

Latest Braindumps HPE7-A01 Book & HPE7-A01 Excellect Pass Rate

BTW, DOWNLOAD part of ActualTorrent HPE7-A01 dumps from Cloud Storage: <https://drive.google.com/open?id=1ScDAVVY6HwqRRKqjqG7bF133Zk3PgyFu>

It's worth mentioning that our working staff considered as the world-class workforce, have been persisting in researching HPE7-A01 test prep for many years. Our HPE7-A01 exam guide engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies. Our laTest HPE7-A01 Quiz prep aim at assisting you to pass the HPE7-A01 exam and making you ahead of others. Under the support of our study materials, passing the exam won't be an unreachable mission. More detailed information is under below.

The HP HPE7-A01 Exam covers a wide range of topics, including Aruba wireless solutions and technologies, network architecture, security and authentication, troubleshooting, and management. HPE7-A01 exam consists of 60 multiple-choice questions, and candidates have 90 minutes to complete it. The passing score for the exam is 75%. Aruba Certified Campus Access Professional Exam certification is valid for three years, after which the candidate must recertify to maintain their certification status. With this certification, professionals can demonstrate their expertise in Aruba wireless technologies and solutions, which can help them advance their careers and increase their earning potential.

HP HPE7-A01 Dumps- Accessible On Any Device

We know that the standard for most workers become higher and higher; so we also set higher goal on our HPE7-A01 guide questions. Different from other practice materials in the market our training materials put customers' interests in front of other points, committing us to the advanced learning materials all along. Until now, we have simplified the most complicated HPE7-A01 Guide questions and designed a straightforward operation system, with the natural and seamless user interfaces of HPE7-A01 exam question grown to be more fluent, we assure that our practice materials provide you a total ease of use.

HP Aruba Certified Campus Access Professional Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78

You need to create a keepalive network between two CX 8325 switches for VSX configuration. How should you establish the keepalive connection?

- A. SVI, VLAN trunk allowed all on ISL in custom VRF
- B. loopback 0 and OSPF area 0 in default VRF
- C. SVI, VLAN trunk allowed all on ISL in default VRF
- **D. routed port in custom VRF**

Answer: D

Explanation:

To establish a keepalive connection between two Aruba CX 8325 switches for VSX configuration, you need to use a routed port in custom VRF. A routed port is a physical port that acts as a layer 3 interface and does not belong to any VLAN. A custom VRF is a virtual routing and forwarding instance that provides logical separation of routing tables. By using a routed port in custom VRF, you can isolate the keepalive traffic from other traffic and prevent routing loops or conflicts. The other options are incorrect because they either do not use a routed port or do not use a custom VRF.

NEW QUESTION # 79

What is the best practice for handling voice traffic with dynamic segmentation on AOS-CX switches?

- A. Controller authentication and port-based tunneling of all traffic
- B. Switch authentication and user-based tunneling of the voice traffic.
- C. Central authentication and port-based tunneling of the voice traffic.
- **D. Switch authentication and local forwarding of the voice traffic**

Answer: D

Explanation:

This is the best practice for handling voice traffic with dynamic segmentation on AOS-CX switches. Dynamic segmentation is a feature that allows AOS-CX switches to tunnel user traffic to a controller or another switch based on user roles and policies. For voice traffic, it is recommended to use switch authentication and local forwarding, which means the voice devices are authenticated by the switch and their traffic is forwarded locally without tunneling. This reduces latency and jitter for voice traffic and improves voice quality. The other options are incorrect because they either use central authentication or tunneling, which are not optimal for voice traffic. NEW QUESTION # 80

In an ArubaOS 10 architecture using an AP and a gateway, what happens when a client attempts to join the network and the WLAN is configured with OWE?

- A. RADIUS protocol is utilized.
- **B. Authentication information is not exchanged**
- C. The Gateway will not respond.
- D. No encryption is applied.

Answer: B

Explanation:

This is the correct statement about what happens when a client attempts to join the network and the WLAN is configured with OWE (Opportunistic Wireless Encryption). OWE is a standard that provides encryption for open networks without requiring any authentication or credentials from the client or the network. OWE uses a Diffie-Hellman key exchange mechanism to establish a secure session between the client and the AP without exchanging any authentication information. The other options are incorrect because they either describe scenarios that require authentication or encryption methods that are not used by OWE.

NEW QUESTION # 81

What steps are part of the Key Management workflow when a wireless device is roaming from AP1 to AP2? (Choose two.)

- **A. The Key Management service then generates R1 keys for AP2's neighbors.**
- B. AP1 will cache the client's information and send it to the Key Management service
- **C. The Key Management service receives a list of all AP1's neighbors from AirMatch.**
- D. The Key Management service receives from AirMatch a list of all AP2's neighbors
- E. A client associates and authenticates with the AP2 after roaming from AP1

Answer: A,C

Explanation:

Key Management is a service that runs on Aruba Mobility Controllers (MCs) or Mobility Master (MM) to optimize roaming performance for wireless clients. Key Management works with AirMatch, a service that optimizes radio resource management for Aruba APs, to pre-generate and distribute R1 keys for neighboring APs before a client roams.

When a wireless device is roaming from AP1 to AP2, the following steps are part of the Key Management workflow:

- * The client associates and authenticates with AP1 using 802.1X or PSK methods.
- * The Key Management service caches the client's information and generates an R0 key for the client.
- * The Key Management service receives a list of all AP1's neighbors from AirMatch.
- * The Key Management service then generates R1 keys for AP1's neighbors using the R0 key and sends them to the corresponding APs.
- * When the client roams to AP2, one of AP1's neighbors, it performs an 802.11r fast transition using the pre-generated R1 key without needing to re-authenticate.

NEW QUESTION # 82

Refer to the image.

Your customer is complaining of weak Wi-Fi coverage in their office. They mention that the office on the other side of the hall has much better signal. What is the likely cause of this issue?

- A. The AP is an outdoor access point.
- B. The AP is a remote access point.
- C. The AP is configured in Mesh mode.
- D. The AP is using a directional antenna.

Answer: D

Explanation:

Explanation

The likely cause of the issue of weak Wi-Fi coverage in the office is that the AP is using a directional antenna.

A directional antenna is an antenna that radiates or receives radio waves more strongly in one or more directions, creating a focused beam of signal. A directional antenna can provide better coverage and performance for a specific area, but it can also create dead zones or weak spots for other areas. The other options are incorrect because they either do not affect the Wi-Fi coverage or do not match the scenario.

NEW QUESTION # 83

.....

The procedures of every step to buy our HPE7-A01 exam questions are simple and save the clients' time. Because the most clients may be busy in their jobs or other significant things, the time they can spare to learn our HPE7-A01 study materials is limited and little. But if the clients buy our HPE7-A01 training quiz they can immediately use our exam products and save their time. It will only take 5 to 10 minutes for us to send the HPE7-A01 learning guide to you after purchase.
