

# 1Z0-184-25 Exams Collection - 1Z0-184-25 Actual Exam

## Exam 1Z0-184-25: Oracle AI Vector Search Professional

1. When generating vector embeddings outside the database, what is the most suitable option for storing the embeddings for later use?

1. in a CSV file
2. In a binary FVEC file with the relational data in a CSV file
3. In the database as BLOB (Binary Large Object) data
4. In a dedicated vector database

2. When generating vector embeddings for a new dataset outside of Oracle Database 23ai, which factor is crucial to ensure meaningful similarity search results?

1. The choice of programming language used to process the dataset (for example, Python, Java)
2. The physical location where the vector embeddings are stored
3. The storage format of the new dataset (for example, CSV, JSON)
4. The same vector embedding model must be used for vectorizing the data and creating a query vector

3. You are working with vector search in Oracle Database 23ai and need to ensure the integrity of your vector data during storage and retrieval. Which factor is crucial for maintaining the accuracy and reliability of your vector search results?

1. Using the same embedding model for both vector creation and similarity search
2. Regularly updating vector embeddings to reflect changes in the source data
3. The specific distance algorithm employed for vector comparisons
4. The physical storage location of the vector data

4. Which DDL operation is NOT permitted on a table containing a VECTOR column in Oracle Database 23ai?

1. Creating a new table using CTAS CREATE TABLE AS SELECT that includes the VECTOR column from the original table
2. Dropping an existing VECTOR column from the table
3. Modifying the data type of an existing VECTOR column to a non-VECTOR type
4. Adding a new VECTOR column to the table

Now we live in a highly competitive world. If you want to find a decent job and earn a high salary you must own excellent competences and rich knowledge. Under this circumstance, owning a 1Z0-184-25 guide torrent is very important because it means you master good competences in certain areas and can handle the job well. The 1Z0-184-25 exam prep we provide can help you realize your dream to pass exam and then own a 1Z0-184-25 exam torrent. ITExamDownload provide high pass rate materials that are compiled by experts with profound experiences according to the latest development in the theory and the practice so they are of great value. Please firstly try out our 1Z0-184-25 Exam Materials demo before you decide to buy our product. It is worthy for you to buy our 1Z0-184-25 exam preparation not only because it can help you pass the exam successfully but also because it saves your time and energy.

The ITExamDownload is one of the top-rated and trusted platforms that are committed to making the Oracle 1Z0-184-25 exam preparation simple, easy, and quick. To achieve this objective the ITExamDownload is offering valid, updated, and easy-to-use Oracle 1Z0-184-25 Exam Practice test questions in three different formats. These three formats are Oracle 1Z0-184-25 exam practice test questions PDF dumps, desktop practice test software, and web-based practice test software.

## 100% Pass 2026 Fantastic Oracle 1Z0-184-25 Exams Collection

We believe our 1Z0-184-25 exam questions will meet all demand of all customers. If you long to pass the exam and get the certification successfully, you will not find the better choice than our 1Z0-184-25 preparation questions. Now you can have a chance to try our 1Z0-184-25 study braindumps before you pay for them. There are the free demos on our website for you download to check the quality and validity of our 1Z0-184-25 practice engine. Just have a try, then you will fall in love with our 1Z0-184-25 learning quiz!

## Oracle AI Vector Search Professional Sample Questions (Q47-Q52):

### NEW QUESTION # 47

What is the advantage of using Euclidean Squared Distance rather than Euclidean Distance in similarity search queries?

- A. It guarantees higher accuracy than Euclidean Distance
- **B. It is simpler and faster because it avoids square-root calculations**
- C. It supports hierarchical partitioning of vectors
- D. It is the default distance metric for Oracle AI Vector Search

**Answer: B**

Explanation:

Euclidean Squared Distance (L2-squared) skips the square-root step of Euclidean Distance (L2), i.e.,  $\sum (x_i - y_i)^2$  vs.  $\sqrt{\sum (x_i - y_i)^2}$ . Since the square root is monotonic, ranking order remains identical, but avoiding it (C) reduces computational cost, making queries faster-crucial for large-scale vector search. It's not the default metric (A); cosine is often default in Oracle 23ai. It doesn't relate to partitioning (B), an indexing feature. Accuracy (D) is equivalent, as rankings are preserved. Oracle's documentation notes L2-squared as an optimization for performance.

### NEW QUESTION # 48

What is the primary purpose of the DBMS\_VECTOR\_CHAIN.UTL\_TO\_CHUNKS package in a RAG application?

- A. To convert a document into a single, large text string
- B. To load a document into the database
- C. To generate vector embeddings from a text document
- **D. To split a large document into smaller chunks to improve vector quality by minimizing token truncation**

**Answer: D**

Explanation:

In Oracle Database 23ai, the DBMS\_VECTOR\_CHAIN package supports Retrieval Augmented Generation (RAG) workflows by providing utilities for vector processing. The UTL\_TO\_CHUNKS function specifically splits large documents into smaller, manageable text chunks. This is critical in RAG applications because embedding models (e.g., BERT, ONNX models) have token limits (e.g., 512 tokens). Splitting text minimizes token truncation, ensuring that each chunk retains full semantic meaning, which improves the quality of subsequent vector embeddings and search accuracy. Generating embeddings (A) is handled by functions like VECTOR\_EMBEDDING, not UTL\_TO\_CHUNKS. Loading documents (B) is a separate process (e.g., via SQL\*Loader). Converting to a single text string (D) contradicts the chunking purpose and risks truncation. Oracle's documentation on DBMS\_VECTOR\_CHAIN emphasizes chunking for optimizing vector quality in RAG.

