

Nutanix NCP-CI-Azure Valid Test Fee & Dumps NCP-CI-Azure Questions

NUTANIX NCP-CI-AZURE V6.7 EXAM QUESTIONS WITH CORRECT ANSWERS

When configuring an alert email in Prism Central deployment within an NC2 environment, what is required in order for the emails to be sent properly?A.SMTP server configured in Prism Central SettingsB.A whitelisted public cloud console endpointC.Cluster Super Admin permissionsD.Name servers configure in Prism Central - Correct Answers -Answer: A

Which address must Azure Directory Service be able to resolve when deploying a new NC2 cluster?A.Download.cloud.nutanix.comB.Apikeys.nutanix.comC.Gateway-external-api.cloud.nutanix.comD.Gateway-internal-api-cloud.nutanix.com - Correct Answers - Answer: C

An on-premises network has been extended to azure with a VPN/ExpressRoute. The routing and peering of VNets is setup and has been confirmed to be correct.Which statement best describes the state of the traffic flow between the on-prem CVMs and the NC2 CVMs in Azure?A.The Network Security Group of the Flow Gateway VM on the Internal NICs will need to be edited to enable the traffic flow.B.A ticket will need to be put in with Microsoft support to open the subnet ranges from on-premises.C.Traffic will flow directly to the NC2 CVMs. Nothing will block the path by default.D.The Network Security Group of the Flow Gateway VM on the External NICs will need to be edited to enable the traffic flow. - Correct Answers -Answer: A

What will be observed in the NC2 cluster when terminating a node from the Azure portal?A.NC2 will shutdown the node.B.NC2 will continue re-provisioning the node.C.NC2 will terminate the node from the cluster.D.NC2 will mark the node as degraded. - Correct Answers -Answer: D

An administrator seeks to ensure that the newly-created NC2 organization named Finance can only deploy clusters into certain cloud regions.Which action should the administrator take to do this?A.Configure permissions in cloud accounts to restrict access to certain regions.B.Open a support ticket with Nutanix to whitelist the allowed regions for the Finance NC.C.Configure RBAC roles on the Finance NC2 organization to allow access to regions.D.Specify allowed regions when configuring a cloud account for the Finance NC2 organization. - Correct Answers -Answer: D

A company wants NC2 networking components to be created manually with the correct naming conversation. To achieve this the administrator manually creates the PC and Host VNets in Azure.What additional Azure Network components must the administrator

Our NCP-CI-Azure test braindumps are carefully developed by experts in various fields, and the quality is trustworthy. What's more, after you purchase our products, we will update our NCP-CI-Azure exam questions according to the new changes and then send them to you in time to ensure the comprehensiveness of learning materials. We also have data to prove that 99% of those who use our NCP-CI-Azure Latest Exam torrent to prepare for the exam can successfully pass the exam and get NCP-CI-Azure certification. As long as you decide to choose our NCP-CI-Azure exam questions, you will have an opportunity to prove your abilities, so you can own more opportunities to embrace a better life.

We are never satisfied with the present situation and expand and update the NCP-CI-Azure exam practice guide by all means. We focus on the innovation and organize our expert team to compile new knowledge points and update the test bank. We treat our clients as our god and treat their supports to our NCP-CI-Azure Study Materials as our driving forces to march forward. So the clients can enjoy the results of the latest innovation on NCP-CI-Azure exam questions and achieve more learning resources. The credits belong to our diligent and dedicated professional innovation team and our experts.

Dumps NCP-CI-Azure Questions, Online NCP-CI-Azure Bootcamps

For customers who are bearing pressure of work or suffering from career crisis, Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) learn tool of inferior quality will be detrimental to their life, render stagnancy or even cause loss of salary. So choosing appropriate NCP-CI-Azure test guide is important for you to pass the exam. One thing we are sure, that is our NCP-CI-Azure Certification material is reliable. With our high-accuracy NCP-CI-Azure test guide, our candidates can grasp the key points, and become sophisticated with the exam content. You only need to spend 20-30 hours practicing with our Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) learn tool, passing the exam would be a piece of cake.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 2	Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.
Topic 3	Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.
Topic 4	Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q37-Q42):

NEW QUESTION # 37

Exhibit.

An administrator is trying to create an NC2 cluster in Azure, but does not see the required region in the drop-down list. Which two steps could the administrator take to resolve this issue? (Choose two.)

