Microsoft Azure Security Technologies Sample Questions (Q370-Q375):

NEW QUESTION # 370

You have an Azure subscription that contains the virtual machines shown in the following table.

- VNET1, VNET2, and VNET3 are peered with each other. You perform the following actions:
 - * Create two application security groups named ASG1 and ASG2 in the West US region.
 - * Add the network interface of VM1 to ASG1.

Answer:

Explanation:

NEW QUESTION # 371

You have the Azure Information Protection conditions shown in the following table.

- You need to identify how Azure Information Protection will label files.
 - What should you identify? To answer, select the appropriate options in the answer area.
- NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Label 2 only

How multiple conditions are evaluated when they apply to more than one label

- * The labels are ordered for evaluation, according to their position that you specify in the policy. The label positioned first has the lowest position (least sensitive) and the label positioned last has the highest position (most sensitive).
- * The most sensitive label is applied.
- * The last sublabel is applied.

Box 2: No Label

Automatic classification applies to Word, Excel, and PowerPoint when documents are saved, and apply to Outlook when emails are sent. Automatic classification does not apply to Microsoft Notepad.

NEW QUESTION # 372

You need to create Role1 to meet the platform protection requirements.

How should you complete the role definition of Role1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

1) Microsoft.Compute/

2) disks

3) /subscription/{subscriptionId}/resourceGroups/{Resource Group Id}

A new custom RBAC role named Role1 must be used to delegate the administration of the managed disks in Resource Group1. Role1 must be available only for Resource Group1.

NEW QUESTION # 373

You work at a company named Contoso, Ltd. that has the offices shown in the following table.

Contoso has an Azure Active Directory (Azure AD) tenant named contoso.com. All contoso.com users have Azure Multi-Factor Authentication (MFA) enabled. The tenant contains the users shown in the following table.

The multi-factor settings for contoso.com are configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

NEW QUESTION # 374

You create an Azure subscription with Azure AD Premium P2.

You need to ensure that you can use Azure Active Directory (Azure AD) Privileged Identity Management (PIM) to secure Azure roles.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