### NEW QUESTION # 49

What is the primary function of AI Smart Scan in Exadata System Software 24ai?

- A. To automatically optimize database queries for improved performance
- **B. To accelerate AI workloads by leveraging Exadata RDMA Memory (XRMEM), Exadata Smart Cache, and on-storage processing**
- C. To provide real-time monitoring and diagnostics for AI applications

**Answer: B**

Explanation:

AI Smart Scan in Exadata System Software 24ai (B) accelerates AI workloads, including vector search, by offloading processing to storage servers using Exadata's RDMA Memory (XRMEM), Smart Cache, and on-storage capabilities. This enhances performance for large-scale vector operations. Real-time monitoring (A) isn't its focus; that's for management tools. Query optimization (C) is a general Exadata feature (Smart Scan), but AI Smart Scan specifically targets AI tasks. Oracle's 24ai documentation emphasizes its role in speeding up AI computations.

### NEW QUESTION # 50

Which is NOT a feature or capability related to AI and Vector Search in Exadata?

- A. AI Smart Scan
- **B. Native Support for Vector Search Only within the Database Server**
- C. Vector Replication with GoldenGate
- D. Loading Vector Data using SQL\*Loader

**Answer: B**

Explanation:

Exadata in Oracle Database 23ai enhances AI and vector search capabilities. Vector Replication with GoldenGate (B) supports real-time vector data distribution. SQL\*Loader (C) loads vector data into VECTOR columns. AI Smart Scan (D) accelerates AI workloads using Exadata's storage optimizations. However, "Native Support for Vector Search Only within the Database Server" (A) is not a feature; vector search is natively supported across Exadata's architecture, leveraging both database and storage layers (e.g., via Smart Scan), not restricted to the server alone. This option misrepresents Exadata's distributed capabilities, making it the correct "NOT" answer.

#### NEW QUESTION # 51

Which of the following actions will result in an error when using VECTOR\_DIMENSION\_COUNT() in Oracle Database 23ai?

- **A. Using a vector with a data type that is not supported by the function**
- B. Providing a vector with duplicate values for its components
- C. Providing a vector with a dimensionality that exceeds the specified dimension count
- D. Calling the function on a vector that has been created with TO\_VECTOR()

**Answer: A**

Explanation:

The VECTOR\_DIMENSION\_COUNT() function in Oracle 23ai returns the number of dimensions in a VECTOR-type value (e.g., 512 for VECTOR(512, FLOAT32)). It's a metadata utility, not a validator of content or structure beyond type compatibility. Option B—using a vector with an unsupported data type—causes an error because the function expects a VECTOR argument; passing, say, a VARCHAR2 or NUMBER instead (e.g., '1,2,3' or 42) triggers an ORA-error (e.g., ORA-00932: inconsistent datatypes). Oracle enforces strict typing for vector functions.

Option A (exceeding specified dimensions) is a red herring; the function reports the actual dimension count of the vector, not the column's defined limit—e.g., VECTOR\_DIMENSION\_COUNT(TO\_VECTOR('1,2,3')) returns 3, even if the column is VECTOR(2), as the error occurs at insertion, not here. Option C (duplicate values, like [1,1,2]) is valid; the function counts dimensions (3), ignoring content. Option D (using TO\_VECTOR()) is explicitly supported; VECTOR\_DIMENSION\_COUNT(TO\_VECTOR('1.2, 3.4')) returns 2 without issue. Misinterpreting this could lead developers to over-constrain data prematurely—B's type mismatch is the clear error case, rooted in Oracle's vector type system.

#### NEW QUESTION # 52

.....

Currently, if you want to make 1Z0-184-25 exam certification more tied to your status in the IT industry with fierce competition, and make professional competence stronger in the IT industry, you can choose our ITExamDownload's 1Z0-184-25 Exam Training materials. With efforts for many years, the passing rate of ITExamDownload's 1Z0-184-25 certification exam has reached as high as 100%. Choosing ITExamDownload means to choose success.

**1Z0-184-25 Actual Exam:** <https://www.itexamdownload.com/1Z0-184-25-valid-questions.html>

Oracle 1Z0-184-25 Exams Collection If you are uncertain about it, there are free demos preparing for you freely as a reference, Thousands of candidates' choice for our 1Z0-184-25 exam preparatory will be your wise decision, Our 1Z0-184-25 study guide design three different versions for all customers, Oracle 1Z0-184-25 Exams Collection ITCert-Online also provides you with free updates for 90 days after the purchase of the study material,

We feel honored that you spare some time paying attention to 1Z0-184-25 test questions, which we have carefully made as detailed as possible to ensure you to get desired 1Z0-184-25 pass-king information.

The paradox appears on a regular basis in the business news 1Z0-184-25 headlines, If they're using a system connected to an internal network, it probably already has one of those addresses!

If you are uncertain about it, there are free demos preparing for you freely as a reference, Thousands of candidates' choice for our 1Z0-184-25 Exam preparatory will be your wise decision.
