And we can claim that if you study with our PL-900 study materials for 20 to 30 hours, you will pass the exam with ease.

Microsoft Power Platform Fundamentals Sample Questions (Q177-Q182):

NEW QUESTION # 177

You review a Power BI report about a company's sales data in Power BI.

You open an insight notification and observe that one of the company stores has a higher sales value than the target sales value in the previous quarter.

You need to identify the insight that is shown in the notification.

Which insight is used?

- A. key performance indicator (KPI) analysis
- B. trend reversal
- C. recent trend
- D. significant anomaly

Answer: A

NEW QUESTION # 178

You are creating a Power Automate solution.

You need to select a Power Automate control action for each function in the flow.

Which control action should you use? To answer, drag the appropriate control actions to the correct functions. Each control action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer Area

Control actions	Function	Control action
Do until	Continue performing a set of actions unless a condition becomes true.	<input type="text"/>
Apply to each	Allow multiple branches to be created based on a set of options.	<input type="text"/>
Switch	Allow two branches to be created based on a true/false condition.	<input type="text"/>
Condition		

Answer:

Explanation:

Answer Area

Control actions	Function	Control action
Do until	Continue performing a set of actions unless a condition becomes true.	Do until
Apply to each	Allow multiple branches to be created based on a set of options.	Switch
Switch	Allow two branches to be created based on a true/false condition.	Condition
Condition		

Explanation:

Graphical user interface, text, application Description automatically generated

ANSWER AREA

Control actions	Function	Control action
Do until	Continue performing a set of actions unless a condition becomes true.	Do until
Apply to each	Allow multiple branches to be created based on a set of options.	Switch
Switch	Allow two branches to be created based on a true/false condition.	Condition
Condition		

NEW QUESTION # 179

You have a Power BI report.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can export data from a visualization in a Power BI report.	<input type="radio"/>	<input type="radio"/>
You can show the data behind a visual report on your screen without exporting the data.	<input type="radio"/>	<input type="radio"/>
You must export data to view supporting data for a KPI.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statement	Yes	No
You can export data from a visualization in a Power BI report.	<input checked="" type="radio"/>	<input type="radio"/>
You can show the data behind a visual report on your screen without exporting the data.	<input type="radio"/>	<input checked="" type="radio"/>
You must export data to view supporting data for a KPI.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Box 1: Yes

If you'd like to see the data that Power BI uses to create a visualization, you can display that data in Power BI. You can also export that data to Excel as an .xlsx or .csv file. The option to export the data requires a Pro or Premium license and edit permissions to the dataset and report.

Note: Export data from a Power BI dashboard

Select the ellipsis in the upper-right corner of the visualization.

Choose the Export data icon.

Power BI exports the data to a .csv file. If you've filtered the visualization, then the app will filter the downloaded data.

Your browser will prompt you to save the file. Once saved, open the .csv file in Excel.

Box 2: No

Underlying data: Select this option if you want to see the data in the visual and additional data from the model (see chart below for details). If your visualization has an aggregate, selecting Underlying data removes the aggregate. When you select Export, Power BI exports the data to an .xlsx file and your browser prompts you to save the file. Once saved, open the file in Excel.

Box 3: Yes

A KPI dataset needs to contain goal values for a KPI. If your dataset doesn't contain goal values, you can create them by adding an Excel sheet with goals to your data model or PBIX file.

Note: A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.