- A. Check the NC2 Billingconsole to ensure the region is listed.
- B. Check the Azure subscription is created in the correct region.
- C. Ensure that the Azure region is whitelisted for use by Microsoft in the subscription.
- D. Check the list of regions specified under the NC2 organization cloud account.

Answer: C,D

Explanation:

* Check the list of regions specified under the NC2 organization cloud account: The list of available regions in the NC2 console might be restricted based on the configuration of the cloud account associated with the NC2 organization. Verifying this list ensures that the desired region is included and available for cluster creation.

* Ensure that the Azure region is whitelisted for use by Microsoft in the subscription: Sometimes, specific regions need to be explicitly enabled or whitelisted in the Azure subscription for certain services. This step ensures that the required region is permitted for use within the Azure subscription, allowing the NC2 cluster to be created in that region.

NEW QUESTION # 38

An administrator needs to configure the correct outbound requirement for a successful cluster deployment in Azure. Which destination must have an outbound rule to meet this requirement?

- A. <https://nutanix.dev/>*
- B. <https://portal.nutanix.com/>*

- C. <https://downloads.cloud.nutanix.com/>*
- D. <https://support.nutanix.com/>*

Answer: C

Explanation:

* Outbound Rule Necessity: For successful cluster deployment, certain outbound connections must be allowed to ensure proper download and configuration of resources.

* Critical Destination: "<https://downloads.cloud.nutanix.com/>" is a critical endpoint from which the Nutanix software and updates are downloaded during the cluster deployment process.

* Functionality: Ensuring an outbound rule for this destination allows the deployment to fetch necessary files and updates, enabling smooth cluster setup and operation.

* Other Destinations:

* <https://portal.nutanix.com/>: Used for accessing the Nutanix portal, not directly related to deployment downloads.

* <https://support.nutanix.com/>: Used for support-related tasks, not for deployment-specific downloads.

* <https://nutanix.dev/>: Related to development and API documentation, not necessary for initial deployment.

* Conclusion: Outbound connectivity to "<https://downloads.cloud.nutanix.com/>" is essential for downloading deployment resources.

NEW QUESTION # 39

An administrator is deploying an NC2 cluster in Azure and observes on NC2 console that nodes will not progress and continue in a Booting state.

What is the most likely cause for the node not continuing to deploy?

- A. An Azure Support case must first be submitted for allowlisting the Azure subscription.
- B. [The subscription has not been validated to be allowlisted by Microsoft.](#)
- C. A private DNS server is being used that is not reachable.
- D. The Azure account does not have an active subscription.

Answer: B

Explanation:

* Azure Subscription Validation: When deploying an NC2 cluster, the Azure subscription must be validated and allowlisted by Microsoft. This is a crucial step to ensure that the necessary permissions and configurations are set up for the deployment.

* Booting State Issue: If the nodes are stuck in the Booting state, it often indicates that the subscription has not been properly validated and allowlisted. This prevents the deployment from progressing as required resources and permissions are not fully accessible.

* Checking Allowlisting Status: Administrators should verify that their subscription has been allowlisted by contacting Azure support or checking the status through the Azure portal.

* Resolution: Once the subscription is validated and allowlisted by Microsoft, the deployment should proceed without the nodes getting stuck in the Booting state.

NEW QUESTION # 40

What is the purpose of an organization in the NC2 console?

- A. To link with NC2 subscription plans
- B. To map the on-premises Prism Central environment
- C. [To segregate clusters based on specific requirements](#)
- D. To Link with a Public Cloud account

Answer: C

NEW QUESTION # 41

An administrator has created a new overlay network. Which is intended for the company's user VMs.

The cluster has these characteristics:

* Policy-based Routing is not configured

* Only using external NAT

* DNS Server: 8.8.8.8

After adding a few VMs to the network, the administrator notices that the VMs cannot reach resources outside the network, even by IP address.

What is a likely cause?

- **A. A default route was not configured for the external subnet.**
- B. The local cluster does not have access to the underlying network.
- C. The DNS server is unreachable.
- D. The VPC connection is not established.

Answer: A

Explanation:

When the administrator notices that the VMs cannot reach resources outside the network, even by IP address, it is likely that a default route was not configured for the external subnet. The default route is essential for directing traffic from the VMs to external networks. Without it, the VMs will not know how to route traffic to external destinations, which leads to connectivity issues.
