

# HP Exam HPE7-J02 Outline: Advanced HPE Storage Integrator Solutions Written Exam - BraindumpsPrep

## Latest updated

DOWNLOAD the newest BraindumpsPrep HPE7-J02 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1pPA1v52Q-IAKUfZ9vDxgX4ItiaM1Li0W>

Our Advanced HPE Storage Integrator Solutions Written Exam exam question has been widely praised by all of our customers in many countries and our company has become the leader in this field. Our product boost varied functions and they include the self-learning and the self-assessment functions, the timing function and the function to stimulate the exam to make you learn efficiently and easily. There are many advantages of our HPE7-J02 Study Tool. To understand the details of our product you have to read the introduction of our product as follow firstly.

This format enables you to assess your HPE7-J02 test preparation with a HPE7-J02 practice exam. You can also customize your time and the kinds of questions of the HP HPE7-J02 Practice Test. This Advanced HPE Storage Integrator Solutions Written Exam HPE7-J02 practice test imitates the HP HPE7-J02 real exam pattern. Thus, it helps you kill Advanced HPE Storage Integrator Solutions Written Exam exam anxiety.

## Premium HP HPE7-J02 Files | New HPE7-J02 Dumps Questions

Different from the common question bank on the market, HPE7-J02 actual exam are scientific and efficient learning system for a variety of professional knowledge that is recognized by many industry experts. We have carried out the reforms according to the development of the digital devices not only on the content of our HPE7-J02 Exam Torrent, but also on the layouts since we provide the latest and precise information to our customers, so there is no doubt you will pass the HPE7-J02 exam with our latest HPE7-J02 exam questions.

## HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.</li> </ul>

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q50-Q55):

### NEW QUESTION # 50

Which statement is correct when deploying an HPE Zerto DR solution where an Extended Journal Copy is required with a one-year retention period?

- A. HPE Zerto integrates with HPE StoreOnce to enable long-term retention for Extended Journal Copies.
- B. HPE Zerto supports a maximum of 30-day retention and cannot exceed this period.
- C. An additional license is required to enable the Extended Journal Copy feature.
- D. Extended Journal Copies always come from the target site to avoid impact on the production site.

**Answer: A**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto Extended Journal allows retention up to one year by integrating with secondary storage like HPE StoreOnce. Short-term journals (seconds to days) reside on primary replication storage, while long-term copies (weeks/months/years) are offloaded to StoreOnce for cost-efficient retention.

Distractors:

A: No separate license is required - it is a standard Zerto feature when integrated.

C: Extended Journals can be sourced from production or target, depending on setup; not "always" target.

D: Incorrect - Zerto supports >30 days retention with Extended Journal.

Key Concept: Zerto + HPE StoreOnce for long-term DR retention.

Reference: HPE Zerto with StoreOnce White Paper.

### NEW QUESTION # 51

A growing technology company is planning to upgrade its data center infrastructure. Their considerations:

Budget: Predictable monthly payments, no upfront CapEx.

Flexibility: Long-term use, no forced returns.

Ownership: Prefer eventual ownership, spread payments.

Control: Full customization and upgrades.

Which procurement option best meets their needs?

- A. Operating lease
- B. Capital purchase
- C. Consumption based
- D. Capital lease

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

A Capital Lease (also known as a finance lease) spreads costs over time like OpEx, while giving the customer the ability to own the

equipment at the end of the lease term. This matches the desire for predictable payments, eventual ownership, and full control.

Distractors:

A (Consumption model): GreenLake provides OpEx flexibility but does not lead to ownership.

B (Operating lease): Pure rental; equipment must be returned, no ownership.

C (Capital purchase): Requires large upfront payment, which the customer wants to avoid.

Key Concept: Capital Lease = predictable payments + ownership path.

Reference: HPE Financial Services Procurement Options.

