We not only provide key knowledge points and detailed questions answers and explanations but also excellent after-sale service. You purchase AP-219 latest practice exam online, you will not only get exam materials but also one year tracking service. We will always provide AP-219 latest practice exam online the first time for your free downloading within one year.

## Salesforce Order Management Administrator Accredited Professional Sample Questions (Q68-Q73):

### NEW QUESTION # 68

An administrator needs to import Order Summary records containing historical data but does not want them to be actioned on by Order Management. Which feature supports this use case?

- A. Order Life Cycle Type Picklist
- **B. Unmanaged Order Checkbox**
- C. Order Management Type Picklist
- D. Custom checkbox

**Answer: B**

Explanation:

The feature that supports this usecase is the Unmanaged Order Checkbox. This is a standard field on the Order Summary object that indicates whether the order is managed by Order Management or not. If this field is checked, then the order is not actioned on by Order Management, and it doesnot trigger any flows or processes. The administrator can use this field to import Order Summary records containing historical data without affecting the order lifecycle. Verified Reference:[https://help.salesforce.com/s/articleView?id=sf.order\\_management\\_order\\_summary.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.order_management_order_summary.htm&type=5)

### NEW QUESTION # 69

An administrator is attempting to deploy aChange Set from a development org to a test org but the test org is not available in the list of target organizations. What are two reasons that could cause this issue?

- A. The components in the Change set could not be found within the test org
- **B. The development org has not been approved to upload Change Sets from within the test org**
- **C. The development org and test org are not associated with the same production org.**
- D. ChangeSets can only be deployed from a sandbox org to a production org, not another sandbox org.

**Answer: B,C**

Explanation:

Two reasons that could cause the issue of not being able to deploy a Change Set from a development org to a test org are:

The development org has not been approved to upload Change Sets from within the test org. To deploy ChangeSets between two sandbox orgs, the administrator needs to establish a deployment connection between them. A deployment connection allows one org to send outbound Change Sets and another org to receive inbound Change Sets. The administrator can create a deployment connection request from the development org and approve it from the test org.

The development org and test org are not associated with the same production org. To deploy Change Sets between two sandbox orgs, they must be linked to the same production org. A production org is an org that contains live data and business processes. A sandbox org is a copy of a production org that is used for development, testing, or training purposes. Sandbox orgs inherit the deployment connections of their source production orgs. Reference: Deploy Using Change Sets, Deploy a Change Set

### NEW QUESTION # 70

A company has multiple fulfillment centers that they want to utilize when orders are fulfilled. The administrator is tasked with minimizing the distance from fulfillment center to delivery location. How can this be accomplished?

- A. Create a Workflow Rule on the Fulfillment Order object that utilizes the Order Management workflow field update actions
- B. Ask a developer to create an Apex Action that can determine the closest fulfillment location
- C. Modify the Fulfillment Location Search process to search by closest distance instead of least number of splits
- D. Add the "Order Routing Rank By Closest Distance" action to the fulfillment flow

#### Answer: D

Explanation:

The best way for the administrator to accomplish this task is to add the "Order Routing Rank By Closest Distance" action to the fulfillment flow. This action is a flow core action that ranks the fulfillment locations by their distance from the delivery location, and returns a list of ranked locations. The administrator can use this action to find the optimal fulfillment location for each order based on proximity. Verified Reference: [https://help.salesforce.com/s/articleView?id=sf.flow\\_ref\\_elements\\_om\\_actions\\_order\\_routing\\_rank\\_by\\_closest\\_distance.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_om_actions_order_routing_rank_by_closest_distance.htm&type=5)

### NEW QUESTION # 71

In which two ways can Order Management licenses be assigned?

- A. By User
- B. By Role
- C. By Profile
- D. By Permission Set

#### Answer: A,D

Explanation:

Two ways that Order Management licenses can be assigned are:

By Permission Set. A Permission Set is a collection of settings and permissions that give users access to various tools and functions in Salesforce. A Permission Set can be assigned to individual users or groups of users, regardless of their profile or role. An administrator can create a Permission Set that includes the Order Management User permission, which enables users to access Order Management features and data. The administrator can then assign this Permission Set to the users who need Order Management licenses.

By User. A User is a record that represents a person who can log in and access Salesforce. A User has various fields and settings that determine their access and permissions in Salesforce, such as profile, role, license type, etc. An administrator can assign an Order Management license to a user by editing the user record and selecting Order Management User from the License Type picklist. The administrator can also enable the Order Management User permission on the user record.

### NEW QUESTION # 72

How can an administrator localize screens in the Order Management flows?

- A. Add the Language Selector component at the start of the flow so users can change the language
- B. Create a copy of the flow with hard-coded text in the desired language
- C. Create text localization variables in the flow
- D. Enable localization for the flow and modify the label's value to match the desired language

#### Answer: C

### NEW QUESTION # 73

.....

Our goal is to increase customer's satisfaction and always put customers in the first place. As for us, the customer is God. We

provide you with 24-hour online service for our AP-219 study tool. If you have any questions, please send us an e-mail. We will promptly provide feedback to you and we sincerely help you to solve the problem. Our specialists check daily to find whether there is an update on the AP-219 study tool. If there is an update system, we will automatically send it to you. Therefore, we can guarantee that our AP-219 Test Torrent has the latest knowledge and keep up with the pace of change. Many people are worried about electronic viruses of online shopping. But you don't have to worry about our products. Our AP-219 exam materials are absolutely safe and virus-free. If you encounter installation problems, we have professional staff to provide you with remote online guidance. We always put your needs in the first place.
