Salesforce Analytics-DA-201考題資訊 & Analytics-DA-201認證指南

為了不讓你得生活留下遺憾和後悔，我們應該盡可能抓住一切改變生活的機會。你做到了嗎？NewDumps Salesforce的Analytics-DA-201考試培訓資料是幫助每個想成功的IT人士提供的培訓資料，幫助你們順利通過Salesforce的Analytics-DA-201考試認證。為了不讓成功與你失之交臂，趕緊行動吧。

最新的 Tableau Data Analyst Analytics-DA-201 免費考試真題 (Q159-Q164):

問題 #159

You have the following dataset.

Which Level of Detail (LOD) expression should you use to calculate the grand total of all the regions?

- A. {Fixed: [Region]: TOTAL Sales}
- B. {FIXED: [Region] SUM Sales}
- C. {FIXED: TOTAL (Sales)}
- **D. {FIXED: SUM Sales}**

答案： D

解題說明：

The correct Level of Detail (LOD) expression to calculate the grand total of sales across all regions would be {SUM(Sales)}. The FIXED expression is not needed here because we are not computing the sum at the level of each region, but rather the total sum across all regions. The FIXED keyword is typically used to aggregate at a certain level regardless of the view. https://help.tableau.com/current/pro/desktop/en-us/functions_functions_tablecalculation.htm#TOTAL

問題 #160

A Data Analyst is given the following table and asked to create a flow that adds a date field to the data. This field should automatically update as new dates (months) are added to the original table.

Region	Sales Jan-24	Sales Feb-24	Sales Mar-24
East	60,523	65,894	60,593
West	200,494	201,165	230,794
Central	300,689	290,365	310,192

Which technique should the analyst use as the first step to achieve this in Tableau Prep?

- A. A Rows to Columns Pivot step
- B. An Aggregate step to reshape the data
- C. A wildcard search to pivot in the Pivot step
- D. A wildcard search for multiple tables in the Input step

答案： C

問題 #161

You create the following story that contains two story point.

You want to change the story point format to show the current story point number out of the total number of story points. Which Layout option should you use?

- A. Arrows only
- B. Dots
- C. Numbers
- D. Caption boxes

答案： C

解題說明：

To change the story point format to show the current story point number out of the total number of story points, you should use the Numbers option in the Layout tab. This option will display the story points as numbers in a horizontal or vertical sequence, such as 1/2, 2/2. You can also choose to show or hide the next and previous arrows for navigation. The Numbers option will help you indicate the progress and order of your story points more clearly than the other options. References:

問題 #162

You have a sales dataset that contains the following fields.

Field name	Data type
Order Date	Date
Quantity	Whole number
Revenue	Decimal number
Product Name	Text
Customer Region	Geographical

You need to analyze the average revenue per product in different regions over time. Which two fields should be measures? Choose two.

- A. Product Name
- B. Quantity
- C. Revenue
- D. Order Date
- E. Customer Region

答案: B,C

解題說明:

To analyze the average revenue per product in different regions over time, you need to use two fields that contain numeric, quantitative values that you can measure and aggregate. Quantity and Revenue are both measures that fit this criterion. You can multiply Quantity and Revenue to get the total sales for each product, and then divide by the number of products to get the average revenue. You can also use these measures to create charts and tables that show the trends and comparisons over time and across regions. References:

問題 #163

You have a data source that contains the following columns.

Name	Data type
Order Date	Date
Order Number	String
Customer Name	String
Sales	Number (decimal)
Profit	Number (decimal)

You want to sort customers based on the most expensive orders.

How should you complete the formula? (Use the dropdowns in the Answer Area to select the correct options to complete the formula.)

(
 ([[Sales]]),
)

答案:
