After consistent practice, the final exam will not be too difficult for a student who has already practiced from real EC-COUNCIL 712-50 exam questions.

The CCISO certification exam is highly regarded in the information security industry and is considered a benchmark for information security professionals who want to demonstrate their knowledge and expertise in the field. EC-Council Certified CISO (CCISO) certification is recognized by many organizations and is often a requirement for senior-level information security positions.

The CCISO certification is designed for professionals who have significant experience in the field of information security. EC-Council Certified CISO (CCISO) certification program is not aimed at entry-level professionals. Candidates who wish to take the EC-Council 712-50 Exam must have at least five years of experience in three or more of the five domains covered in the exam. This requirement ensures that only experienced and skilled professionals can become certified CISOs.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q153-Q158):

NEW QUESTION # 153

What are the primary reasons for the development of a business case for a security project?

- A. To understand the attack vectors and attack sources
- **B. To communicate risk and forecast resource needs**
- C. To estimate risk and negate liability to the company
- D. To forecast usage and cost per software licensing

Answer: B

Explanation:

Purpose of a Business Case

A business case for a security project is developed to:

- * Communicate risks to stakeholders.
- * Provide a justification for resource allocation and investment.
- * Forecast budgetary and resource requirements.

Comparison of Options

- * A. Estimate risk and negate liability: Business cases estimate risk but do not primarily negate liability.
- * B. Understand attack vectors and sources: While important, this is not the primary focus of a business case.
- * D. Forecast usage and cost per software licensing: This may be part of a business case but is not its primary purpose.

EC-Council References

* Emphasized in EC-Council frameworks, a business case is essential for aligning security projects with organizational priorities and securing executive buy-in.

NEW QUESTION # 154

Answer: B

NEW QUESTION # 157

Scenario: An organization has made a decision to address Information Security formally and consistently by adopting established best practices and industry standards. The organization is a small retail merchant but it is expected to grow to a global customer base of many millions of customers in just a few years.

Which of the following would be the FIRST step when addressing Information Security formally and consistently in this organization?

- A. Define formal roles and responsibilities for Information Security
- B. Contract a third party to perform a security risk assessment
- C. Create an executive security steering committee
- D. Define formal roles and responsibilities for Internal audit functions

Answer: A

Explanation:

First Steps in Formalizing Security

* Defining roles and responsibilities ensures accountability and clarity for security tasks. It establishes a foundation for building a structured security program.

* Key roles, such as the CISO and IT security team, are pivotal for aligning security strategies with organizational goals.

Why Not Other Options?

* A. Security risk assessment: Important but follows the establishment of roles and responsibilities.

* B. Internal audit functions: Pertains to compliance and governance, not the first foundational step.

* D. Executive security steering committee: Helps with strategic alignment but is secondary to defining roles.

EC-Council References

* EC-Council underscores the need for clearly defined security roles as a critical step in program development.
