All the Google Associate Cloud Engineer Exam (Associate-Cloud-Engineer) questions given in the product are based on actual examination topics.

## Google Associate Cloud Engineer Exam Sample Questions (Q147-Q152):

### NEW QUESTION # 147

Your organization has three existing Google Cloud projects. You need to bill the Marketing department for only their Google Cloud services for a new initiative within their group. What should you do?

- A. 1. Verify that you are assigned the Organization Administrator IAM role for your organization's Google Cloud account  
2. Create a new Google Cloud Project for the Marketing department  
3. Set the default key value project labels to department marketing for all services in this protect
- B. 1. Verify that you are assigned the Billing Administrator IAM role for your organization's Google Cloud account  
2. Create a new Google Cloud Project for the Marketing department  
3. Set the default key-value project labels to department marketing for all services in this project

- C. 1. Verify that you are assigned the Billing Administrator IAM role for your organization's Google Cloud Project for the Marketing department  
2. Link the new project to a Marketing Billing Account
- D. 1. Verify that you are assigned the Organization Administrator IAM role for your organization's Google Cloud account  
2. Create a new Google Cloud Project for the Marketing department 3. Link the new project to a Marketing Billing Account.

**Answer: C**

#### NEW QUESTION # 148

You deployed a new application inside your Google Kubernetes Engine cluster using the YAML file specified below.

□ You check the status of the deployed pods and notice that one of them is still in PENDING status:

□ You want to find out why the pod is stuck in pending status. What should you do?

- A. Review details of the myapp-service Service object and check for error messages.
- B. Review details of the myapp-deployment Deployment object and check for error messages.
- C. View logs of the container in myapp-deployment-58ddb995-lp86m pod and check for warning messages.
- D. Review details of myapp-deployment-58ddb995-lp86m Pod and check for warning messages.

**Answer: D**

#### NEW QUESTION # 149

You are deploying an application to App Engine. You want the number of instances to scale based on request rate. You need at least 3 unoccupied instances at all times. Which scaling type should you use?

- A. Basic Scaling with max\_instances set to 3.
- B. Basic Scaling with min\_instances set to 3.
- C. Manual Scaling with 3 instances.
- D. Automatic Scaling with min\_idle\_instances set to 3.

**Answer: D**

Explanation:

App Engine supports the following scaling types, which controls how and when instances are created:

Automatic

Basic

Manual

You specify the scaling type in your app's app.yaml.

Automatic scaling

Automatic scaling creates instances based on request rate, response latencies, and other application metrics. You can specify thresholds for each of these metrics, as well as a minimum number instances to keep running at all times.

<https://cloud.google.com/appengine/docs/standard/python/how-instances-are-managed>

#### NEW QUESTION # 150

Your company's infrastructure is on-premises, but all machines are running at maximum capacity.

You want to burst to Google Cloud. The workloads on Google Cloud must be able to directly communicate to the workloads on-premises using a private IP range. What should you do?

- A. Create bastion hosts both in your on-premises environment and on Google Cloud. Configure both as proxy servers using their public IP addresses.
- B. In Google Cloud, configure the VPC as a host for Shared VPC.
- C. Set up Cloud VPN between the infrastructure on-premises and Google Cloud.
- D. In Google Cloud, configure the VPC for VPC Network Peering.

**Answer: C**

Explanation:

vpc network peering does not connect to on-prem. Cloud VPN is the correct solution.

### NEW QUESTION # 151

Your company runs its Linux workloads on Compute Engine instances. Your company will be working with a new operations partner that does not use Google Accounts. You need to grant access to the instances to your operations partner so they can maintain the installed tooling. What should you do?

- A. Enable Cloud IAP for the Compute Engine instances, and add the operations partner as a Cloud IAP Tunnel User.
- **B. Tag all the instances with the same network tag. Create a firewall rule in the VPC to grant TCP access on port 22 for traffic from the operations partner to instances with the network tag.**
- C. Set up Cloud VPN between your Google Cloud VPC and the internal network of the operations partner.
- D. Ask the operations partner to generate SSH key pairs, and add the public keys to the VM instances.

**Answer: B**

### NEW QUESTION # 152

.....

Our passing rate is 99% and our product boosts high hit rate. Our Associate-Cloud-Engineer test torrents are compiled by professionals and the answers and the questions we provide are based on the real exam. The content of our Associate-Cloud-Engineer exam questions is simple to be understood and mastered. To let you get well preparation for the exam, our software provides the function to stimulate the real exam and the timing function to help you adjust the speed. Based on those merits of our Associate-Cloud-Engineer Guide Torrent you can pass the exam with high possibility.
