalize correctly, especially if Business A lacks access to model internals (common in third-party licensing scenarios). Fine-tuning also introduces its own risks and may be contractually restricted.

\* C. A user reporting feature is reactive, not preventive. While helpful for long-term monitoring and mitigation, it does not prevent the initial harm of toxic outputs, which is Business A's primary concern.

\* D. Requesting documentation from Business B is useful for transparency and risk management, but it does not replace independent verification that the model meets Business A's content safety standards.

Thus, testing the model's behavior for unacceptable outputs before deployment is the most aligned approach with AI governance best practices and obligations.

### NEW QUESTION # 89

A company deploys an AI model for fraud detection in online transactions. During its operation, the model begins to exhibit high rates of false positives, flagging legitimate transactions as fraudulent.

Which is the best step the company should take to address this development?

- A. Maintain records of all false positives.
- B. Conduct training for customer service teams to handle flagged transactions.
- C. Dedicate more resources to monitor the model.
- **D. Deactivate the model until an assessment is made.**

**Answer: D**

Explanation:

When an AI system causes significant false positives, especially in sensitive contexts like fraud detection, the priority is to halt harmful activity and perform a full assessment. Continued use without understanding the fault may cause further customer harm and legal exposure.

From the AI Governance in Practice Report 2025:

"Incident management plans should enable identification, escalation, and system rollback to prevent continued harm from malfunctioning AI systems." (p. 12, 35)

## NEW QUESTION # 90

.....

People who want to pass the exam have difficulty in choosing the suitable AIGP guide questions. They do not know which study materials are suitable for them, and they do not know which the study materials are best. Our company can promise that the AIGP study materials from our company are best among global market. As is known to us, the AIGP Certification guide from our company is the leading practice materials in this dynamic market. All study materials from our company are designed by a lot of experts and professors. In addition, these experts and professors from our company are responsible for constantly updating the AIGP guide questions.
