SPLK-3002 guide torrent & testking SPLK-3002 test & SPLK-3002 pass king

If you really intend to pass the SPLK-3002 exam, our software will provide you the fast and convenient learning and you will get the best study materials and get a very good preparation for the exam. The content of the SPLK-3002 guide torrent is easy to be mastered and has simplified the important information. What's more, our SPLK-3002 prep torrent conveys more important information with less questions and answers. The learning is relaxed and highly efficiently with our SPLK-3002 exam questions.

Splunk SPLK-3002 Exam is a vendor-neutral certification that is recognized globally. Splunk IT Service Intelligence Certified Admin certification provides IT professionals with a competitive edge in the job market and demonstrates their commitment to keeping up with the latest technologies and trends in IT operations and analytics. Splunk IT Service Intelligence Certified Admin certification is also a valuable credential for IT professionals who work in organizations that rely on Splunk IT Service Intelligence to monitor and manage their IT infrastructure.

Splunk SPLK-3002 Reliable Exam Test & Study Guide SPLK-3002 Pdf

It is browser-based; therefore no need to install it, and you can start practicing for the Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam by creating the Splunk SPLK-3002 practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam. Actual4Exams Splunk IT Service Intelligence Certified Admin (SPLK-3002) web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q45-Q50):

NEW QUESTION # 45
There are two departments using ITSI. Finance and Sales. Analysts in each department should not be allowed to see each other's services. What are the role configuration steps required to accomplish this?

- A. itoa_finance_admin, inherited from itoa_admin; itoa_sales_admin, inherited from itoa_team_admin; itoa_finance_analyst, inherited from itoa_analyst; itoa_sales_analyst, inherited from itoa_analyst.
- B. itoa_finance_admin, inherited from itoa_team_admin; itoa_sales_admin, inherited from itoa_team_admin; itoa_finance_analyst, inherited from itoa_analyst; itoa_sales_analyst, inherited from itoa_analyst.
- C. itoa_finance_admin, inherited from itoa_admin; itoa_sales_admin, inherited from itoa_team_admin; itoa_finance_analyst, inherited from itoa_analyst; itoa_sales_analyst, inherited from itoa_team_analyst.
- D. itoa_finance_admin, inherited from itoa_admin; itoa_sales_admin, inherited from itoa_team_admin; itoa_finance_analyst, inherited from itoa_team_analyst; itoa_sales_analyst, inherited from itoa_team_analyst.

Answer: C

NEW QUESTION # 46
What are valid ITSI Glass Table editor capabilities? (Choose all that apply.)

- A. Creating glass tables.
- B. Service swapping configuration.
- C. Correlation search creation.
- D. Adding KPI metric lanes to glass tables.

Answer: A,B,D

Explanation:
Explanation
Create a glass table to visualize and monitor the interrelationships and dependencies across your IT and business services.
The service swapping settings are saved and apply the next time you open the glass table.
You can add metrics like KPIs, ad hoc searches, and service health scores that update in real time against a background that you design. Glass tables show real-time data generated by KPIs and services.

NEW QUESTION # 47
Which anomaly detection algorithm fulfills the paired monitoring requirement?

- A. Detection algorithm: Trending anomaly detection
  Monitoring requirement: Produce an alert when one entity in the KPI is not behaving similar to other entities in the KPI.
- B. Detection algorithm: Trending anomaly detection
  Monitoring requirement: Produce an alert when an entity deviates from its historical behavior.
- C. Detection algorithm: Entity cohesion anomaly detection
  Monitoring requirement: Produce an alert when multiple KPIs in the service deviate from their historical behaviors.
- D. Detection algorithm: Entity cohesion anomaly detection
  Monitoring requirement: Produce an alert when one entity in the KPI is not behaving similar to other entities in the KPI.

Answer: D

Explanation:
Splunk ITSI offers two built#in anomaly detection algorithms:TrendingandEntity Cohesion. TheTrending algorithm works on theaggregate KPI series, comparing recent KPI behavior with its historical pattern to detect unusual trending patterns over time. It doesnotevaluate behavior across separate entities within the KPI split - it simply looks at deviations from historical trends in the combined KPI values. On the other hand, the Entity Cohesionalgorithm is specifically designed to detect when entities that are expected to behave similarly begin to diverge in behavior. When a KPI is split by entity (for example, multiple servers, locations, or service tiers), Entity Cohesion normalizes each entity's time series and compares them against each other.
If one entity's pattern differs significantly from the group's patterns, it is flagged as an anomaly. This matches the "paired monitoring requirement" of producing an alert whenone entity in the KPI is not behaving similarly to the other entities. The option describing entity cohesion paired with that requirement reflects the correct use case for this algorithm in ITSI. Neither trending anomaly detection nor entity cohesion anomaly detection is intended to detect multiple KPIs deviating at the service level - such cross#KPI alerts are handled by other alerting constructs like multi#KPI alerts or correlation searches, not these specific anomaly algorithms.

NEW QUESTION # 48
Which of the following accurately describes base searches used for KPIs in a service?

- A. A base search can only be used by its service and all dependent services.
- B. Base searches can be used for multiple services.
- C. All the metrics in a base search are used by one service.
- D. All the KPIs in a service use the same base search.

Answer: B

Explanation:
KPI base searches let you share a search definition across multiple KPIs in IT Service Intelligence (ITSI). Create base searches to

consolidate multiple similar KPIs, reduce search load, and improve search performance.
Reference:
A base search is a search definition that can be shared across multiple KPIs that use the same data source. Base searches can improve search performance and reduce search load by consolidating multiple similar KPIs. The statement that accurately describes base searches used for KPIs in a service is:
A) Base searches can be used for multiple services. This means that you can create a base search for a service and use it for other services that have similar data sources and KPIs. For example, if you have multiple services that monitor web server performance, you can create a base search that queries the web server logs and use it for all the services that need to calculate KPIs based on those logs.

NEW QUESTION # 49

Besides creating notable events, what are the default alert actions a correlation search can execute? (Choose all that apply.)

- A. Include in RSS feed.
- B. Ping a host.
- C. Run a script.
- D. Send email.

Answer: A,C,D

Explanation:
Explanation
Throttling applies to any correlation search alert type, including notable events and actions (RSS feed, email, run script, and ticketing).

NEW QUESTION # 50

......

The Actual4Exams Splunk IT Service Intelligence Certified Admin (SPLK-3002) PDF dumps file work with all devices and operating system. You can easily install the SPLK-3002 exam questions file on your desktop computer, laptop, tabs, and smartphone devices and start Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam dumps preparation without wasting further time. Whereas the other two Actual4Exams Splunk SPLK-3002 Practice Test software is concerned, both are the mock Splunk IT Service Intelligence Certified Admin (SPLK-3002) exam that will give you a real-time SPLK-3002 practice exam environment for preparation.
