SAP C_BW4H_2505 Questions Answers & C_BW4H_2505 Valid Braindumps Sheet

Do you like to practice study materials on paper? If you do, you can try our C_BW4H_2505 exam dumps. C_BW4H_2505 PDF version is printable, and you can study anywhere and anytime. We offer you free demo for you to have a try before buying, so that you can have a better understanding of C_BW4H_2505 Exam Dumps what you are going to buy. Free update for 365 days is available, and you can get the latest information about the C_BW4H_2505 exam dumps timely. The update version will be sent to your email automatically.

When you grasp the key points to attend the C_BW4H_2505 exam, nothing will be difficult for you anymore. Our professional experts are good at compiling the C_BW4H_2505 training guide with the most important information. They have been in this career for over ten years, and they know every detail about the C_BW4H_2505 Exam no matter on the content but also on the displays. Believe in our C_BW4H_2505 practice braindumps, and your success is 100% guaranteed!

>> SAP C_BW4H_2505 Questions Answers <<

C_BW4H_2505 Valid Braindumps Sheet - C_BW4H_2505 Exam Objectives

The test software used in our products is a perfect match for Windows' C_BW4H_2505 learning material, which enables you to enjoy the best learning style on your computer. Our C_BW4H_2505 certification guide also use the latest science and technology to meet the new requirements of authoritative research material network learning. Unlike the traditional way of learning, the great benefit of our C_BW4H_2505 learning material is that users can flexibly adjust their learning plans. We hope that our new design of C_BW4H_2505 test questions will make the user's learning more interesting and colorful.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q34-Q39):

NEW QUESTION # 34
How does SAP position SAP Datasphere in supporting business users? Note: There are 3 correct answers to this question.

- A. Business users can create restricted calculated columns based on existing models.
- B. Business users can leverage embedded analytic Fiori apps for data analysis.
- C. Business users can create agile models from different sources.
- D. Business users can upload their own CSV files.
- E. Business users can allocate system resources without IT involvement.

Answer: B,C,D

Explanation:
SAP Datasphere (formerly known as SAP Data Warehouse Cloud) is designed to empower business users by providing self-service capabilities while maintaining governance and scalability. Let's analyze each option to determine why A, B, and E are correct:
* Explanation: SAP Datasphere allows business users to create agile data models by integrating data from various sources, such as on-premise systems, cloud applications, and external datasets. This flexibility enables users to build models that reflect their specific business needs without heavy reliance on IT.
*The platform provides tools like the "Data Builder" and "Space Management" to facilitate the creation of models from diverse data sources. These tools are designed to be user-friendly, enabling business users to work independently.
2. Business users can leverage embedded analytic Fiori apps for data analysis (Option B)Explanation:
SAP Datasphere integrates with SAP Analytics Cloud (SAC) and other analytics tools, allowing business users to leverage embedded Fiori apps for data analysis. These apps provide pre-built dashboards and visualizations, enabling users to perform advanced analytics without requiring technical expertise.
Reference: Embedded analytics in SAP Datasphere supports real-time insights and decision-making, aligning with SAP's vision of empowering business users through intuitive tools.
3. Business users can allocate system resources without IT involvement (Option C)Explanation: While SAP Datasphere provides self-service capabilities, resource allocation (e.g., memory, CPU, storage) is typically managed at the administrative level to ensure optimal performance and governance. Business users do not have direct control over system resources to prevent misuse or over-allocation.
Reference: Resource management in SAP Datasphere is governed by administrators who define quotas and limits for spaces and users. This ensures that the system remains stable and scalable.
4. Business users can create restricted calculated columns based on existing models (Option D) Explanation: Creating restricted calculated columns requires a deeper understanding of data modeling and SQL scripting, which is typically beyond the scope of business users. This task is more suited for data engineers or power users who have technical expertise.
Reference: While SAP Datasphere supports advanced modeling features, these are often used by technical users rather than business users.
5. Business users can upload their own CSV files (Option E)Explanation: SAP Datasphere allows business users to upload CSV files directly into their spaces. This feature enables users to incorporate their own data into the platform for analysis and modeling, fostering agility and collaboration.
Reference: The ability to upload CSV files is part of SAP Datasphere's self-service capabilities, empowering business users to integrate personal or departmental data without IT intervention.

NEW QUESTION # 35
You have an existing field-based data flow that follows the layered scalable architecture (LSA++) concept. To meet a new urgent business requirement for field you want to leverage a hierarchy of an existing characteristic without changing the transformation.How can you achieve this? Note: There are 2 correctanswers to this question.

- A. Assign hierarchy properties to the field in the BW Query
- B. Add the characteristic to the DataStore object (advanced)
- C. Associate the field with the characteristic in the CompositeProvider
- D. Associate the field with the characteristic in the Open ODS View

Answer: C,D

NEW QUESTION # 36
Which source types are available to create a generic DataSource in SAP ERP? Note: There are 3 correct answers to this question.

- A. ABAP class method
- B. SAP query
- C. ABAP managed database procedure
- D. ABAP function module
- E. Database view

Answer: A,B,D

Explanation:
InSAP ERP, aGeneric DataSourceis used to extract data from various source types and make it available for consumption in SAP BW/4HANA or other systems. The source type defines the origin of the data and how it is extracted. Below is an explanation of the correct answers and why they are valid.
* A. ABAP class method
* AnABAP class methodcan be used as a source type for a Generic DataSource. This approach allows developers to encapsulate complex logic within an ABAP class and expose the data extraction logic through a specific method.
* The method is called during the data extraction process, and its output is used as the data source.
This is particularly useful for scenarios where custom logic or calculations are required to prepare the data.
1: SAP provides support for ABAP class methods as part of its Generic DataSource framework, enabling flexible and reusable data extraction.
B). SAP query
AnSAP querycan also serve as a source type for a Generic DataSource. SAP queries are predefined reports created using the SAP Query tool, which allows users to extract data from logical databases or user-defined views.
By leveraging SAP queries, non-technical users can create data sources without requiring extensive programming knowledge. The query output is then used as the basis for the Generic DataSource.
Reference: SAP Query is a widely used tool in SAP ERP for creating ad-hoc reports and data extracts, making it a convenient option for Generic DataSources.
D). ABAP function module
AnABAP function moduleis one of the most common source types for Generic DataSources. Function modules are reusable ABAP routines that encapsulate specific business logic or data extraction processes.
During the extraction process, the function module is executed, and its output is passed to the Generic DataSource. This approach is highly flexible and supports complex data transformations and filtering.
Reference: SAP BW/4HANA extensively uses ABAP function modules for data extraction, as they provide a robust and scalable way to retrieve data from SAP ERP systems.
Incorrect Options:C. ABAP managed database procedure
ABAP Managed Database Procedures (AMDPs)are used to execute database-specific logic directly on the database layer. While AMDPs are powerful for performance optimization, they are not supported as a source type for Generic DataSources.
Generic DataSources rely on higher-level ABAP constructs like function modules or class methods rather than low-level database procedures.
Reference: AMDPs are primarily used for advanced SQLScript-based processing and are not integrated into the Generic DataSource framework.
E). Database view
Whiledatabase viewsare commonly used to structure and organize data in SAP ERP, they cannot be directly used as a source type for Generic DataSources. Instead, database views are typically accessed indirectly through ABAP function modules or class methods.
Reference: SAP recommends using higher-level ABAP constructs (e.g., function modules) to encapsulate the logic for accessing database views, ensuring better flexibility and maintainability.
Conclusion:The correct answers areA. ABAP class method,B. SAP query, andD. ABAP function module, as these are the supported source types for creating Generic DataSources in SAP ERP. These options provide flexibility, reusability, and ease of use for extracting data from SAP ERP systems.

NEW QUESTION # 37
Which development object needs to be built to generate an HDI Container?

- A. Package
- B. HDB module
- C. Space
- D. SQL script procedure

Answer: B

NEW QUESTION # 38
What are some of the prerequisites for using SAP S/4HANA ABAP CDS views for extraction into SAP BW /4HANA in an ODP context? Note: There are 2 correct answers to this question.

- A. The ABAP CDS views must be released through the program RODPS_OS_EXPOSE for BW extraction.
- B. The ABAP CDS views must be defined with the appropriate data extraction annotations.
- C. The Operational Data Provisioning Framework must be configured in SAP BW/4HANA.
- D. An ODP source system with context ODP_CDS must be created in SAP BW/4HANA.

Answer: A,D

Explanation:

Extracting data from SAP S/4HANA ABAP CDS (Core Data Services) views into SAP BW/4HANA using the Operational Data Provisioning (ODP) framework requires specific prerequisites. These ensure that the CDS views are properly exposed and accessible for extraction. Below is a detailed explanation of why the verified answers are correct.

* ABAP CDS Views:ABAP CDS views are reusable data models defined in SAP S/4HANA. They provide a semantic layer for querying data and can be used for reporting and analytics.

* Operational Data Provisioning (ODP):ODP is a framework in SAP BW/4HANA that enables real-time or near-real-time data extraction from various source systems, including SAP S/4HANA.

* ODP Contexts:ODP contexts define the type of source system and data extraction method. For CDS views, the contextODP_CDSis used.

* Data Extraction Annotations:Annotations in CDS views specify metadata for extraction purposes, such as field properties and extraction behavior.

Key Concepts:

* Option A: The ABAP CDS views must be released through the program RODPS_OS_EXPOSE for BW extraction.

* Why Correct?To make an ABAP CDS view available for extraction via ODP, it must be explicitly released using the programRODPS_OS_EXPOSE. This step registers the view in the ODP framework and makes it accessible to SAP BW/4HANA.

* Option B: The Operational Data Provisioning Framework must be configured in SAP BW/4HANA.

* Why Incorrect?While configuring the ODP framework is a general prerequisite for any ODP- based extraction, it is not specific to extracting ABAP CDS views. This option is too broad to be considered a direct prerequisite.

* Option C: An ODP source system with context ODP_CDS must be created in SAP BW/4HANA.

* Why Correct?To extract data from ABAP CDS views, you must create an ODP source system in SAP BW/4HANA with the contextODP_CDS. This context specifies that the source system provides data from CDS views.

* Option D: The ABAP CDS views must be defined with the appropriate data extraction annotations.

* Why Incorrect?While annotations are important for defining metadata in CDS views, they are not mandatory for ODP-based extraction. The primary requirement is releasing the view using RODPS_OS_EXPOSE.

Verified Answer Explanation:

* SAP BW/4HANA Extraction Guide:The guide outlines the steps for extracting data from ABAP CDS views using the ODP framework, including the use ofRODPS_OS_EXPOSEand the creation of an ODP source system.

* SAP Note 2700850:This note provides detailed instructions on releasing CDS views for BW extraction and configuring the ODP framework.

* SAP Best Practices for ODP Extraction:SAP recommends using theODP_CDScontext for extracting data from ABAP CDS views and emphasizes the importance of releasing views using RODPS_OS_EXPOSE.

NEW QUESTION # 39

......

Using the C_BW4H_2505 Study Materials, you will find that you can grasp the knowledge what you need in the exam in a short time. Because users only need to spend little hours on the C_BW4H_2505 study materials, our learning materials will help users to learn all the difficulties of the test site, to help users pass the qualifying examination and obtain the qualification certificate. If you think that time is important to you, try our learning materials and it will save you a lot of time.

C_BW4H_2505 Valid Braindumps Sheet: https://www.prep4surereview.com/C_BW4H_2505-latest-braindumps.html

SAP C_BW4H_2505 Questions Answers Since there are hardly any straight questions, 'how to' answer is important, SAP C_BW4H_2505 Questions Answers Our service tenet is to let the clients get the best user experiences and be satisfied, So to help you with the C_BW4H_2505 actual test that can prove a great deal about your professional ability, we are here to introduce our SAP Certified Associate C_BW4H_2505 practice torrent to you, You can plan to try as much certifications as you want to brighten your prospects for a sound professional career in SAP C_BW4H_2505 Valid Braindumps Sheet.

You can add an `<% Import >` directive to a page to import C_BW4H_2505 a particular namespace, Be loose, but not too loose — The best interviews are somewhat conversational.

Since there are hardly any straight questions, 'how to C_BW4H_2505 Questions Answers' answer is important, Our service tenet

is to let the clients get the best user experiences and be satisfied.

Free PDF Quiz Pass-Sure SAP - C_BW4H_2505 Questions Answers

So to help you with the C_BW4H_2505 Actual Test that can prove a great deal about your professional ability, we are here to introduce our SAP Certified Associate C_BW4H_2505 practice torrent to you.

You can plan to try as much certifications as you want to brighten your prospects for a sound professional career in SAP, However, to get success in C_BW4H_2505 dumps PDF is not an easy task, it is quite difficult to pass it.
