NEW QUESTION # 165

What does a customer provide in a software as a service (SaaS) model?

- A. data storage
- **B. application data**
- C. application software
- D. compute resources

Answer: B

Explanation:

Section: Describe Cloud Concepts

Explanation:

SaaS provides a complete software solution which you purchase on a pay-as-you-go basis from a cloud service provider. You rent the use of an app for your organization and your users connect to it over the Internet, usually with a web browser. All of the underlying infrastructure, middleware, app software and app data are located in the service provider's data center. The service provider manages the hardware and software and with the appropriate service agreement, will ensure the availability and the security of the app and your data as well.