### NEW QUESTION # 52

Your customer is using 2 HPE StoreOnce appliances across 2 sites with replication enabled for disaster recovery. They are concerned about the fact that the StoreOnce administrators have full access to the systems, which allows them to delete backup copies on these systems.

What needs to be used to address the concern of your customer?

- A. Data at rest encryption
- B. Challenge Handshake Authentication Protocol (CHAP)
- C. Resource restriction policies
- **D. Dual Authorization**

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE StoreOnce Dual Authorization prevents a single administrator from deleting, expiring, or modifying backup data. Instead, any destructive action requires approval from a second administrator, mitigating insider threats and accidental deletions. This is the correct feature for immutability protection in a replicated StoreOnce environment.

Distractors:

B (CHAP): Used for iSCSI authentication, not backup immutability.

C: Encryption protects data confidentiality, not accidental deletion.

D: Resource restrictions are policy-driven but don't enforce dual control over destructive actions.

Key Concept: Dual Authorization for ransomware and insider-threat protection on StoreOnce.

Reference: HPE StoreOnce Security Features White Paper.

### NEW QUESTION # 53

Two HPE Storage Alletra MP B10000 arrays are deployed with Active Peer Persistence. Both arrays and hosts are installed in close proximity to each other. To enable symmetric access, Peer Persistence must be configured accordingly.

Which Host Proximity Parameter should be selected for host ESX31 in this case?

- A. Secondary
- **B. All**
- C. Exclusive
- D. Primary

**Answer: B**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Option B (All) is correct because in an Active Peer Persistence deployment where both arrays and hosts are in close proximity (metro or campus cluster scenario), the hosts should be configured with Host Proximity = All. This ensures that the host (ESX31) can access both arrays symmetrically and concurrently, enabling active-active paths. This is essential to deliver seamless failover and load balancing across the arrays in an HPE Alletra MP Peer Persistence environment.

Analysis of Incorrect Options (Distractors):

A (Secondary): This is used for hosts located closer to the secondary array, to bias access toward it in asymmetric deployments.

Not applicable here since the hosts are near both arrays.

C (Exclusive): This option assigns the host to a single array exclusively, preventing dual-active access.

This would defeat the purpose of symmetric Peer Persistence.

D (Primary): Similar to Secondary, this biases access to only the primary array, which is not correct when arrays and hosts are in the

same site for active-active.

Key Concept:

This question focuses on Host Proximity parameters in HPE Peer Persistence.

Primary/Secondary = asymmetric designs (hosts closer to one array).

All = symmetric design (hosts equidistant to both arrays, enabling active-active).

Exclusive = restricts access to one array only.

## NEW QUESTION # 54

Which statement is correct when enabling port trunking (FC ISL / Ethernet link aggregation)?

- A. For optimal performance, no more than 100 meters of cable length difference is acceptable.
- B. The port speed of the trunk ports can be different based on the used switches in the ISL group.
- C. Port Trunking is supported by default on every B-Series FC switch.
- **D. Ports need to belong to the same port group of the switch.**

**Answer: D**

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In B-Series (Brocade) SAN switches, trunking requires that all ports in a trunk group belong to the same port group (same ASIC) and run at the same speed. This ensures frame ordering and load balancing across ISLs.

Distractors:

A: Incorrect - cable length differences must be minimal, but not stated in meters like this.

C: Incorrect - speeds must match across all trunked ports.

D: Trunking requires a license on some Brocade models; not always enabled by default.

Key Concept: Port trunking requires same port group and same speed.

Reference: HPE B-Series SAN Switch Trunking Best Practices.

## NEW QUESTION # 55

.....

Challenge is omnipresent like everywhere. By eliciting all necessary and important points into our HPE7-J02 practice materials, their quality and accuracy have been improved increasingly, so their quality is trustworthy and unquestionable. There is a bunch of considerate help we are willing to offer. Besides, according to various predispositions of exam candidates, we made three versions for your reference. Untenable materials may waste your time and energy during preparation process.
